

2022 年(上半年)全国大学生英语竞赛 C 类初赛试题

2022 National English Competition for College Students

(Type C—Preliminary)

(Total: 150 marks Time: 120 minutes)

Part I Listening Comprehension (30 marks)

Section A (5 marks)

In this section, you will hear five short conversations. Each conversation will be read only once. At the end of each conversation, one question will be asked, and you have fifteen seconds to read the four choices marked A, B, C and D, and decide which is the best answer. Then mark the corresponding letter on the answer sheet with a single line through the centre.

扫码播放

1. A. Her prepared report was rejected.
B. Their proposal was turned down.
C. She felt sick during the meeting.
D. People can't reach an agreement.
2. A. He has problems understanding lectures.
B. He doesn't like his professor's teaching style.
C. He is unhappy with the lecture arrangement.
D. He is dissatisfied with the fixed timetables.
3. A. A coffee shop.
B. A missing fox.
C. The main gate of the university.
D. The university shuttle bus.
4. A. She has to work extra hours every day.
B. She can't get enough sleep.
C. She has too many things to worry about.
D. She suffers from heart disease.
5. A. He may set up his own business.
B. He may be punished for his fault.
C. He may obtain a promotion.
D. He may have to quit his job.

Section B (10 marks)

In this section, you will hear two long conversations. Each conversation will be read only once. At

the end of each conversation, there will be a one-minute pause.

Conversation One

Listen to the conversation. Then read the four choices marked A, B, C and D, and decide which is the best answer according to what you hear. Then mark the corresponding letter on the answer sheet with a single line through the centre.

6. Where did the story take place?
 - A. In Havana, Cuba.
 - B. In northern Canada.
 - C. In southern America.
 - D. In Central Mexico.
7. Why did the lawyer insure the cigars?
 - A. They were rare and expensive.
 - B. They were the only box left.
 - C. He wanted to save them.
 - D. He did that in case of loss.
8. What happened to the lawyer's cigars?
 - A. He sold them.
 - B. He concealed them.
 - C. He lost them.
 - D. He smoked them.
9. Why did the lawyer sue the insurance company?
 - A. The company has charged too much for his cigars.
 - B. The insurance company failed to observe the contract.
 - C. He found the insurance policy unacceptable.
 - D. He wanted the company to pay for his smoked cigars.
10. What happened to the lawyer in the end?
 - A. He accepted a new box of cigars.
 - B. He got punished according to law.
 - C. He was put on the local black list.
 - D. He gained less than he asked for.

Conversation Two

Listen to the conversation, and complete the following sentences with one word according to what you hear. Then write the answers on the answer sheet.

11. The topic of the programme today is about the power of _____ and Rachel is invited to reveal the secrets of it.
12. According to Rachel, supermarkets and politicians, advertisers and salespeople spend lots of money coming up with psychological tricks to _____ that people are open to manipulation.
13. For supermarkets playing music and pumping the smell of freshly-baked bread into the store are good ways to _____ customers.
14. As Rachel revealed, there are two types of advertisements: those that appeal to the thinking part of our brain and those that appeal to the _____ part.
15. The more successful advertisements are often based on psychological theories about the _____.

Section C (5 marks)

In this section, you will hear five short news items. Each item will be read only once. After each item, there will be a fifteen-second pause. During the pause, read the question and the four choices

marked **A**, **B**, **C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

16. What is the researchers' main goal of sailing to the Thwaites glacier?
- A. To find the glacier's exact location.
 - B. To enjoy Thwaites glacier's matchless beauty.
 - C. To explore the easiest route to reach it.
 - D. To study how global warming affects the sea levels.
17. Why does the news item say Omicron is "pulling the fire alarm"?
- A. It warns that new versions of coronavirus keep appearing.
 - B. It reminds people that COVID-19 should be taken seriously.
 - C. It calls for the production of more COVID-19 vaccines.
 - D. It urges people to take COVID-19 vaccines in time.
18. What remains an obstacle in developing battery-run four-legged robots?
- A. Their capacity of carrying heavy loads.
 - B. The speed they travel on a difficult terrain.
 - C. Their huge power consumption.
 - D. The coordination of their four legs.
19. What is the current situation talked about in the news?
- A. With the spread of coronavirus, more people are losing jobs.
 - B. Shortages in labor and supplies have led to higher food prices.
 - C. Severe inflation has been reported by many banks in Europe.
 - D. Higher food prices are stimulating global economic recovery.
20. What may happen in New Zealand 65 years after the law concerning smoking takes effect?
- A. Smoking may be completely prohibited.
 - B. Smokers aged 14 and younger may be put in jail.
 - C. Only people aged 80 and older can smoke.
 - D. Fewer than 5% of people will still be smoking.

Section D (10 marks)

*In this section, you will hear two short passages. The passages will be read only **once**. After each passage, there will be a **one-minute** pause.*

Dictation

*Listen to the passage and fill in the blanks with **the exact words or phrases** you hear. Write the answers on the **answer sheet**.*

Laser technology has aided scientists with their knowledge of Stonehenge, the stone monument near the city of Salisbury, England. Most of the stones at Stonehenge stand in 21. _____. One of the largest stones weighs about 40 thousand kilograms. Some stones are more than seven meters high. Others lie broken on the ground. The 22. _____ has stood on the flat, windy Salisbury

Plain for perhaps five thousand years. But the organization English Heritage used modern technology to solve some of that mystery.

Recently, researchers working for English Heritage reported what they found after directing lasers at some of the stones. The lasers showed bright gray-white surfaces under material collected on the stones over the ages. And the intense light seemingly identified an ancient secret. The uncovered surfaces 23. _____ have been cut and shaped with a clear purpose. The researchers say the designers of Stonehenge wanted to improve the ability to see sunlight through the circles twice each year.

Some people believe the designers of Stonehenge wanted to make the best showing possible of sunlight on the longest day of the year. That day is known as the summer solstice. The designers also may have shaped stones to 24. _____ on the shortest day of the year—the winter solstice. The effect of the light passing through spaces between the stones has brought many people to the monument on those special days. Sometimes clouds cover the sun, but people come anyway. Researchers say Stonehenge's ancient "architects" placed importance on what people could see from northeast of the monument. It is thought that travelers came toward the stone circle in that direction on a path from the Avon River. The pathway is one of Stonehenge's two avenues. The stones on the northeast side are the biggest and the 25. _____ each other on the monument. The southwestern part has smaller stones. The smaller ones are less alike and have not been improved like the others.

Summary

*Listen to the passage and complete the note using **not more than three words** for each blank according to what you hear. Write the answers on the **answer sheet**.*

Four most important food crops (UN): banana, 26. _____, rice and corn

Tropical Race 4, a disease appeared → it affects the most popular banana, the Cavendish which is easier and 27. _____ for banana growers to produce → also can be exported without 28. _____ → experts' suggestion: plant different kinds of Cavendish or move to 29. _____; diversify the banana industry → officials' countermeasures: remove infected plants; cover the soil with black sheets; 30. _____ at entrances.

Part II Vocabulary & Grammar (15 marks)

*There are 15 incomplete sentences in this part. For each blank there are **four** choices marked **A, B, C and D**. Choose the one that best completes the sentence. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

31. His father told him that he couldn't hope to catch a big fish _____ a small rod like that, but he insisted _____ trying.

- A. by; about B. by; on C. with; on D. with; with

32. He suddenly saw Karen _____ the street. He pushed his way _____ the crowd of people to get to her.
A. across; across B. across; through
C. over; along D. over; through
33. My grandparents have lived near the railway station for so long that they've grown _____ to the noise of the trains.
A. accustomed B. aware C. familiar D. unconscious
34. The engineer says the working of the new type of machine _____ that of the human brain.
A. compromises with B. competes with
C. contrasts to D. corresponds to
35. When he could afford it, Jeffery used to _____ half a chicken and salad with white wine.
A. eat up B. drop off C. take over D. pick up
36. The two neighboring countries have long been _____ for generations due to religious differences.
A. under attack B. on bad terms C. out of line D. in sharp contrast
37. Jack felt really embarrassed about the way he had behaved toward Rose so he decided to _____ her for a few days.
A. get rid of B. back away from
C. run up against D. steer clear of
38. Many _____ prefer to use the word "Ms" instead of "Miss" or "Mrs" before their names in business correspondence.
A. woman managers B. woman staff
C. women managers D. men staff
39. Following the flood, _____ in the disaster-affected area _____ major repair work.
A. each of building; needs B. each building; need
C. every building; need D. every building; needs
40. _____, a man who can express himself effectively has a higher possibility of success than a man who has a poor command of language.
A. Other things being equal B. Other things to be equal
C. Were other things equal D. Equal with other things
41. The corrupt official was _____ neglecting his duty.
A. accused of B. admitted to C. deprived of D. dedicated to
42. We have been warned that _____ may we use the telephone in the office for personal affairs.
A. by all means B. in exceptional cases
C. under no circumstances D. with permission
43. Being a celebrity or a pop star can be quite a hard life, with a lot of travelling _____ heavy schedules.

A. in spite of B. in terms of C. owing to D. according to

44. —What do you think is the most important thing for success? It must be high IQ.

—_____ I believe patience and motivation are more important than IQ.

—That makes sense.

A. It's none of your business.

B. Well, I think otherwise.

C. Yeah, that's just what I was thinking.

D. That makes a big difference.

45. —Do you have any particular gift in mind for the coming Mother's Day?

—_____

A. I'm afraid I can't.

B. She will be very happy.

C. My mother likes receiving gifts.

D. I'm going to buy some flowers.

Part III Cloze (10 marks)

Read the following passage and fill in each blank with **one** word in one of the following **three** ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the **answer sheet**.

Speed Skating is a winter racing sport where athletes compete against one another on an ice-based circuit, using skates to navigate their way around the track. There are three main 46. _____ (vary) of speed skating—Long Track Speed Skating, Short Track Speed Skating, and Marathon Speed Skating. In the Olympics, “Speed Skating” is the term used to describe the Long Track category, 47. **wh** _____ Short Track Speed Skating is abbreviated to “Short Track”.

Speed Skating was developed at some point during the 19th Century, and whilst its precise origins are routinely debated, the first 48. _____ (compete) events can be traced back to Norway in 1863. It has been a part of the Winter Olympics from the very beginning, 49. _____ four separate men's events held in 1924. Since 1960, a number of women's events have been introduced, as well as Team Pursuit events in

recent years.

The Netherlands has 50. **col** _____ the most Olympic Speed Skating medals overall, with the USA and Norway also experiencing success. Eric Heiden of America and Clas Thunberg of Finland are the most individually decorated Speed Skaters at the Olympics with five gold medals each.

Speed Skating is a racing sport, so the primary aim is to complete each circuit in the shortest time 51. p _____. Athletes compete in races two at a time, with a lane reserved for each. During the race, athletes reach a specific point where they swap lanes to ensure they cover the same amount of 52. _____ (distant) as one another. If a race is neck and neck and both competitors meet on a corner, the athlete occupying the inner lane must offer right of way to the rival on the outside. The athlete that reaches the finish line first is declared the winner. In a Speed Skating race, players ordinarily race around the circuit two at a time. Every 53. par _____ is required to wear specific equipment. Athletes require specially made suits that not only offer protection on the ice but also enable them to skate around the track at high speeds. For low air resistance, these suits are usually skin-tight in design and are tailored to each individual athlete's specific body shape. They also contain Kevlar for added protection. Athletes also 54. w _____ helmets, neck guards, goggles, and ankle shields during racing as well as their suits, which offer added layers of protection in the event of a fall.

The specific equipment used in Long Track and Short Track differs slightly, with most of the main 55. _____ (protect) items not required in Long Track.

Part IV Reading Comprehension (30 marks)

There are three passages in this part. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the answer sheet.

Section A (10 marks)

Questions 56—60 are based on the following passage.

Many people fear failure and try to avoid it even when they have the opportunity to succeed. One way that we protect how we value ourselves is by believing in our own ability and by convincing others of it as well. 56. _____ Altering our view so that failure is fine and nothing to worry about could be the key to opening opportunities to be successful in life.

Failure is an aspect of everyone's life. 57. _____ People often feel ashamed or embarrassed when things go wrong, but failure actually gives us the chance to learn, adapt, and improve. When companies find that a product is unpopular and not doing well, they often take the opportunity to improve the product, and doing so can make them more successful as a business. People can also look at their own bad experiences as an opportunity to learn and improve. For example, if someone does badly in a job interview, they can learn what went wrong and do better in the next one. In fact, nearly winning can make people much more determined to succeed in the future. It gives us a feeling of nearly being successful and makes us much more determined to succeed next time we try.

58. _____ When people constantly say no to your ideas, enjoying what you do can push you

forward to continue. You are motivated to keep trying because you are doing it for yourself or something you believe in, like a charity. Some people connect success to ideas such as fame and making money. While these are ways to measure your success, there are also many other ways such as how happy your achievements make you. Feeling good because you are doing something you love or are supporting others can be one way of viewing your own success, even when others don't recognize your achievements.

Not only do people need passion to succeed, they also need to keep trying—the ability not to give up is essential. People can be intelligent, talented, or have a lot of common sense but because success takes time, sometimes people give up before they reach their goals. 59. _____. Steven Spielberg famously failed to get into college to study movies and was rejected more than once. He then went on to become one of the most successful movie directors of all time. Every failed attempt is difficult, but each one can make us stronger if we react in the right way. The ability not to give up and keep going is part of nearly all successful people's personalities.

60. _____. Lots of people see this as a lack of ability, but arguably it should just be seen as a step towards success.

Questions 56—60

Choose from the sentences A—G the one which best fits each gap of 56—60. There are **two extra sentences** which you do not need to use.

- A. Passion is also a vital part of being successful.
- B. As a result, many people won't attempt something if they think they might fail.
- C. Whether you want to be a writer, a business person, or a musician, being successful will mean you have to deal with a lot of failures.
- D. However, when we think of experiencing failure we shouldn't think of ourselves as a failure.
- E. It is important that changes work for everybody as success means different things to different people.
- F. In some professions, such as working in movies, you need to quickly get used to people saying no.
- G. Unfortunately, fame and fortune are not always good for everyone.

Section B (10 marks)

Questions 61—65 are based on the following passage.

Coral reefs, sometimes called rainforests of the sea, make up only 0.1% of the ocean floor, but they are home of the world's fish. Reefs grow in tropical waters. The largest is Australia's Great Barrier Reef, which is over 1,200 miles long off the Queensland coast. Reefs are not only important for food; they are also valuable for tourism. For example, Florida's reef is worth about \$6.3 billion every year in tourism. Unfortunately, the consequences of increased human activity are damaging reefs around the world.

Tourism has had an effect on coral reefs but it is often connected with a wider range of issues. In areas such as the Caribbean, where tourism is connected with the beaches and the sea, tourism can have a number of effects. Activities like snorkeling and diving, as well as oil spills from boats, can damage reefs. But this effect is quite small compared to the effect of building resorts and ports. In some areas, a large percentage of the waste and dirty water from hotels also goes into coastal waters directly. This allows algae to grow faster and damage the

coral.

Coral reefs need clean, clear water to live. However, with developments along the coast, from the tourist industry to other traditional trades, reefs are damaged in a lot of ways. Disposal of pollutants into the water means they cover coral reefs. This can make harmful plants, such as algae, grow faster and lower water quality. Pollution can also increase the risk of disease and slow coral growth. This pollution can come from thousands of miles away. For instance, pollution from Mexico can affect the reefs in Florida.

On an even wider scale, global warming and sea temperatures are affecting wildlife throughout the world's oceans and in particular coral reefs. Due to climate change, ocean temperatures have been increasing and they are forecast to continue to increase. The increased carbon dioxide is being taken in by the sea. This has raised the levels of acid in the sea, the temperature, and sea levels, which can result in coral bleaching. Since coral reefs provide food for other animals, this then affects the entire ecosystem.

Coral reefs provide wide opportunities for fishing and so offer food for over a billion people. This means they also support the economy of many communities. The effect of overfishing on coral reefs areas can lead to fewer important reef species in many locations. Such problems can then affect the whole environment and local businesses, which rely on those fish. A bigger population and the increased demand for food has meant many areas have been damaged or destroyed completely by overfishing.

Unfortunately, there is not one easy solution to such a problem as it is connected to protecting the world's environment as a whole. Every positive change, from using less water and riding a bike instead of driving a car, to planting trees and throwing your trash away responsibly, can arguably help to protect some of the most beautiful ecosystems in the world.

Questions 61—65

Answer the following questions briefly according to the passage.

61. How do coral reefs influence human life?
62. Which is worse for coral reefs—snorkeling and diving or building resorts and ports?

63. What kind of water is ideal for the growth of coral reefs?
64. What plants are most harmful to the growth of coral reefs?
65. What has caused the decrease of important reef species in many locations?

Section C (10 marks)

Questions 66 to 70 are based on the following passage.

Movies are probably the most popular form of entertainment today. Today's full-length movies began with short motion pictures developed in France in the late 1800s by the Lumière brothers. However, the world's first full-length film, *The Story of the Kelly Gang*, came from Australia. This silent film, which showed the life of the notorious criminal Ned Kelly, opened at the Melbourne Town Hall on December 26, 1906. It was over an hour long.

The film industry has come a long way from its humble beginning, and today millions of dollars are spent producing and advertising movies. Some of the most expensive movies ever produced include *Terminator 3: Rise of the Machines*, *Titanic*, and the *Lord of the Rings* trilogy. In comparison, the most expensive Bollywood film ever made, *Devdas*, cost only \$10 million to make.

However, when you compare the cost of an older movie with the value of money at the time it was made, *Cleopatra* remains the most expensive movie ever made. Elizabeth Taylor played Cleopatra in this film made in 1963. One of the reasons why this movie cost so much money was because Ms. Taylor had 65 different and very expensive costumes in the movie. This movie, if made today, would cost a minimum of \$275 million to shoot.

Some people, however, think that one film beats this record. *For All Mankind*, a documentary about NASA's nine Apollo space missions, was produced from a film taken by NASA aboard its spaceships over several years. If the cost of the spaceships is taken into account, the film cost billions of dollars to make!

The average budget of most Hollywood movies produced in the 1990s was over \$50 million, and movie budgets are still continuing to climb. Often, the movie itself cannot make enough money from ticket sales alone to cover the cost of production, and the studio relies on merchandising and selling products related to the movie to help make up for poor box office. For example, the film *Star Wars*, which was a huge success in terms of box office sales, has gone on to make more than \$2.5 billion after its release from toys and other merchandising connected to the *Star Wars* series.

The problem that Hollywood studios are finding is that as film budgets increase, audiences expect more and more spectacular special effects, all of which cost increasing amounts of money. "You have to drive the audience into the theater, and they won't be driven into the theater unless you can show them something they haven't seen before," says Joe Silver, the producer of the three *Matrix* films. "You have to wow them." With audiences taking expensive special effects for gran-

ted, it seems that for the time being, big budget films are here to stay.

Questions 66—70

Complete the summary below with information from the passage, using *not more than three words* for each blank.

Today's modern movie industry had its 66. _____ with the silent Australian movie *The Story of the Kelly Gang*. Since that time, both the popularity and 67. _____ of movies have grown in incredible amounts. By far, 68. _____ in the United States spend the most, with the average movie in the 1990s costing over \$50 million. Today the cost is even higher because people expect more and more 69. _____. Many films today have to rely on 70. _____ to meet the cost of producing the film.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Remember to write the answers on the answer sheet.

71. Never before have we had so wide a choice, or so regular a supply, of good food. Refrigeration, canning, freeze-drying, worldwide trade and fast transport have enabled people in developed countries to get a wide variety of foods all the year round. The fruit in your lunch box may have come from Africa or the Caribbean, and the cheese in your sandwich from New Zealand. The white rice you eat may have come from China or the United States, and the pasta from Italy, while your breakfast cereals may have come from Canada. Your body needs a variety of foods and a balanced diet if it is to grow and stay healthy.

Section B (10 marks)

Translate the following paragraph into English. Remember to write the answer on the answer sheet.

72. 早在当前危机到来之前, 如何让学习变得有趣就考验着教师。另一个问题是, 如何向学生展示某些用其他方式无法说明的问题。于是虚拟现实(virtual reality)登场, 这是一种可为学生提供沉浸式体验(immersive experience)的技术。VR 让学生一遍又一遍地体验概念、过程和技巧, 直至其掌握该课程。一个完善的 VR 教育系统可以顾及各个学习阶段, 同时帮助学生从学习体验中获益更多。

Part VI IQ Test (10 marks)

There are five IQ Test questions in this part. Write the answers on the answer sheet.

73. What is the odd one out?

- A. double-bass B. guitar C. harp D. mandolin
E. saxophone F. violin

74. Streets are to the town what roads are to the _____.

- A. countryside B. map C. door D. car
E. motorway

75. Find the missing number and letter.

2	4	6	?
A	D	H	?

76. Asked about his children, a man replied, "They are all redheads but two, all brunettes but two, all blondes but two". How many children did he have?

77. Which code matches the pattern given at the end?

- DM BM CJ DK BL
A. B. C. D. E.

Part VII Error Correction (10 marks)

There are 10 errors altogether in the following passage. The errors are: missing words, unnecessary words and wrong words. Please correct them as follows: for a missing word, mark its position with the symbol “^” and write it; for an unnecessary word, cross it out with the symbol “\”; for a wrong word, underline it and write the correct word. An example of how to correct the error is provided below. Write the answers on the *answer sheet*.

For example:

One of my favorite writers are Charlotte Brontë. She was born in the early nineteenth
is
century when women had far fewer opportunities ^ they have now. She lived in a
than
small village in Yorkshire and she took great pleasure in walking on the moors
where near her home.

Temporal perception is just one aspect of how we are shaped by our cultures. Another very strong element of our cultures is context. This refers our environment, particularly how much of it is significant during communication.

In terms of context, there are two types of cultures, high context cultures and low context cultures. High context cultures assign a lot of importance to the environment surrounding message. Some cultures usually put into this category including the Han Chinese and Gulf Arab. High context speakers may not state a message very direct. The meaning of the message is implied, not expressed. In order to understand that is being said, the listener must understand the situation and his or her relationship with the speaker. In different situations, a giving statement could have very different meanings.

In contrast, low context cultures (such as those in Germany and the United States) place the highest importance to the message itself, which is often quite explicit. External factors like interpersonal relationships or family histories does not usually alter the message very much. In such cultures, it is common to send in a message to a large number of people and expect them all to understand the message in the same way.

Part VIII Writing (30 marks)

Section A (10 marks)

88. By the end of 2020, China had 73,000 institutions engaged in intellectual property services, with total employees surpassing 865,000.

Read the data in the following chart and write a 120-word report on the answer sheet.

Source: National Intellectual Property Administration

Section B (20 marks)

89. The world’s biggest online shopping event takes place annually on Nov. 11. known as *Singles’ Day*. Many people place their orders during the pre-sale period, which kicks off on Oct. 20 on major e-commerce platforms. Suppose you are a Singles’ Day shopper, how much will you spend during the event? Are you rational or impulsive when you shop?

Write a 180-word essay to express your opinions. Write the essay on the answer sheet.
