W: OK, I suppose you're right. Have you got any idea then?

M: Yes, I have actually, Remember that TV programme we saw about the Arctic Circle? I'd love to go there. We could do a cruise and see all that amazing scenery on the coast.

W: Yes. (6) But I remember they said the weather could be terrible. If it rained all the time we wouldn't see the scenery. And you know I always get seasick on boats.

M: Oh yeah, I forgot. That wouldn't be much fun. Well, what about a beach holiday for a change?

W: Come on! (7) You know we'd be bored if we spent a week lying on the beach.

(11) On my most recent trip, we were looking for a rare crocodile in a rainforest in Asia but we discovered a previously unknown snake. Although it was tiny and completely harmless, it was still very exciting.

M: It sounds it! So, tell us about your early life. How did you become an explorer?

W: Well, I've been interested in nature ever since I was a young child. While my friends were playing games, I used to go fishing or looking for animals in the fields near my home. I wasn't interested in protecting creatures in those days. In fact, (12) I used to catch them to put them in my own little zoo!

M: And what was your first expedition?

W: As soon as I was eighteen, I went to Africa with an organization called Africa Exchange. They run different projects. Things like helping to build schools or studying how monkeys behave. (13) My job was to count how many lions and elephants there were in a certain area every day. That was a fantastic introduction, and really important for the protection programme.

M: And what did you do after that?

W: While I was at university I met a famous Brazilian explorer. He was planning an expedition to the Amazon rainforest in order to study the plants that people use for medicine. (14) A team member broke her leg so he asked me to go in her place.

M: Can you describe what it's like to be in a rainforest?

W: Well, the thing I always notice is the atmosphere. (15) Although it's not silent, the noises are all nature, which I find very relaxing. Despite the heat and the wildlife, it's quite safe if you're careful. Modern technology means you can't really get lost nowadays.

M: Well, it sounds really interesting.

And somebody is the criminal who claims to be your trusted provider, that bank or credit union you've gone to forever. Maybe it's the Internet site that hosts auctions or payments services and they say that if you log in then you'll avoid some security problems because there's been a problem with your account.

Section D (10 marks)

Dictation

【答案】

21. everyday activities

22. identify

23. relate examples

24. improving

25. traditional apprentice training

【录音原文】

The Yale group found that most of the really useful knowledge which successful people have acquired is gained during (21) everyday activities—but typically without conscious awareness. Although successful people's behaviour reflects the fact that they have this knowledge, high achievers are often unable to articulate or define what they know. This partly explains why practical intelligence has been so difficult to (22) identify.

Professors found that the best way to reach practical intelligence is to ask successful people to (23) relate examples of crucial incidents at work where they solve problems demonstrating skills they had learnt while doing their jobs. It would appear that one of the best ways of (24) improving your practical intelligence is to observe master practitioners at work and, in particular, to focus on the skills they have acquired while doing the job. Oddly enough, this is the basis of (25) traditional apprentice training. Historically, the junior doctor learnt by observing the consultant surgeon at work and the junior lawyer by assisting the senior barrister.

30.comparison shopping

（录音最后提到"When shopping for Thanksgiving party decorations, comparison shopping is the key", 在选购感恩节派对装饰品时，比较购物是关键。）

【录音原文】

Are you hosting a Thanksgiving party this year? If so, you may have already started your preparations. Apart from planning the menu and the guest list, you may want to begin shopping for Thanksgiving party decorations. Before heading to a party supply store, remember to make a list of items that you need to buy. Doing this will help you save time and money.

There are literally thousands of party supply stores that cater to Thanksgiving. Here's where you can find Thanksgiving party decorations:

1.Party Supply Stores

(26) A party supply store is probably the best place to visit if you want to look at a wide array of Thanksgiving decorations. Party supply stores carry many different brands and unique designs that are not found in discount or department stores. They also have everything you need to make your own party decoration—from tools to trinkets. While the cost of shopping at a party supply store may be a little bit higher than that in most other retail stores, you are guaranteed to find exactly the kind of items you are looking for.

2.Discount Stores or Dollar Stores

If you are planning a Thanksgiving party on a budget, you may want to consider shopping at a discount store or a dollar store. (27) Discount stores offer a large number of affordable party products that cost around a dollar or two. In dollar stores, all items are priced at one dollar or less. Discount stores and dollar stores are a good option if you don't want to spend much on party decorations.

3.Department Stores

Local department stores retail items that are mid-priced. (28) These products are not as expensive as the ones found at party supply stores, but cost a bit more than those found in dollar and discount stores. Shopping at a department store is convenient because you can buy nearly everything else you need for your party there, such as food, drinks, and snacks.

4.Online Party Supply Shops

If you are planning to buy your Thanksgiving party decorations in bulk, you may want to shop at online party supply stores. Online shops provide a wide variety of party decorations, from the most common items to very unusual ones. (29) Ordering in bulk also saves your time, energy, and shipping costs. (30) When shopping for Thanksgiving party decorations, comparison shopping is the key. Choose the store that best suits your needs and your budget.

Part V Translation (15 marks)

Section A (5 marks)

76.【参考译文】

步行是一件引人注目的事。如果你的老板对你说“到我办公室来”，你会觉得他要说正事或有什么指示。相反，如果老板过来对你说“跟我一起走走”，你也许会察觉到，接下来的时刻会有一种亲切感。他会向你吐露心声，甚至会表现出他脆弱的一面。行走本身是空洞的，我们是在行走的过程中将其充实。松鼠从我们的路上穿过，抓住一颗橡子，飞快窜到旁边的树上，这样的事情是不可能预先计划的。你只是偶遇，或许想给这场偶遇赋予某种含义。

【解析】本篇翻译生词较少，且句式简单。翻译时首先应该注意语境，部分单词应根据语境进行意译，其次应该注意不同词性之间的转化与活用，使译文更加符合中文的表达习惯。第二个句子中 formal 和 instructive 应转化为名词，表示“正事”和“指示”。第三句中，revelation 本意是指“启示；揭露”，这里应该表示老板向你“吐露心声”。第五句中，that 引导主语从句，包含的信息较多，在译为中文时可拆分成两个独立的句子并应注意衔接。

77.However, I think research funds should be available not only to science but to other fields as well.

78.It is true that scientific invention will make our life easier, but the creative works in arts will also make our life richer and fuller.

（本句翻译“确实”时，将句子转化为 it 引导的形式主语从句，避免主语过长。）

79.Providing financial support for both arts and science, just like fueling the twin engines of our life, will make it more convenient and interesting.

（本题中将“对文科和理科的投入资助”与“对生活双引擎投入动力”作比较，为并列成分，括号中提示的 fuel the twin engines 为动词短语，所以前面表达对文理科的投资时也应该用动词短语。作比较的部分为整个句子的主语，翻译时注意应使用动词的现在分词形式。）

80.Science can change the world, but arts can enable us to understand ourselves and the relationship between man and the world.

(原文中逗号前后为两个独立的句子, 翻译时应注意添加衔接词 "but".)

As is shown in the chart, smart phones were not popular in 2004, with no more than 20% of adults using smart phones. Then in 2009, there was a sharp rise in the percentage of smart phone users. The ten years from 2009 to present witnessed a steady growth of the percentage of smart phone users. However, it can be seen from the chart that the percentage of male users was higher than that of female users. With students spending more time on cell phones, many teachers complain that students now lack more knowledge than before. However, I think students are more knowledgeable today.

Firstly, cell phones offer us a more convenient way to get the information we need. Imaging that everything is still recorded on papers, so we have to spend much time going to the library and searching for all the relevant books to get the exact information we need. Nowadays, when we feel confused, we can turn to our cell phones and search on the Internet.

Secondly, with the rapid development of e-books, we can study at any time. When we are taking a bus or waiting for a train, we can read the e-books stored in our cell phones. Various kinds of information have been provided on the Internet, including books, news, exams and research papers. We can find whatever we want.

In conclusion, the wide use of cell phones cannot decide whether you lack knowledge or not. It depends on how much time you have spent on improving yourself.
