

**National English Competition
for College Students
(Type D – Sample)
参考答案及作文评分标准**

Part I Listening Comprehension (35 marks)

Section A (15 marks)

1—5 CCBBC 6—10 CBDCA

Section B (10 marks)

11—15 DABDB

Section C (10 marks)

16. Footprints of animals.
17. Damage caused by visitors.
18. By observing at a distance.
19. It's disrespectful to local people.
20. Touching the engravings.

Part II Vocabulary and Grammar (15 marks)

21—25 CDBCA 26—30 CCBBA 31—35 DDCCA

Part III Cloze (10 marks)

Section A (5 marks)

36. fulfilment 37. on 38. belonging to 39. unexpected 40. completely

Section B (5 marks)

41. earlier 42. affected 43. leading 44. up 45. falling

Part IV Reading Comprehension (30 marks)

Section A (10 marks)

46—50 GCEDA

Section B (10 marks)

- 51. Its location.
- 52. The statues show people of different professions and social levels.
- 53. Marine life has adapted to the new environment.
- 54. The major impact that people and technology have had on our planet's ecosystem
- 55. The Cancun officials wanted to protect the area's natural reefs.

Section C (10 marks)

- 56. animal cognition 57. solve problems 58. self-awareness
- 59. recognizing themselves 60. high levels of

Part V Translation (20 marks)

Section A (10 marks)

61. 中国是公认的四大文明古国之一,其有记载的历史和文化可以追溯到五千年前。
中国的饮食历史、茶传统、诗歌和艺术、医药、戏剧和节日只是中国丰富的文化中的一部分。对于中国这样一个历史悠久的国家来说,不同地区的民族和习俗差异巨大是很自然的。无论走到哪儿,你都会体验到传统、习俗和遗产的独特结合。

Section B (10 marks)

62. Almost every language is rich in vocabulary and idiomatic expressions. For example, Inuit people who live in Alaska and the far north of Canada have many different ways to describe snow. Irish people, on the other hand, have a wide variety of ways to describe a green landscape. Other examples can be found in language relating to food. For instance, the French and Italian languages have many words for talking about wine, while American English has many ways to indicate how a steak should be cooked. This shows that the development of a language is influenced by both environment and culture.

Part VI Error Correction (10 marks)

- A knowledge of differences between cultures in an ever-shrinking globalized world are becoming one of the essential skills that modern 63. is
“citizens of the world” need to possess in order to work and learn effectively.
At a superficial level this involves know about food or body taboos. 64. knowing
For example, some cultures don’t eat meat, cows can be sacred, the head
must not be touched. But while it is important to know about
these things, if this is what your intercultural knowledge stops, 65. where
you’ll still end up offending people or misunderstood. 66. misunderstanding
- More important than superficial behavior is the value system of
a culture. The culturally aware individual needs to have not only
knowledge of publicly visible behaviors and stated beliefs, but also
an awareness of the underlain value system of cultures that shape those 67. underlying
behaviors and stated beliefs.
- Of course, these belief systems can ^ very different from one’s 68. be
own, and it’s not very easy to label other people’s behaviors and beliefs 69. not
as strange. It is more difficult to accept that one’s own ways of behaving,
which seem perfect normal, can be seen as strange and even rude in 70. perfectly
another culture. But if one tries to observe one’s own culture objectively 71. unless
and have a understanding of why other cultures do things differently, 72. an
it is inevitable that cultural mistakes will be made.

Part VII Writing (30 marks)

Section A (10 marks)

Omitted.

Section B (20 marks)

Omitted.

作文评分标准:

一、评分原则

1. 本题满分为 Section A 10 分、Section B 20 分,按四个档次给分。

2. 评分时,先根据文章的内容和语言初步确定其所属档次,然后以该档次的要求来衡量,确定或调整档次,最后给分。

3. Section A 词数少于 100 个词或多于 120 个词的,Section B 词数少于 140 个词或多于 180 个词的,从总分中减去 2 分。

4. 如书写较差,以致影响阅卷,将分数降低一档。

二、各档次给分范围和要求

第四档(很好):Section A 9~10 分;Section B 16~20 分

完全符合写作格式的要求,覆盖多个内容要点,表达思想清楚,文字通顺,连贯性很好,基本上无词汇和语法错误。

第三档(好):Section A 6~8 分;Section B 11~15 分

基本符合写作格式的要求,有个别地方表达思想不够清楚,文字基本通顺、连贯,有少量词汇和语法错误。

第二档(一般):Section A 3~5 分;Section B 6~10 分

不太符合写作格式的要求,漏掉内容要点,表达思想不清楚,文字多处出现词汇和语法错误,影响了对写作内容的理解。

第一档(差):Section A 1~2 分;Section B 1~5 分

未达到写作格式的要求,明显遗漏主要内容,表达思想混乱,有较多词汇和语法的重大错误,未能将信息传达给读者。

0 分

白卷;作文与题目毫不相关;内容太少,无法评判;所写内容无法看清。

(Type D – Sample)
听力录音原文

Part I Listening Comprehension (35 marks)

Section A (15 marks)

*In this section, you will hear **two** conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause.*

*Listen to each conversation. Then read the **four** choices marked **A, B, C** or **D**, and decide which is the best answer according to what you hear. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

Conversation One (5 marks)

M: I'm joined in the studio today by Jessica Franklin, author of the recently published book *Youth and Social Media*. Jessica, welcome to the show.

W: Thank you for having me.

M: So tell us, Jessica, what first got you interested in this subject?

W: As we all know, social media is a part of everyday life for billions of people across the world. In fact, most young people cannot imagine life without it. I guess the sheer size of the industry got me thinking at first and then I was talking to my niece one day online and she told me that she was feeling sad but didn't really know why. We talked about the site she was using and her feelings, and I started thinking there was a connection. That was what made me want to research the matter further.

M: I see. So what did you find?

W: I learned that several studies had already been carried out on the subject. For example, the University of Utah asked 425 students about the amount of time they spent on a popular social media site, as well as about their happiness. They found that the longer people spent on the site, the more they expressed negative feelings about themselves and their lives. They were also more likely to believe that other people's lives were better than their own. Researchers said that this's a common habit we all have as humans: we tend to jump to conclusions based on limited knowledge.

M: Of course, and people usually want to show the best of themselves on their profiles, don't they?

W: Absolutely. People are much more likely to unload happy photos or comments about their lives than anything that might be seen as negative. So, when some people view these profiles, they may jump to the conclusion that other people's lives are better, happier or more successful. According to the study, the kind of people that are most at risk of feeling depressed when using social media sites are those who don't participate actively, you know, the kind of people who spend a long time looking at other people's profiles and very little time updating their own. These types of users were found to express less happy feelings after spending time on a site. It was also found that having lots of "contacts" or "friends" who you don't know personally is linked to an increase in negative feelings when using the site.

Conversation Two (10 marks)

M: Excuse me, professor. Do you mind if I ask you a question about the course outline?

W: Of course not. Is it Paul?

M: Yes. I was wondering about the course outline. Here it says that we'll be learning from the third edition of *Classical Mechanics*. Is it right?

W: Yes, that's right. If you're wondering why I didn't choose the most recent edition, it's a purely economic decision. The editions are virtually identical, and I don't think

it's right to have students pay fifty percent more for the newest edition if it's all the same anyway.

M: I appreciate that. But the reason I was concerned is because that's the same book that Professor Maggart uses in his introductory course. So I just wasn't sure about how much material will be repeated from that course.

W: Really? I don't understand. Why would he use that book? There're much more comprehensive basic textbooks for an introductory course on electricity and magnetism.

M: I think that's a different course. I'm talking about *Foundations of Mechanics*. It's for the upper-level courses in the physics department.

W: I guess that makes sense. You know, this is the first time I've ever heard about us using the same book. Do you remember what chapter you got up to?

M: If I remember correctly, it was up to chapter six.

W: *Calculus of variations*. Well, I'm kind of surprised that that's as far as he took you all in a survey course on classical mechanics. But anyway, as for your question, there will be some overlap. I can tell you right now that we'll be blowing through the first six chapters within the first two weeks of class. I'll mostly just review that material.

M: OK, and if that's the case, would it be safe for me to assume that we'll be covering more advanced topics then?

W: Most definitely. My course will give you deeper knowledge of those topics.

Section B (10 marks)

*In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the **four** choices marked **A**, **B**, **C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

11. The large Itaipu dam, between Paraguay and Brazil, is facing an energy production crisis because of record low river and rainfall levels. Experts say those low levels could last into 2022. The Itaipu dam supplies about 10 percent of the energy used in Brazil and 86 percent of energy used in Paraguay. The low levels affected both power production and the money the countries receive for the use of the water. Brazil's government has asked its citizens to reduce their use of electricity and water.
12. The clock tower of Britain's Houses of Parliament has been hidden in a repair project for over three years. Removing the scaffolding was the most important step in the \$107 million project. The repair work includes replacing parts of the clock faces using handmade glass. The dials' hands, numbers and other details have been repainted bright blue rather than the black long familiar to Londoners. The symbols of the four parts of the United Kingdom have also been repainted in the colours from the first design of the tower.
13. Having a long-term pet companion may delay memory loss and other kinds of cognitive decline, a new study has found. Pet ownership was especially beneficial for working verbal memory, such as memorization of word lists, according to the preliminary research. And it's not just cats and dogs that can boost the brain. People in the study also cared for rabbits, hamsters, birds, fish and reptiles, although dogs were the most prevalent, followed by cats.
14. A recent study found that Americans who completed college or university are more likely to have friends and are less lonely than those who only finished high school. The findings come at a time when many Americans question whether a college degree is worth its cost. Daniel Cox is director of the Survey Center on American Life. He said that, in general, Americans are experiencing a decline in their number of friends. There are two groups that really stood out. The first is men. And the second one is people without a college degree.
15. Phrygian caps will be mascots of the Paris 2024 Olympic and Paralympic Games as organizers look to celebrate the French revolution's spirit. Phryges' aim to show that

sport can change everything, and that it deserves to have a prominent place in our society. It's a symbol of revolution and freedom. It's an icon seen over centuries, from the Notre Dame Cathedral to the Eiffel Tower. More specifically, it's the red bonnet famously worn by Marianne, the artistic personification of the free French republic.

Section C (10 marks)

*In this section, you will hear **one monologue**. The **monologue** will be read **twice**. After listening, answer the questions using **no more than five words**. Write the answers on the **answer sheet**.*

Good afternoon, everyone!

This is the first seminar in preparation for our archaeological fieldwork in Namibia.

We are very lucky to have received partial research funding for this trip from our institute, so I shall expect 200% attention and participation from you all. In the first part, I'm going to give a brief introduction to the contemporary research on rock art, and in the second part I'm going to give you some do's and don'ts for our fieldwork trip.

In Namibia there are both paintings and engravings — that's where the surface of the rock is cut out. Many of the engravings show footprints of animals, and most scholars used to think that the purpose of these was simple and obvious: this rock art was like a school book with pictures to teach children about tracks.

Then I'd like to make some very important points about our fieldwork. We're going to a number of sites, and we won't always be together. The single largest problem faced by people who manage the sites is damage caused by visitors, even though it's usually unintentional.

Whenever you do go to a site, don't forget you can learn many things from observing at a distance instead of walking all over it. This can really help to reduce visitor pressure. People often say, "Well, there's only two of us and just this one time", but maybe thousands of people are saying the same thing.

And then some basic rules to guide you — we'll have our own camp near a village, but remember never to camp on a site if you go on your own. It's disrespectful to the people of that culture, and certainly don't make fires. It's really dangerous in dry areas, and you can easily burn priceless and undiscovered material by doing so.

So, how are we going to enjoy the rock art on our field trip? By looking at it, drawing it and photographing it — NEVER by touching it. Rock art is fragile and precious.

Remember that climbing on rocks and in caves can destroy in a moment what has lasted for centuries. So no heroics in Namibia, please! Try to be extra careful and help others to be too.

And lastly please don't even move rocks or branches to take photographs — you should leave the site intact.

This is the end of the listening part. Please transfer your answers to the answer sheet.
