The Health Dangers Caused by Overuse of Electric Devices

Smart phones, laptops and iPads—today's young people are enjoying the advantage of new technology more than any generation before them. In fact, they have become so glued to these devices that there are now worries about their overuse of them.

These worries are not unfounded. For instance, when they look at their phones constantly, there may appear a forward curve of the upper back. And the problems don't stop there. Staring at the screen for long periods damages the eyesight and causes myopia (or short-sightedness), which can be said to be an epidemic among teenagers. What's more, some young people cannot get their eyes away from the screen when they are eating, waiting for the bus, walking on the road, or even when they are driving a car. Being considered rude is the least of your concerns if you actually do that. Besides, young people are moving their body and exercising less as they are spending so much time with their device, which might lead to various health problems.

Of course it's not practical, or even advisable for them to put these devices away entirely. What's suggested is that they limit, or at least manage their time using these devices.

Section A

1.  I have a question. I'm never quite sure where to sit during a business meeting.

 The ancient Chinese art "Feng Shui" teaches that you should never sit with the door behind you—and actually there's a scientific reason for that. When a person's back is placed towards an open space he becomes stressed; his blood pressure increases and his heart beats faster.

 That makes sense! People subconsciously worry about getting attacked if they don't know what's going on behind them.

B 【解析】 男士询问在商业会议中的选座问题。由画线处的对话可知, 女士告知他: 按照中国的“风水”说, 不该坐在靠门的位置, 并且从科学的角度说明这一位置给人带来的负面影响。因此, 对话是关于“风水”的实际说明。故选 B。

2.  Many famous people discovered important things when they were just sitting silently by themselves...you know the story about Isaac Newton, right?

 Yes. He came up with the theory of gravity while sitting in a field and seeing an apple fall from a tree.

 He probably wouldn't have had time to think about gravity if he was talking on his cell phone. Anyway, I really hope they don't allow cell phones on planes. We need a few last places without cell phones!

4. W Let's get some organic vegetables. My sister Amy says they really do taste better.

M Maybe, but they're also more expensive. I was talking to Jason at work about this. I mean, yeah, he buys organic food, but his salary is also much higher than mine.

W OK, let's do this. We'll get some organic tomatoes, just to give them a try. Then we'll see how we like them and go from there.

B 【解析】女士提出想购买一些有机蔬菜。男士认为有机蔬菜价格过高。女士建议先买一点有机西红柿尝试一下。故选 B。

5. W So how much coffee do you drink, George?

M I drink increasing amounts as I get older, I think. I drink probably five cups a day.

W Do we have to drink it black to appreciate it properly?

M It depends on your taste, I think. True experts would probably drink it black, and I drink it black.

D 【解析】男士告知女士随着年龄的增长,他喝咖啡的数量也增多了。女士问是否应该饮用黑咖啡,男士说咖啡达人们都选择饮用黑咖啡,他自己也喝黑咖啡,所以可以推测出,男士认为自己也是咖啡达人。故选 D。

It's only 3.5%, but if you add that to all we know about aspirin causing internal bleeding, you really need to make sure you're someone who's gonna benefit from being on aspirin.
- W So all the people who're being given aspirin, who take aspirin, think it's for their health, where do you start today, what do you ask your doctor when you are going?
- M Well, I mean, (13) clearly if you have a heart attack or stroke, it can be life-saving. So you need to be on that drug. Then the next thing, if you're at high risk, so to find that out. Did someone in your family have a heart attack or a stroke at an early age, or do you have other risk factors like smoking, high cholesterol, high blood pressure, diabetes? (14) If you have those, your doctor can actually tell you what your risk would be if you were having a heart attack. The bottom line is if you're at low risk, you don't want to be on the drug that can cause problems.

- M That's right. (15) It can cause problems.

Brazilians certainly know how to throw a party—but will Rio be ready to welcome over 10,000 athletes and all the international visitors to the 2016 Olympics? At the moment, some natives of Rio aren't too enthusiastic about the Games. They know they'll be (21) putting up with a lot more roadworks and infrastructure building before the Olympic torch is lit in the Maracana Stadium next August.

Delays in venue construction gave the International Olympic Committee a fright in 2014. The government has since cleaned up its act and was praised recently for being “on the right track”, although the challenge of cleaning up the highly (22) polluted waters of the Rodrigo de Freitas Lagoon and Guanabara Bay—venues for the (23) sailing and rowing competitions—remains.

Fortunately, Brazil has learnt a lot from hosting the World Cup in 2014. Some businesses realized they were missing a trick by not communicating well with their international customers. Restaurants now know that using the Internet to (24) translate the menu isn't always a good idea: ‘bife a cavalo’ isn't really ‘horse steak’—it's beef with (25) a fried egg on top!

Security was a key challenge in 2014—and during the Olympics, the police will be working hard to prevent (26) street crime. As with other developing countries, crime rates are high, and visitors will be encouraged to keep their wits about them so as to (27) avoid falling victim to pickpockets or muggers.

So while the Cariocas are already becoming athletes—by jumping and running across construction sites on their daily commute—they know that the Games have the potential to be (28) a great spectacle, they will be able to let their hair down, and international visitors will have a good time in their company.

Even those Brazilians who (29) have their reservations know deep down something that others don't. An old local saying goes: ‘Deus é Brasileiro’ (‘God is Brazilian’). They hope he will give them a hand to make the Games a success. And you can be sure that whatever happens—or doesn't happen—Brazilians will show the world why they have (30) such a reputation as party people!

Book Review

The book I recently read, *The Time Traveler's Wife*, is written by an American writer Audrey Niffenegger. It tells an unusual story. A librarian, Henry, has a special talent—travel through time. When he was 28, he met his wife Clare for the first time. But Clare told him she has already knew him since she was 6. The beginning of the story is full of happiness, but not the ending. Henry died in an accident during a time travel, while his wife Clare kept waiting for him all her life, because she was told that she would see him again when she was 80.

Apparently, it is a heartbroken story. He always disappeared at any time any place. She was always alone, kept waiting, worrying about her husband. Nevertheless, it is a romantic love story too. Because she grew up with the company of the man she loved, who taught, protect, and loved her.

I have a faith that you will love this book like I do, since you'll find out what is love about in it.

Each age has its own art form. Imagine that: on Saturday morning, grandfather is enjoying the Moonlight Sonata, while his grandson turns the radio up to the max listening rock music. It's not something we expected, but it happens sometimes around us, or in our family.

Some believed that the traditional art forms like classic music, painting, theatre, etc. will sooner or later be abandoned by the young people and inevitably replaced by new art forms better suited to our age. It seems that they are telling the truth.

In ancient China, Shadow Puppets used to be one of the most popular forms of entertainment, especially for children. When there's festival, wedding, or harvest, the troupe would set a platform to perform a wonderful play with colorful exquisite props. Sometimes the performance would last more than ten days or half month. But it's hard to see this kind of traditional performance now. Nowadays, People prefer to go to cinema or watch television in their homes. Shadow Puppets, along with many other traditional art forms were kept in Museum.
