W: Well, in his claim, the lawyers stated that the cigars were lost in a series of small fires.

M: What?

W: And so the company had to pay the claim.

M: No, you're kidding.

W: But that's not all. So the insurance company accepted the decision and wrote the guy a check for \$15,000. But here's the best part. After he cashed the check, the guy was arrested. W: (10) While he was sentenced to 24 months in jail and a \$24,000 fine. Isn't that great?

- M:** Welcome to our modern world. (11) On our show today, we're talking to Rachel Kim about the power of persuasion. All around us, there are advertisements trying to make us believe something, or persuading us to buy something. Fear not, however. Rachel is here to reveal their secrets and show us how to resist all this persuasion. Hi, Rachel. Persuading people is big business, isn't it? I mean supermarkets and politicians, advertisers, and salespeople. They all take it very seriously, don't they?
- W:** (12) Yes, they spend a lot of money coming up with psychological tricks to guarantee that even the most cautious among us are open to manipulation.
- M:** Let's talk about supermarkets. How do they make us buy things we don't necessarily want to buy?
- W:** (13) Well, their first trick is to try to relax us by playing music, and by pumping the smell of freshly-baked bread into the store. Research has shown us that the smell of fresh bread makes people buy more.

- W:** Well, there's so much of it. These days, ads are everywhere from TV shows to websites to our cell phones. And no matter how much we think we know about what the advertisers are doing, they still end up winning. Generally, we still fall for the ad and end up buying the product, which more often than not is something we don't need.
- M:** Yes.
- W:** (14) When you get down to it, there are really only 2 types of ads—those that appeal to the thinking part of our brain and those that appeal to the emotional part. (15) Generally ads that appeal to our emotions are usually much more successful. These emotional ads are often based on psychological theories about the mind. SECTION D

21. **incomplete circles**

22. **mysterious stone formation**

23. **appear to**

24. **capture the sunset**

25. **most similar to**

Laser technology has aided scientists with their knowledge of Stonehenge, the stone monument near the city of Salisbury, England. Most of the stones at Stonehenge stand in (21) incomplete circles. One of the largest stones weighs about 40 thousand kilograms. Some stones are more than seven metres high. Others lie broken on the ground. The (22) mysterious stone formation has stood on the flat, windy Salisbury Plain for perhaps five thousand years. But the organization English Heritage used modern technology to solve some of that mystery.

Recently, researchers working for English Heritage reported what they found after directing lasers at some of the stones. The lasers showed bright gray-white surfaces under material collected on the stones over the ages. And the intense light seemingly identified an ancient secret. The uncovered surfaces (23) appear to have been cut and shaped with a clear purpose. The researchers say the designers of Stonehenge wanted to improve the ability to see sunlight through the circles twice each year.

Some people believe the designers of Stonehenge wanted to make the best showing possible of sunlight on the longest day of the year. That day is known as the summer solstice. The designers also may have shaped stones to (24) capture the sunset on the shortest day of the year—the winter solstice. The effect of the light passing through spaces between the stones has brought many people to the monument on those special days. Sometimes, clouds cover the sun, but people come anyway. Researchers say Stonehenge's ancient "architects" placed importance on what people would see from the northeast of the monument. It is thought that travellers came toward the stone circle in that direction on a path from the Avon River. The pathway is one of Stonehenge's two avenues. The stones on the northeast side are the biggest and the (25) most similar to each other on the monument. The southwestern part has smaller stones. The smaller ones are less alike and have not been improved like the others.

30. set up controls

A disease that threatens the world's most popular fruit, the banana, has arrived in Latin America. As a result, officials in Columbia have declared a state of emergency. (26) Bananas are among the most important food crops in the world, along with wheat, rice, and corn. That information comes from the United Nations (UN). Five years ago, the UN warned that a disease called Tropical Race 4 or TR4, could destroy much of the world's banana crop.

The disease first appeared in Asia in the 1990s. It later spread to Africa and the Middle East. There are as many as 1,000 kinds of bananas grown in more than 150 countries. (27) The TR4 disease only affects the most popular and common kind of banana—the Cavendish. It is easier and more cost-effective for growers to produce just one kind of banana. Growers in Colombia and many other places choose Cavendish bananas. (28) This variety can be shipped to countries around the world without ripening too quickly. Banana industry watchers say there is still time to find another kind of banana to grow. Randy Ploetz is a retired scientist from the University of Florida. He studied tropical plant diseases. He said of the recent spread of TR4, “I don't think it's going to impact the availability of the Cavendish in supermarkets anytime soon.” (29) He added that Asian countries affected by the TR1 disease plant different kinds of Cavendish or move to uninfected farmlands. But those bananas are not as productive, and they later become infected, too. In Colombia, officials are taking special measures to stop the disease from spreading. Officials have removed plants infected with the disease and covered soil with black plastic sheets, to prevent spread of the disease.

(30) Officials have also set up controls at entrances to affect banana farms, where they disinfect the trucks that travel between the farms and ports.

Gert Kema is a plant scientist who studies bananas. He agrees that the banana industry needs to diversify. He says there are many types of tomatoes and peppers grown around the world. For example, banana should be no different.

速滑是一项冬季竞技运动，在比赛中运动员使用溜冰鞋在赛道上控制方向，在冰道上相互竞争。速滑有三种主要变体——长道速滑、短道速滑和马拉松速滑。在奥运会上，“Speed Skating”是用来描述长道类别的术语，而短道速滑则缩写为“Short Track”。

速滑是在 19 世纪的某个时候发展起来的，虽然其确切的起源经常引起争论，但第一个竞争性赛事可以追溯到 1863 年的挪威。它从一开始就是冬季奥运会的一部分，1924 年举行了四场独立的男子比赛。自 1960 年以来，还引入了许多女子活动，以及近年来的团队追逐活动。

荷兰在奥运会上获得了最多的速滑奖牌，美国和挪威也取得了成功。美国的埃里克·海登(Eric Heiden)和芬兰的克拉斯·桑伯格(Clas Thunberg)是奥运会上个人荣誉最多的速度滑冰运动员，每人获得了五枚金牌。速滑是一项竞技运动，因此主要目标是在尽可能最短的时间内完成每条赛道。每次两名运动员一起竞争，每人一条赛道。在比赛期间，运动员到达一个特定的点，在那里他们交换赛道，以确保他们彼此覆盖的距离相同。如果一场比赛是并驾齐驱的，而两个参赛者在角落相遇，那么占据内道、运动员必须向外道的对手提供通行权。首先到达终点线的运动员被宣布为获胜者。在速滑比赛中，通常两名运动员一起竞争。每个参与者都必须佩戴特定的装备。运动员需要特制的运动服，这些运动服不仅要在冰上提供保护，还要让他们能够在赛道上高速滑冰。为了应对低空气阻力，这些运动服在设计上通常是紧身的，且根据每个运动员的特定体型量身定制。它们还包含凯芙拉合成纤维以增加保

护。运动员在比赛期间还戴着头盔、护颈镜、护目镜和脚踝盾牌以及他们的运动服，在摔倒时提供额外的保护层。

长道速滑和短道速滑使用的具体装备略有不同，在长道速滑中大多数主要的防护物品都不需要。

【全文翻译】

许多人害怕失败，即使有机会成功，他们也试图避免失败。我们保护自己如何重视自己的一种方式相信自己的能力，并说服别人相信它。因此，如果许多人认为自己可能会失败，他们就不会尝试。改变我们的观点，让失败是一件好事，并没有什么可担心的，这可能是打开人生成功机会的关键。

失败是每个人生活的一个方面。然而，当我们想到经历失败时，我们不应该认为自己是失败者。当事情出错时，人们经常感到羞耻或尴尬，但失败实际上给了我们倾斜、适应和改进的机会。当公司发现某个产品不受欢迎、表现不佳时，他们通常会借此机会改进这个产品，这样做可以让它们作为企业变得更加成功。人们也可以把自己的糟糕经历看作是学习和提高的机会。例如，如果某人在求职面试中表现不佳，他们可以了解以下哪里出了问题，从而在下一次面试中做得更好。事实上，近乎胜利可以让人们更加坚定地在未来取得成功。这会给我们一种几乎成功的感觉，让我们在下次尝试时更加坚定地要成功。

激情也是成功的重要组成部分。当人们不断地对你的想法说“不”时，享受你所做的事情可以推动你继续前进。你有动力继续尝试，因为你这样做是为了你自己或你相信的东西，比如慈善机构。有些人将成功与名声和赚钱等想法联系起来。虽然这些是衡量你成功的方法，但还有许多其他方法，比如你的成就让你有多快乐。因为你正在做自己喜欢的事情或支持别人而感觉良好，也可以是衡量自己成功的一种方式，即使别人不承认你的成就。

人们不仅需要激情才能成功，还需要不断尝试——不放弃的能力至关重要。人们可以聪明、有才华或者有很多常识，但因为成功需要时间，而有时人们在达到目标之前就放弃了。在某些职业中，例如在电影行业工作，您需要快速习惯人们说“不”。史蒂文·斯皮尔伯格(Steven Spielberg)未能进入大学学习电影，并且被拒绝了不止一次。然而他后来成为了有史以来最成功的电影导演之一。每一次失败的尝试都很困难，但如果我们以正确的方式做出反应，每一次尝试都可以使我们变得更强大。不放弃和继续前进的能力是几乎所有成功人士个性的一部分。

无论你是想成为一名作家、商人还是音乐家，成功都意味着你必须应对很多失败。很多人认为失败是缺乏能力，但可以说它应该被视为迈向成功的一步。

【解析】根据问题定位至倒数第二段第三句“The effect of overfishing on coral reefs areas can lead to fewer important reef species in many locations.”，即过度捕捞对珊瑚礁地区的影响可能导致许多地方的重要珊瑚礁物种减少。

【全文翻译】

珊瑚礁，有时被称为海洋雨林，虽然仅占海底的0.1%，但它们是世界上鱼类的家园。珊瑚礁生长在热带水域。最大的珊瑚礁是澳大利亚的大堡礁，距离昆士兰州海岸超过1200英里。珊瑚礁不仅对食物很重要，而且对旅游业也很有价值。例如，佛罗里达州的珊瑚礁每年在旅游业中价值约63亿美元。不幸的是，人类活动增加所引发的后果正在破坏世界各地的珊瑚礁。

旅游业对珊瑚礁产生了影响，但它往往与更广泛的问题有关。在加勒比地区，旅游业与海滩和海洋相连，可以产生许多影响。浮潜和潜水等活动以及船只漏油可能会损坏珊瑚礁。

但与建设度假村和港口相比，这种影响很小。在一些地区，酒店的大部分废物和脏水也直接进入沿海水域。这使得藻类生长得更快，从而破坏珊瑚。

珊瑚礁需要干净、清澈的水才能生存。然而，随着沿海地区的发展，从旅游业到其他传统行业，珊瑚礁在很多方面都受到破坏。将污染物排放到水中意味着它们覆盖了珊瑚礁。这会使藻类等有害植物生长得更快、水质更低。污染还会增加疾病的风险、减缓珊瑚生长。这种污染可能来自数千英里之外。例如，来自墨西哥的污染会影响佛罗里达州的珊瑚礁。

在更广泛的范围内，全球变暖和海洋温度正在影响整个世界海洋里的，特别是珊瑚礁里的野生动植物。由于气候变化，海洋温度一直在上升，预计还会继续上升。增加的二氧化碳正在被海洋吸收。这提高了海洋中的酸水平、温度和海平面，可能导致珊瑚白化。由于珊瑚礁为其他动物提供食物，这会影响整个生态系统。

珊瑚礁为捕鱼提供了广泛的机会，因此为超过十亿人提供了食物。这意味着它们还支持许多社区的经济。过度捕捞对珊瑚礁地区的影响可能导致许多地方的重要珊瑚礁物种减少。然后，这些问题会影响整个环境和依赖这些鱼类的当地企业。人口增加和粮食需求增加意味着许多地区已经因过度捕捞而受到破坏或完全破坏。

不幸的是，针对这样一个问题并没有一个简单的解决方案，因为它与保护整个世界环境有关。每一个积极的变化，从减少用水、骑自行车而不是开车，到种植树木和负责任地扔掉垃圾，可以说有助于保护世界上一些最美丽的生态系统。

【全文翻译】

电影可能是当今最流行的娱乐形式。今天的全长电影始于19世纪晚期卢米埃尔兄弟在法国开发的短片。然而，世界上第一部长篇电影《凯利帮的故事》来自澳大利亚。这部无声电影展示了臭名昭著的罪犯内德·凯利的生活，于1906年12月26日在墨尔本市政厅上映。这部电影时长一个多小时。

电影业从其卑微的开始到现在已经走过了漫长的道路，如今制作和宣传电影花费了数百万美元。一些有史以来最昂贵的电影包括《终结者3：机器的崛起》《泰坦尼克号》和《指环王》三部曲。相比之下，有史以来最昂贵的宝莱坞电影《德夫达斯》仅花费了1000万美元。

然而，当你将一部老电影的成本与制作时的性价比进行比较时，《埃及艳后》仍然是有史以来最昂贵的电影。伊丽莎白·泰勒在这部1963年拍摄的电影中扮演克利奥帕特拉。这部电影之所以花这么多钱，原因之一在于泰勒在电影中有65套不同且非常昂贵的服装。如果今天制作这部电影，至少要花费2.75亿美元才能拍摄。

然而，有些人认为有一部电影打破了这一纪录。《全人类》是一部关于美国宇航局九次阿波罗太空任务的纪录片，是根据美国宇航局几年来在宇宙飞船上拍摄的一部电影制作的。如果考虑到宇宙飞船的成本，这部电影的制作成本就高达数十亿美元！

1990年代制作的大多数好莱坞电影的平均预算超过5000万美元，且仍在继续攀升。通常，电影本身无法仅靠票房销售赚到足够的钱来支付制作成本，制片厂依靠与电影相关的商品推销和售卖来帮助弥补票房不佳。例如，电影《星球大战》在票房销售方面取得了巨大成功，在发行后，从与《星球大战》系列相关的玩具和其他商品销售中获得了超过25亿美元的收入。

好莱坞制片厂发现的问题是，随着电影预算的增加，观众期望越来越精彩的特效，所有这些都花费了越来越多的钱。“你必须把观众带进电影院，除非你能向他们展示他们以前从未见过的东西，否则他们不会进入电影院，”三部《黑客帝国》电影的制片人乔·西尔弗(Joe Silver)说。“你必须让他们惊叹不已。”随着观众认为昂贵的特效是理所当然的，因此似乎就目前而言，大预算电影将继续存在。

A well-built VR educational system can accommodate all learning stages while helping students benefit more from the learning experiences.

cultures. High context cultures assign a lot of importance to the environment surrounding ^ message. Some cultures usually put into this category including the Han Chinese

This chart shows us the change in the number of institutions engaged in intellectual property services in China. There is no doubt that this number has gradually increased from 37,000 in 2015 to 73,000 in 2020.

From my perspective, the gradual enhancement of the national awareness of intellectual property has contributed a lot, which has led the introduction of a lot of incentive policies, providing an opportunity for the development of this industry and promoting the construction of intellectual property. However, we can also find that the growth rate has slowed down in recent years, which may be due to the increasing competition caused by similar institutions in the market.

In short, for the future development of the industry, not only our government needs to pay more attention to intellectual property, but also major institutions should improve their service level in the continuous competition to bring more protection to intellectual property.

As we all know, with the development of technology and economy, online shopping has become more and more popular, especially among young people. In order to increase sales, merchants have developed a variety of promotional plans in the major holidays. Nowadays, Singles' Day has been the biggest shopping festival.

Like most people, I'm a Singles' Day shopper. But when it comes to shopping, I'm more inclined to consume rationally. Some people may choose to buy whatever she wants whether it is expensive or cheap, while others may buy something cheap because they want to save money. However, in my opinion, cost performance is one of the most important factors. For one thing, once I find that what I want is expensive and impractical, I am less likely to spend money on it; For another, I will not pay for something cheap but of poor quality, either.

As a rational consumer, I recommend that you should take into account your actual economic situation while shopping, and do not blindly buy something you don't need, which can not also help you save money but also help save social resources.
