

2023 年决赛试题

(Total: 150 marks Time: 120 minutes)

Part I Listening Comprehension (30 marks)

Section A (5 marks)

*In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

1. A. The prizes cost a lot of money. B. They think the car is too big.
C. Cars are very expensive. D. They don't like shopping.
2. A. Say good-bye to the woman. B. Take the woman to the airport.
C. Change his reservation. D. Meet the woman at the airport.
3. A. Repair her computer as soon as possible. B. Change the topic of her history paper.
C. Help him write his paper. D. Use a computer in the lab.
4. A. Gymnastics. B. Swimming. C. Tennis. D. Yoga.
5. A. Because the team's trip for next month is very short.
B. Because the rest of the team haven't got the information.
C. Because their flight leaves at six thirty in the morning.
D. Because the weather is probably not good enough.

Section B (10 marks)

*In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause. During the pause, read the questions and make your answers on the answer sheet with a single line through the center.*

Conversation One

*Listen to the conversation. Then read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer according to what you hear. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

6. What is the class mainly discussing?
A. How to learn a second language.
B. The importance of childhood education.
C. Phases of language development in young children.
D. How to summarize the children's language acquisition.
7. Why does the student mention the sounds [k] and [g]?
A. Because they occur in all languages.
B. Because they're frequent consonants.

- C. Because they're difficult for children to pronounce.
 - D. Because they're among the first sounds babies make.
8. According to the student, why are new-born babies unable to make language-like sounds?
- A. Because their hearing is not good enough yet.
 - B. Because their voice box is not positioned correctly yet.
 - C. Because they don't yet have the muscle control needed.
 - D. Because they don't know how to follow their parents yet.
9. According to the discussion, when does vocabulary growth first start to increase dramatically?
- A. In the first month of life.
 - B. At about three-month of age.
 - C. When children learn to say whole sentences.
 - D. When children learn to associate sounds with meanings.
10. According to the discussion, what do linguists still not know?
- A. How children actually learn a language.
 - B. Until what age vocabulary growth continues.
 - C. The best way to distinguish similar sounds.
 - D. The best time to start learning a foreign language.

Conversation Two

*Listen to the conversation, and complete the following sentences with **one word** according to what you hear. Write the answers on the **answer sheet**.*

- 11. Freya Smith decided to do an animal _____ course.
- 12. Freya chose to study at Fairfield College because it's got a good _____ of animals and everyone's really friendly.
- 13. The course is only _____ days a week, so she's already started working part-time at a pet shop.
- 14. They have let the students treat some minor problems, like removing splinters from _____.
- 15. They make the students handle all kinds of animals including _____ and snakes.

Section C (5 marks)

*In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

- 16. Who might not like the new system?
 - A. The store owner.
 - B. The cashier.
 - C. The manager.
 - D. The credit card company.

17. What is the public asked to do?
- A. Use less electricity. B. Take food to the poor.
C. Avoid the cold. D. Produce their own power.
18. What problem is occurring?
- A. There is flooding. B. There is a pipe leakage.
C. There is a gas shortage. D. There is a power failure.
19. What will Dr Silva do after his talk?
- A. Answer questions. B. Ask questions. C. Read the news. D. Go to the bank.
20. What will happen next month?
- A. There will be a talk on scuba diving. B. A documentary film will be shown.
C. There won't be a programme. D. Books will be discounted.

Section D (10 marks)

*In this section, you will hear one monologue. The monologue will be read **only twice**. After listening, answer the questions using **not more than five words**. Write the answers on the **answer sheet**.*

21. What job is Ms Krim interested in?
22. Who recommends Ms Krim for the job?
23. When did Ms Krim finish her degree in marketing?
24. What position does Mr Mendez recommend Ms Krim to apply for?
25. When will the position Mr Mendez recommended become available?

Part II Vocabulary & Grammar (15 marks)

*There are **15** incomplete sentences in this part. For each blank there are **four** choices marked **A, B, C** and **D**. Choose the one that best completes the sentence. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

26. Please don't ask for personal information about our employers, as we keep that information _____.
A. consequential B. confidential C. conservative D. considerate
27. When the committee _____ to details, the proposed plan seemed impractical.
A. got down B. set about C. went off D. came over
28. The "plain folks" approach says, _____, "Buy me or vote for me. I'm just like you."
A. in need B. in want C. in effect D. in all
29. Americans who don't drink Pepsi are said to be _____ of "the Pepsi generation".
A. left out B. left off C. left alone D. left behind
30. At first, the _____ of colour pictures over a long distance seemed impossible, but, with painstaking efforts and at great expense, it became a reality.
A. transaction B. transmission C. transformation D. transition
31. A variety of activities should be organized _____ participants can remain active as long as they want.
A. so that B. now that C. even if D. if only

32. If I were in a movie, then it would be about time that I _____ my head in my hands for a cry.
A. bury B. am burying C. buried D. would bury
33. —New evidence might lead to the conclusion _____ we are wrong.
—There is some evidence _____ dishonesty may ebb and flow.
A. why; what B. when; how C. which; which D. that; that
34. So another question my family often _____ is: whose turn is it to clean the house at weekends?
A. gropes for B. deals with C. grapples with D. strives for
35. The individual TV viewer invariably senses that he or she is _____ an anonymous, statistically insignificant part of a huge and diverse audience.
A. everything except B. anything but
C. no less than D. nothing more than
36. Military music may have _____ from attempts to get people ready for _____ by using fast music with drumming to stimulate their hearts to beat faster.
A. elevated; strife B. expanded; confrontation
C. evolved; battle D. advanced; struggle
37. The communications revolution has influenced both work and leisure and how we think and feel about both place and time, but there have been _____ views about its economic, political, social and cultural implications.
A. competitive B. irrelevant C. distracting D. controversial
38. —I'm looking for some warm winter gloves. My wife said you had them on sale.
—Yes, these gloves are on sale. They come with matching hats. We also have these scarves that would look just right with them.
—Yes, that's all very nice, but I really just want the gloves. _____ I'll take this black pair.
A. That's what I came down here for. B. Wait and have her help me then.
C. She should be able to help you out. D. Please show me another pair.
39. —Good morning. I'd like to see Mr Lee, please.
—I'm sorry. He's not here. He's out of town on a business trip. Do you have an appointment?
—Well, actually, no. _____ I didn't realize he was away. When do you expect him back?
A. Please give me an explanation. B. I thought I could just come by.
C. Give me his name and phone number. D. I can have him call you when he returns.
40. —I'm sorry, Ms Jones has already left the office and gone home.
—She's left already? That's not possible. _____
—Well, she left right around 3:00. She wanted to avoid the traffic. You know how bad it gets when there's a heavy rain like this.
A. We have to talk about it before tomorrow.
B. She knew we'd had a meeting this afternoon.
C. I mailed her this report early this morning.
D. I'll have to call her at home to discuss the report.

Part III Cloze (10 marks)

Section A (5 marks)

Read the following passage and fill in the blanks with the correct forms of 5 words out of the 7 given in the box. Write the answers on the **answer sheet**.

all in all focus on lecture on average shave steady advert

These days, female football fans are everywhere. They're in the stadiums, at the big-screen events and probably in front of your own television. The percentage of women watching football has increased (41) _____ since it became more accessible in the early 90's, and, at the last FIFA World Cup, the percentages set a record high. Despite this fact, the majority of advertisements during that competition were still aimed at men.

During the last World Cup, (42) _____, 43% of the viewers were female, and the two highest percentages were in Argentina and South Korea. If a game involved the person's own country, the percentage of female viewers increased significantly to about 50%. "The advertisers missed a wonderful opportunity," claims Sean Gabb, a college (43) _____ and author. "There were too many adverts for men and there weren't enough adverts for female fans. This percentage shows that more women watch important football matches than TV drama."

The number of women watching football games seems an opportunity that is too good to miss, but advertising companies claim that advertising on TV is too expensive during the games. In England, the TV companies charge £300,000 for 30 seconds. This is ten times more expensive than during daytime TV drama, and this is too much money for most advertisers who (44) _____ women.

Dan Harper, an advertiser, says that although the numbers of female fans are high, they are not high enough. It is more efficient to aim adverts at women when the audience is 80% female and the cost is much lower, during daytime drama, for example.

He also claims that it is too simple to say their adverts were not aimed at women. "We didn't just advertise (45) _____ products during the World Cup. There were adverts for sports clothes, snacks and drinks, credit cards and fast cars. However, we think modern women are as interested in these things as modern men, so perhaps there were enough adverts aimed at women."

Section B (5 marks)

Read the following passage and fill in each blank with **one** word in one of the following **three** ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the **answer sheet**.

Ideas and books

Stephen Hawking is one of the world's most famous scientists. He is well-known for his work (46) _____ black holes, and has developed a number of new ideas about them. Hawking believes that the birth of the universe (the "Big Bang") created many small black

holes. Hawking also thinks that there is a sort of hole in the centre of a black hole. This hole leads to another universe, completely separate from our own.

Hawking's 1988 book, *A Brief History of Time: From the Big Bang to Black Holes*, sold one copy for every 750 people on Earth. However, many people could not really understand the book and they had to give up reading it. As a result, Hawking decided to write an easier version: *A Brief History of Time* (2005).

In "The Grand Design" (2010, with Leonard Mlodinow), Hawking argued that we should look for a different way to discover the deepest mysteries of the universe. Instead of trying to find one big new (47) _____ (explain) for these mysteries, scientists should put together all the ideas that they already have.

At the opening ceremony of the London 2012 Olympics, Hawking said to a TV audience of 900 million people: "Look up at the stars and not down at your feet... be (48) cu_____."

Health, work and family life

Hawking learnt that he had the disease ALS (a disease that affects muscle control) at the age of 21, in his first year in Cambridge. He only expected to live a few years. However, he married Jane Wilde and found a job in Cambridge. In the early stages of his career, his illness got worse, but he was fortunate that he did not have to teach. He only had to do research, and this was easier for him.

Until 1985, he could talk, but in that year, doctors had to operate on him and he lost his (49) _____ (speak). Soon, however, people developed equipment that allowed him to speak. In spite of his disease, Hawking does not consider himself an unlucky man. He says it has not prevented him from having a very (50) att_____ family, and being successful in his work. He says this is thanks to the help he has received from his family and a large number of other people and organisations.

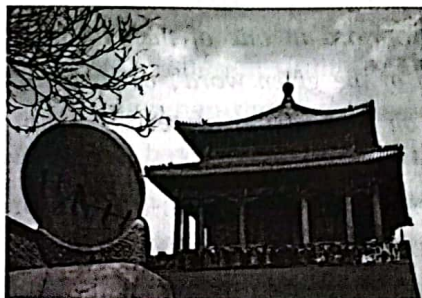

Part IV Reading Comprehension (30 marks)

Read the following passages. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the **answer sheet**.

Section A (10 marks)

Questions 51–55 are based on the following passage.

The traditional Chinese solar calendar divides the year into 24 solar terms. Start of Winter (lidong) is the 19th solar term of the year. It is the first solar term of winter, which means winter is coming and crops harvested in autumn should be stored up. Here are eight things you should know about Start of Winter.

Beginning of winter or not

In ancient times, the Chinese people took Start of Winter to be the beginning of winter. However in fact, Start of Winter is not the beginning of winter in terms of meteorology. The climate every year is different, so the beginning of winter could be quite different from place to place. (51) _____

Welcome the winter in ancient times

The four beginnings of the seasons were important festivals in ancient times. Before Start of Winter, the ancient emperor would take a shower and have no more meat. On that day, the emperor would lead his officials to the suburbs and perform the ceremony of “Welcoming the winter”.

Eating dumplings

A legend has it that at the end of the Eastern Han Dynasty (25—220), “Medical Saint” Zhang Zhongjing saved many people in Henan province from a typhoid epidemic and their ears’ from being frostbitten around Start of Winter. (52) _____ He wrapped these ingredients into a dough skin and made them into an ear shape. Since then, people have learned to make the food which became known as “dumpling”. Today there is still a saying that goes “Eat dumplings on Start of Winter Day, or your ears will be frostbitten”.

Yifan Festival of Mulam Ethnic Minority

Yifan Festival is one of the most important festivals of the Mulam ethnic minority in Guangxi Zhuang autonomous region. (53) _____ The festival includes inviting the god, offering sacrifices, asking the god to enjoy the sacrifice, singing praise of the god, drinking wine with the blood of chicken, and sending the god off.

Nourishing the winter

On the day of Start of Winter, there is a custom, “nourishing the winter”, in Southeast China in places such as Fujian, Guangdong and Taiwan provinces. To prepare for the oncoming cold winter, people there like to eat high-calorie food such as chicken, duck, beef, mutton, and fish, which are usually stewed with the four Chinese medicines: angelica, ligusticum wallichii, Chinese herbaceous peony and rehmannia glutinosa libosch, to enhance the effectiveness of the nourishment.

Eating Chinese pumpkins

In Tianjin, on the first day of Start of Winter, people eat dumplings stuffed with Chinese pumpkins (*wuogua*). It is a common vegetable in North China. Generally, the pumpkins are bought in the summer and stored until Start of Winter when they are taken out.

Eating *tuanzi* in Wuxi

On the day of Start of Winter, people in Wuxi have a custom of eating *tuanzi*, a kind of

traditional Chinese food made with rice. At this time, the autumn grain crops have just been sold on the market, and the *tuanzi* made with the newly-harvested rice tastes delicious. Most rural residents make *tuanzi* by themselves, while urban residents buy ready-made *tuanzi*. (54) _____

Offering sacrifices to ancestors

Start of Winter, when the autumn crops have been placed in storage, was the festival for people of the Manchu Eight Banners (*baqi*) and Han Eight Banners in Benxi of Liaoning province. (55) _____ The Eight Banners were administrative military divisions during the Qing Dynasty (1644—1911).

Questions 51–55

Choose from the sentences A—G the one which best fits each gap of 51—55. There are **two extra** sentences which you do not need to use.

- A. The festival offered sacrifices to invite the god to enjoy and to worship the ancestors.
- B. Incense was burned and sacrifices offered to ancestors.
- C. He cooked mutton, hot peppers and herbs to dispel the cold and increase body heat.
- D. In the Western world, they are also known as rice dumplings or sticky rice dumplings.
- E. And with the vast territory of China, winter of every area doesn't begin at the same time.
- F. The stuffing of this food can be sweet bean paste, radish or lard.
- G. It is held around Start of Winter every three to five years and lasts one to three days.

Section B (10 marks)

Questions 56–60 are based on the following passage.

A few years ago, city planners in Bali, a popular tourist spot in Indonesia, made history when they used the MetroQuest computer game to identify serious future problems and to plan possible solutions. MetroQuest helps urban planners see the future of their cities. Although it is heavily based on the famous simulation game called SimCity, there is a difference—MetroQuest is based on reality. People enter various data about city planning decisions such as transport systems, and then MetroQuest can predict the future results of those decisions and see the impact they will have. The programme can also be used to test various scenarios that may occur in the future. The makers, a Canadian company called Envision, hoped that if their product was as exciting as SimCity, it would encourage more people to become active in the future of their urban environments. However, it also has drawbacks. Unlike in SimCity, the money in MetroQuest is unlimited, which makes the programme less useful for real decision making.

Such software shows how some companies and people are responding to the increase in size of our cities and their changing nature. In recent years, urbanization—that is, the movement of people from the countryside to urban centres in search of jobs and better living conditions, had become a serious problem. Migration by foreigners who target certain cities for economic reasons also accelerates urbanization.

Due to urbanization, there has been a huge increase in the number of people living in

population lives in slums.

Urbanization also has its positive sides. Particularly in the developed world, there are many advantages to having larger urban centres. People generally have access to more jobs and facilities, such as shops and services, which makes life very convenient. Cities can also be very exciting places with entertainment, and mixtures of people and culture. Well-designed and managed cities with plenty of parks and good quality housing are very pleasant places to live.

Unfortunately, the advantages of urbanization are outweighed by the disadvantages, which are felt most in the poorer cities. The fact that there are more people often means less space and greater strain on a wide range of vital resources, especially water and services such as transportation and education. The shortage of cheap housing often creates slum areas. The UN estimates the total number of slum-dwellers will exceed over one billion in the near future. Additionally, the increasing number of people in cities leads to an increase in motor vehicles, which in turn leads to more pollution, reduced air quality and environmental problems. Crime and other social problems are also serious issues.

Why is urbanization such a widespread problem involving so many people? The main reason is undoubtedly economic. Cities are often seen as places with great economic, cultural and social opportunities. Many rural areas can not provide the opportunities that people need, particularly in Africa and India.

Unfortunately, there is no simple solution to this problem. Cities in more developed countries have introduced various plans to deal with the problems. For example, a congestion charge has been introduced in London, whereby drivers of private motor vehicles must pay to enter the central areas of the city. This innovation has been quite successful in reducing traffic and congestion.

For the less developed world, the problems present a much greater challenge. While poverty exists, people will always search for the chance of better lives. Although urban centres offer many opportunities, cities can not cope with the enormous influx of people. Governments around the world must address the serious issue of poverty and by making poverty history they can hopefully solve the problem of urbanization.

Questions 56–60

Answer the following questions with the information given in the passage.

56. Where was MetroQuest made?

57. What is the problem with MetroQuest?

58. What percentage of Africa's urban population lives in slums?
59. Why do cities attract people according to the passage?
60. What measure has been introduced in London?

Section C (10 marks)

Questions 61–65 are based on the following passage.

What does a sound look like? What do colours smell like? For most people these are very strange questions, but some people can answer them. Synesthetes are people whose senses are somehow connected; for example, many of them can see colours when they hear musical notes like A or C.

A musician in Switzerland can see colours when she hears musical notes, but unusually, she can also taste different flavours when she hears an interval—that is, two notes together. For example, when she hears a minor third interval, it tastes bitter, but a major third tastes sweet. Seeing the colours of notes and tasting the intervals are very helpful in her job as a musician, it makes it easy for her to write down the music that she hears. But she must be careful when she chooses music to listen to—imagine the mix of flavours in a punk-rock song! Instead, she prefers the music of Bach, which tastes creamy!

A musical interval is the difference between two sounds; for example the first and last sounds in an octave. An octave in music is made of eight notes; for example, A, B, C, D, E, F, G, A. Therefore, we don't have five senses, we have twenty-one.

Our senses are incredible, and have amazed people since the time of Aristotle, who first talked about the five senses. Let's consider each of the five senses.

Sight: Humans have two kinds of cell in their eyes that help them to see. *Rods* are cells that let us see when it is dark, and *cones* are cells that let us see colour. Cone cells only work when there is a lot of light, and that is why we see things as black and white when it is dark. We only have one kind of rod cell in our eyes, but most people have three kinds of cone cell, one each for red, blue and green light. By mixing these three basic colours together, we can see more than 2 million different colours! Unfortunately, about 10 percent of men (and about 0.5 percent of women) have problems with their cone cells, and they have colour defective vision. The most common form of colour defective vision means that people find it very difficult to see red and green, and often see them as different colours. For example, some shades of green might appear purple. In the rarest form of colour defective vision, people can only see different kinds of grey. On the other hand, about 1 percent of women have *four* different kinds of cone cell in their eyes, and they can see even more kinds of colours.

Smell: Smell is an important and mysterious sense. Most people can identify at least 2,000 different smells. Smells can make us remember things even after many years. However, it is extremely difficult to describe a smell, and many people will disagree on how something smells and even how strong a smell is.

Hearing: Humans can hear sounds from 20 to 20,000 hertz. However many animals have much better hearing. For example, cats can hear from 100 to 60,000 hertz, and dolphins can hear from 75 to 150,000 hertz.

Touch: Our sense of touch is very different in different parts of our bodies. For example, we can feel two different things with our fingers even if they are only 2mm away from each other, but on the backs of our bodies things must be at least 70mm away from each other.

Taste: Most people think that there are four flavours, sweet, salty, sour, and bitter. However, there is a fifth flavor that was first discovered in 1907, but wasn't accepted internationally until 1985. That flavor? The *umami*. Because there is no English word for the *umami* flavour, scientists use the Japanese word. Many people think that "hot" or "spicy" is a flavour, but it isn't. The spicy "flavour" of curry or chili peppers is actually pain!

Are five senses enough? If you think about it for a little while, you will realize that we must have more than five senses. In fact, most scientists agree that we have about 21 different senses. We usually don't notice many of them, but they include pain, hunger and thirst, heat and cold, balance, and so on. We also have a sense that tells us where our arms and legs are (called proprioception), and another that tells us how fast they are moving (called kinesthesia). Try this: hold your arm out straight, close your eyes, and touch your nose. You use those two senses to do it. With all these senses working together, we can enjoy the world around us. But because all of us have slightly different senses, we all enjoy unique world as well.

Questions 61–65

Complete the summary below with information from the passage, using **no more than three words** for each blank.

Synesthetes are people who have different senses (61) _____. When the musician in Switzerland hears a musical note, she tastes a flavour. She must be careful when she chooses music because some music (62) _____. A musical interval is the difference (63) _____; for example the first and last sounds in an octave. An octave in music is made of eight notes; for example, A, B, C, D, E, F, G, A. Therefore, we don't have five senses, we have twenty-one. Our senses give us information about ourselves, our world and the relationship between them. Through our senses we can experience life to the full. Humans have two kinds of cell—(64) _____ in their eyes. Most people can identify at least 2,000 different smells and hear sounds from 20 to 20,000 hertz. The other two sense are (65) _____. The incredible thing about our senses is that they are all a little different from person to person. That means that everybody's world is unique.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Write the answers on the **answer sheet**.

66. Zebras are native to Africa's grasslands. The pattern of the stripes is different from one zebra to the next. No two zebras are alike. There had been four main hypotheses about the reasons zebras developed stripes. The first hypothesis is to avoid attack by meat-eating animals. The second hypothesis is that zebras have an easier time recognizing other zebras. The third hypothesis is thermoregulation. This is the ability for a creature to control its body temperature, even when the surrounding temperature is different. The fourth hypothesis is to prevent attacks by flies.

Section B (10 marks)

*Translate the following paragraph into English. Write the answer on the **answer sheet**.*

67. 农历九月初九是传统的重阳节，已有 1700 多年的历史。农历九月，正值秋高气爽，适合赏景观光。所以，一到九月，人们都喜欢登高。登高可以驱除霉运，还意指“晋升高位”，这也是古人为什么很重视这一传统习俗的重要原因。特别受老年人重视的另一个原因是人们认为登高还寓意“登顶长寿”。

Part VI IQ Test (10 marks)

*There are **five** IQ Test questions in this part. Write the answers on the **answer sheet**.*

68. What time is it when an elephant sits on the fence?
69. Suzy goes to a new school. In her class she likes Fred but doesn't like Graham. She likes Ross but doesn't like Anna. She likes Mandy but doesn't like Sandra. She doesn't like Sarah, either. Why?
70. The letters in this square form a simple sequence. Find the one needed to replace the question mark.

J	F	M
J	M	A
J	A	?

71.

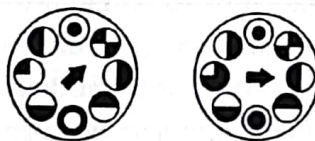

What comes next?

A.

B.

C.

D.

E.

72.

What comes next?

- A. B.
- C. D.
- E. F.

Part VII Error Correction (10 marks)

There are ten errors altogether in the following passage. The errors are: missing words, unnecessary words and wrong words. Please correct them as follows: for a missing word, mark its position with a symbol “^” and write it; for an unnecessary word, cross it out with the symbol “\”; for a wrong word, underline it and write the correct word. An example of how to correct the error is provided below. Write the answers on the **answer sheet**.

For example:

One of my favourite writers are Charlotte Brontë . She was born in the early is
 nineteenth century when women had far fewer opportunities ^ they have now. than
 She lived in a small village in Yorkshire and she took great pleasure in walking
 on the moors where near her home. where

Environmentalists and conservationists tell us that
 there are ways that each of us can help to great reduce our 73. _____
 impact on the planet. We can work hard to conserve energy
 and invest with equipment to help us create our own power. 74. _____
 People often say that they want to save the planet,
 but the only way to do this is to take act immediately. 75. _____
 This is really important for individuals to act responsibly and 76. _____
 try to reduce our contribution to greenhouse gases. There are several 77. _____
 ways we can do this. For example, there are mini wind turbine 78. _____
 that we can install easily on our roofs as well as very
 efficiently solar panels that work well all year round to provide 79. _____
 electricity. But if this is all too expensive, there are other
 ways to conserve energy that actually save us money. In cooler

weather, simply keep the heat safely inside by close doors behind us so that the warm doesn't escape. It is absolutely essential that we all take this seriously and do our best to lead more sustainable life.

80. _____
81. _____
82. _____

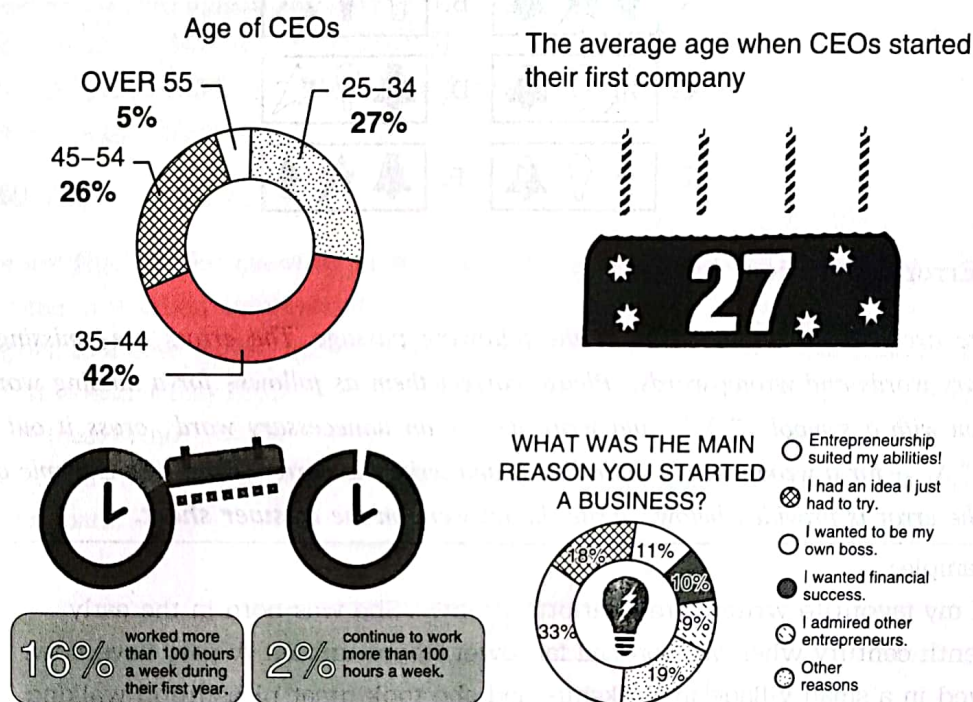

Part VIII Writing (30 marks)

Section A (10 marks)

Read the survey results and write a report of **at least 120 words** on the **answer sheet**.

A survey of 500 CEOs

A survey of CEOs from the top 500 private companies in the United States shows the following results.

Section B (20 marks)

Do you agree or disagree with the following statement?

Some people place a high value on loyalty to the employer. To others, it is perfectly acceptable to change jobs every few years to build a career. Discuss these two positions. Then indicate which position you agree with and why. Use specific reasons and details to support your argument.

Write an article of **at least 180 words** in an appropriate style on the **answer sheet**.
