

2023 年决赛试题

(Total: 150 marks Time: 120 minutes)

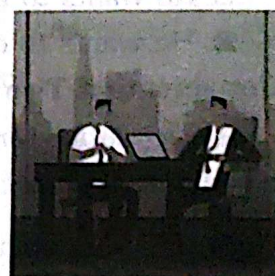

Part I Listening Comprehension (30 marks)

Section A (5 marks)

In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the four choices marked **A, B, C** and **D**, decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

1. A. Cook dinner together.
C. Go out for a picnic.
- B. Dine with friends.
D. Tidy the garage.
2. A. Diana and Steve are planning to get married.
B. Steve suggests Diana change a boyfriend.
C. Diana and Steve get along with each other now.
D. Steve wants Diana to keep patient and quiet.
3. A. They may not be able to deliver the products in time.
B. The price they ask may not be accepted.
C. Their meeting with the BAC may be postponed.
D. The BAC may cancel the contract any time.
4. A. They got lost in the wild.
B. They ran out of money.
C. Their car lost control on the way.
D. Their car was stuck in the mud.
5. A. She should clean up the computer regularly.
B. She could keep in touch with friends on the internet.
C. She could report his case to the police.
D. she should use a longer and unusual password.

Section B (10 marks)

In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause. During the pause, read the questions and make your answers on the answer sheet with a single line through the center.

Conversation One

Listen to the conversation. Then read the **four** choices marked **A, B, C** and **D**, and decide

which is the best answer according to what you hear. Mark the corresponding letter on the **answer sheet** with a single line through the centre.

6. How did William get to know about treasure diving?
A. From a friend's experience. B. From a tourism advertisement.
C. From a local diving club. D. From a company's website.
7. What did William's friend do when he met the treasure diver?
A. He joined the diver's company.
B. He formed a company with the diver.
C. He learned from the diver how to dive.
D. He went to Africa for treasure diving.
8. What did the two men do then?
A. They did professional diving training. B. They lived a fascinating life in Africa.
C. They did business with a shipping firm. D. They went on exploring under the sea.
9. Why does treasure diving involve dispute according to William?
A. Because many archaeologists strongly object to it.
B. Because divers hold licence from different countries.
C. Because it can become a political issue in some ways.
D. Because it is extremely dangerous under the sea.
10. Why does his friend do treasure diving now according to William?
A. He enjoys it as a hobby.
B. He does it for a living.
C. He wants to help save historical relics.
D. He wants to earn huge amounts of money.

Conversation Two

Listen to the conversation, and complete the sentences according to what you hear with **one word** for each blank. Write the answers on the **answer sheet**.

11. Both the man and the woman thought it a great _____ exhibition and they would like to go again.
12. What impressed the man most was that the pictures on show dealt with similar themes showing _____ between cultures.
13. The woman held an opposite opinion that the exhibition is mainly about _____ among cultures.
14. The wedding customs shown in the pictures make the woman think of the _____ between individuals in a society.
15. Being Indian, the man insists that it is _____ for him to accept the woman's opinion of international cultures.

Section C (5 marks)

In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the four choices marked **A, B, C and D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

16. What can the reported technology model be applied to?
 A. The efficiency of pest control. B. The increase of food production.
 C. The recreation of a smelling system. D. The innovation of artificial intelligence.
17. What is the goal of the new assessment?
 A. To better understand the teaching and learning of English as a foreign language.
 B. To enrich the Organization for Economic Cooperation and Development.
 C. To publicize and promote the OECD's programme of PISA worldwide.
 D. To measure students' performance in maths, science and reading in English.
18. What do we infer from the news?
 A. The COVID-19 pandemic caused severe health problems in 2021 and 2022.
 B. Many students suffer from mental health and are left behind in learning.
 C. Some schools are well equipped with computers during the pandemic.
 D. The virus worsened students' health and many are unable to attend class.
19. What is the untold human suffering the scientists warn of?
 A. A worldwide epidemic. B. Explosion of population.
 C. Shortage of clean water. D. The climate emergency.
20. Why do scientists collect nasal mucus of whales?
 A. To analyze the whales' health condition. B. To estimate the whales' life span.
 C. To predict the whales' migrating route. D. To direct the whales away from danger.

Section D (10 marks)

*In this section, you will hear one monologue. The monologue will be read twice. After listening, answer the questions using **not more than five words**. Write the answers on the answer sheet.*

21. How does the Harvest Restaurant differ from the other two restaurants?
 22. How long do the restaurants serve for dinner?
 23. What can you see on the blackboards in the restaurants?
 24. Where do they serve the take-away food?
 25. Who is prohibited from the adult beach?

Part II Vocabulary & Grammar (15 marks)

There are 15 incomplete sentences in this part. For each blank there are four choices marked A, B, C and D. Choose the one that best completes the sentence. Then mark the corresponding letter on the answer sheet with a single line through the centre.

26. _____ in the year of 1943 _____ the harmful smog made its appearance in Los Angeles.
 A. It was; that B. It was; then
 C. Only; that D. That it was; when
27. The villagers always _____ a large supply of tinned food in winter in case they are snowed up.
 A. back up B. come by C. fill with D. lay in
28. In the center of the town stands a memorial _____ the soldiers who died for the country in the war.
 A. for the sake of B. by virtue of C. in honor of D. on account of

29. Before they started work, they asked me to give them an _____ of the cost of repairing the roof.
A. assessment B. estimate C. evaluation D. arrangement
30. Psychologists have _____ new discoveries that challenge our _____ theories of the human mind.
A. found; accepted B. made; established
C. examined; received D. undertaken; recognized
31. I felt somewhat disappointed and was about to leave, _____ something occurred which attracted my attention.
A. as B. while C. when D. until
32. Scientific analysis should exclude all facts and observations that are not _____ to the investigation in question.
A. available B. familiar C. similar D. relevant
33. Manufacturers who carry out government orders have to be very careful to _____ certain specifications.
A. adhere to B. depend on C. guard against D. refer to
34. Her use of colour and form finally _____ the conventional style of her predecessors as she developed her own technique.
A. came up with B. departed from C. ran out of D. washed away
35. The Chinese government maintains that having dialogues _____ equality is the only way to reduce controversies and disputes about human rights.
A. on top of B. on the grounds of
C. on behalf of D. on the basis of
36. My gloves were here a second ago but now they're gone! Someone _____ them by mistake.
A. could be taking B. may have taken
C. might be taking D. must have taken
37. _____ the expression on his face, I would say our commander-in-chief wasn't very pleased.
A. As for B. Judging by C. Owing to D. Seen from
38. Thank you indeed for your kind invitation to stay with you during the coming holiday and I'll _____ on it soon.
A. get you up B. put you up C. take you up D. turn you up
39. —Brian! There were two pieces of cake on the table last night. Now there is only one.
— _____ It was dark in the room. I didn't see the other piece.
A. Let me explain why. B. Never mind.
C. Same here. D. Sorry, I can't.
40. —Would you mind telling me why you applied for this position?
—Well, my present job is rather boring.
— _____
— Well, I just sit at a desk all day, more or less doing the same thing.
A. Can you help me? B. Could you be a little more specific?
C. I felt the same way. D. Where did you hear that?

Part III Cloze (10 marks)

Section A (5 marks)

Read the following passage and fill in the blanks with the correct forms of 5 words out of the 7 given in the box. Write the answers on the answer sheet.

believe profession search hit nature pay evident

It used to be that people would drink coffee or tea in the morning to pick them up and get them going for the day. Then cola drinks (41) _____ the market. With lots of caffeine and sugar, these beverages soon became the pick-me-up of choice for many adults and teenagers. Now drink companies are putting out so-called "energy drinks". These beverages have the specific aim of giving tired consumers more energy.

The company that puts out this beverage has stated in interviews that the energy drink is not a thirst quencher. Nor is it meant to be a fluid replacement drink for athletes. Instead, the beverage is meant to revitalize a tired consumer's body and mind. In order to do this, the makers of energy drinks, typically add vitamins and certain chemicals to their beverages. The added chemicals are like chemicals that the body (42) _____ produces for energy. The vitamins, chemicals, caffeine, and sugar found in these beverages all seem like a sure bet to give a person energy.

Health (43) _____ are not so sure, though. For one thing, there is not enough (44) _____ to show that all of the vitamins added to energy drinks actually raise a person's energy level. Another problem is that there are so many things in the beverages. Nobody knows for sure how all the ingredients in energy drinks work together.

Dr. Brent Bauer, one of the directors at the Mayo Clinic, cautions people about (45) _____ all the claims energy drinks make. He says, "It is plausible if you put these twelve things together, you will get a good result." However, Dr. Bauer adds that the mix of ingredients could also have a negative impact on the body. "We just don't know at this point," he says.

Section B (5 marks)

Read the following passage and fill in each blank with one word in one of the following three ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the answer sheet.

The Ring of Fire is an enormous chain of volcanoes all around the Pacific Ocean. The ring goes from New Zealand up to Asia and across the ocean to Alaska. From Alaska, the ring (46) con_____ southward along the coast of both North and South America. More than seventy-five percent of the world's volcanoes are located in this ring.

Scientists are interested in studying the Ring of Fire because they can observe plates tectonics at work there. In 1912, a German scientist, Alfred Wegener, came up with the first theory of land (47) _____ (move). He suggested that the positions of the continents were not fixed, but that they moved slightly. Later, scientists discovered most of Wegener's ideas were right on the mark. They then developed the theory called plate

tectonics.

According to plate tectonics, the surface of the Earth consists of a number of enormous plates or sections of rock, each about eighty kilometers thick. The plates float and slowly move at speeds between one to ten centimeters every year. That is about the (48) rate your fingernails grow! Within the Ring of Fire, new material for the Earth's plates is constantly being created as hot liquid rock called magma flows from the center of the Earth up to the ocean floor. All the (49) existing plates on the Earth's surface have to move slightly to make room for the new material.

As plates move both away from and toward each other, they run into each other. When they hit each other, one plate might move under another. This process is called subduction. Subduction (50) frequently causes earthquakes. It may also result in the bottom plate melting due to the extreme temperatures under the top plate. The magma created in this process can rise to the Earth's surface and come out through volcanoes, as can be seen along the Ring of Fire.

Part IV Reading Comprehension (30 marks)

There are three passages in this part. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the answer sheet.

Section A (10 marks)

Questions 51—55 are based on the following passage.

Adventure travel is now becoming popular with many people. From heli-hiking and mountain climbing to white-water rafting or whale-watching, adventure vacations can now give you more variety and excitement than ever. (51) What if If you and your friends are planning an exciting trip somewhere this year, there are a few things you ought to know before you set off.

First of all, wherever there is adventure, there is also danger. The most important item that you must take with you is a first aid kit. You don't need to buy a special kit: you can easily make your own. You need include some painkillers, some cream for insect bites and stings, and gauze and bandages for any injuries. (52) What about Don't forget to pack the sunscreen, either. The sun doesn't only burn you on lazy beach vacations. You can get sunburned when you're sailing, hiking, or cross-country skiing, too.

The temperature can also be tricky. In hot places, it isn't only sunburn you have to worry about. (53) What about You have to drink plenty of water in hot places, especially after exercise, and you must take in extra salt, either in food or pill form. If you are in very hot temperatures for a long time, you could end up with heatstroke. This will make you feel very sick, with a high temperature and a headache. Anybody with heatstroke must get medical help immediately.

Low temperature can also be a problem. If your idea of adventure is sailing, rafting, or climbing mountains, you might find yourself in cold conditions. (54) What about A long

mountain walk on a cold, windy day, plus wet clothing, tiredness, and hunger could also give you hypothermia. You need to be prepared by wearing several layers of clothing. You must wear a hat, as a lot of body heat is lost through the head, and a good waterproof jacket. You don't need to have huge amounts of food with you, but some sugary foods like chocolate for quick energy and plenty of fluids are important if you want to stay safe in the cold.

(55) _____ The main thing to remember is that you shouldn't drink the local water if you aren't sure that it's safe. You can take special water purification tablets with you that will make the local tap water safe to drink. Finally, if you ever have to drink water and you are worried that it isn't pure, you must boil it for ten minutes before drinking it. Otherwise, you could get very sick.

So, with careful planning and preparation, you can have a great time on adventure vacations. Just make sure you follow this advice and then you'll be able to come home safe and sound and tell your parents that they shouldn't have worried about you.

Questions 51—55

Choose from the sentences A—G the one which best fits each gap of 51—55. There are **two extra** sentences which you do not need to use.

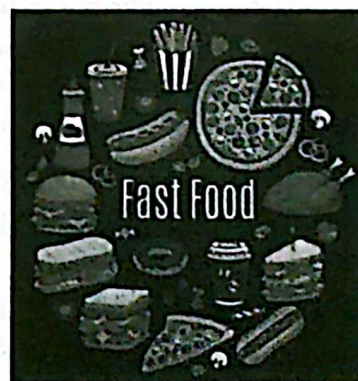

- A. If you're also using up a lot of energy during the day, you can suffer from heat exhaustion because your body runs short of water or salt.
- B. You don't have to be a top athlete to go on a walking, sailing, or sports vacation, but you do need to be well prepared in lots of ways.
- C. If you don't follow this advice, your vacation will be a disaster.
- D. The main danger is hypothermia, which occurs when your body loses heat faster than it produces.
- E. Wherever your travel takes you, you'll have to drink water.
- F. Being properly prepared for a vacation will make everybody happy.
- G. If you don't think you'll be able to buy them on vacation, it's also a good idea to take throat lozenges and pills for an upset stomach.

Section B (10 marks)

Questions 56—60 are based on the following passage.

America's high consumption of fast food has been attributed to the fact that people are often too busy to eat a properly balanced diet. Nutritionists say the figures are worrying and warn that while occasionally eating fast food is not harmful, a high fat diet can increase the likelihood of heart disease.

This report is based on the findings of a survey that was carried out at six well-known fast food chains. One thousand people aged 12–65 were asked a number of questions concerning their eating habits, and the restaurant managers were asked

about healthy eating choices available at their restaurants.

On average, people buy food around twice a week from fast food restaurants. However, teenagers eat out more often. The majority of teenagers eat at fast food restaurants approximately three times each week. The survey also showed that teenagers made up almost two-thirds of the customers of pizza and burger restaurants, over half of the customers of chicken restaurants and around 4 in every 10 of the customers of fish and chips shops. None of the teenagers interviewed said that they didn't like a particular kind of fast food.

A small number of customers at the fast food restaurants visited were over the age of fifty—approximately 5 percent. The majority of these interviewees claimed to be eating at the restaurant in question because they were with younger people, mainly grandchildren. Unfortunately, neither the teenagers nor the older people seemed to be aware of the dangers of eating fast food on a regular basis.

The managers were more than willing to supply healthy options on their menus. They all agreed that it is important to offer people some help in identifying them. The main advantage of all the healthy dishes suggested below is that they have less fat.

The amount of fat contained in a burger partly depends on how it is cooked. Grilled burgers are reasonably lean, as opposed to burgers fried on a griddle. The manager also suggested that customers interested in eating healthy meals should choose a burger and a salad.

The manager of the chicken food chain stated that both grilled and oven-cooked chicken, especially skinless chicken, are healthier choices than coated, deep-fried chicken because they absorb less fat.

Although fish can be healthy, when it is fried in batter it can contain a lot of fat. However, the manager claims that their fish is fried in unsaturated oil at the right temperature, so it contains less fat than the fish sold at other fish and chips shops.

Thick crust pizzas are a healthier choice than thin crust ones. They're more filling, having more base, and less toppings are eaten. The manager also mentioned that pizzas with lots of vegetables on top are healthier than ones with meats and cheeses.

In conclusion, although the figures are worrying, it is reassuring to know that there are healthier options for people who eat fast food.

Questions 56—60

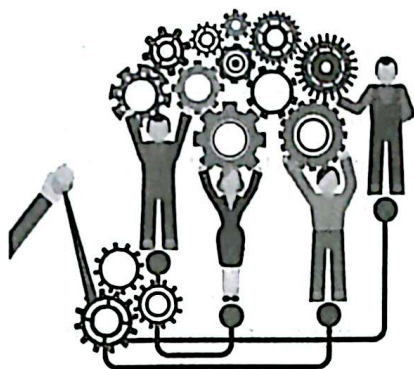

Answer the following questions with the information given in the passage.

56. What is the opinion of nutritionists about eating fast food?
57. How many teenagers eat fast food three times a week according to the survey?
58. What do the restaurant managers believe?
59. Which is the least healthy according to the manager of the chicken food chain?
60. What kind of pizzas are supposed to be healthier?

Section C (10 marks)

Questions 61—65 are based on the following passage.

Over the past 30 years, both employer and employee attitudes to work and working patterns have been shifting. For many forward-looking companies, the office is no longer perceived as an indispensable base for work and business, and the effectiveness of the traditional 9—5 working day is increasingly being challenged.

Three factors that have affected attitudes towards the working day and the ways in which workers interact with each other are: the globalization of the economy, widespread developments in communication technology

and the expansion of equal opportunities for women.

As a result of the globalized economy, there is intense competition for trade and service provision throughout the world. More than ever, workers in both developed and developing nations are recognizing the inevitable changes in their working environment, as they come into direct competition with each other for employment opportunities. An example of this is the growth of call centres in countries such as India, where technology is advanced, but the cost of labour comparatively cheap. Employees in these centres, working unsocial hours, routinely provide telephone support callers in time zones far from their own. The growth of these 'timeless workplaces' has been made possible by other factors affecting perceptions of the office, the evolution of online communication software and the proliferation of wireless and mobile networks across the globe.

One of the more obvious consequences of these technological advances is that businesses in distant countries can discuss and complete deals over the Internet, through online conferencing software, without the need for international travel. Additionally, as these conferences can be held not only in the office but anywhere—at home, in a coffee shop or in an airport—the concept of the office as a unique centre for work has been brought into question.

Whilst the global economy and technological advances can account for some of the changing perceptions of the workplace, another contribution factor, is social innovation, particularly with regard to equal rights for women. Although large numbers of women have been employed in business and industry over the last century, they have also continued to be responsible for childcare and running the home. For this reason, they have traditionally worked part-time and have often needed to adapt their working hours to the demands of the family. To support this working pattern, a new law was passed in the UK in 2003, giving women with young children the right to request flexible working hours. Since then, further changes in equal rights legislation, allowing both men and women with families to apply for flexitime, have encouraged a widespread revision of attitudes to the workplace.

Questions 61—65

Complete the summary below with information from the passage, using **no more than three words** for each blank.

Inevitable changes in working patterns and people's (61) _____ have been taking place all over the world. As innovative employers have realized, the workplace is becoming less important as a centre of operations. Also, the standard eight-hour day is not as beneficial as it used to be. Meanwhile, the worldwide economic climate has gradually affected the labour market. Employees have to (62) _____ work opportunities internationally. (63) _____ and low wages have made some countries more competitive than others. Developments in technology have expanded the boundaries of the office. People have the option to work over (64) _____. In supporting the (65) _____ for women in work, the legislation in Britain gives mothers the right to ask for flexitime. It also allows fathers to spend more time with their children.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Write the answer on the answer sheet.

66. Praying for health and longevity has been a constant theme of the Double Ninth Festival (重阳节) since ancient times. The traditional customs of this festival have been passed down through centuries of development and evolution, carrying the essence of Chinese culture and people's best wishes for a well-lived life. The ninth day of the ninth month of the lunar calendar marks the traditional Chinese festival. It was celebrated on that day because the pronunciation of the number "nine" is the same as "long time" in Chinese, which also implies longevity. Thus, people in ancient times considered it a lucky day to celebrate, and it is also the Chinese festival for the elderly. People wear accessories made from Zhuyu (茱萸), eat Chongyang cake and drink chrysanthemum (菊花) wine on the day. In addition to a nutritious and balanced diet, proper exercise is also a very important secret for longevity of life. Mountain hiking is thus one of the customs of the Double Ninth Festival.

Section B (10 marks)

Translate the following paragraph into English. Write the answer on the answer sheet.

67. 阅读是我们从小就被鼓励要养成的习惯。小时候，我们会花费大量时间看动画片，或者去外面玩耍，就是不想阅读。那些确实读了很多书的小朋友被称为“书虫”。但是，随着我们渐渐长大，我们意识到阅读的习惯是一趟应该尽早赶上的列车！我们很多人开始后悔——真希望阅读一直是自己人生的一部分。

Part VI IQ Test (10 marks)

There are **five** IQ Test questions in this part. Write the answers on the **answer sheet**.

68. What does the underlined phrase mean in Chinese?

My first impression of London, as compared to Singapore, is that they are as different as chalk and cheese.

69. Where does afternoon come before morning in the world?

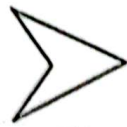

70. What is the next number in the following series?

940 839 738 637 ?

71. Can you solve the rebus word problem illustrated below?

TIMING TIM ING

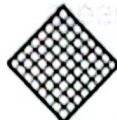

72. Which code matches the pattern given at the end of the following line?

LS

NT

MS

NR

LT

?

NS MR MT LR NR

A. B. C. D. E.

Part VII Error Correction (10 marks)

There are ten errors altogether in the following passage. The errors are: missing words, unnecessary words and wrong words. Please correct them as follows: for a missing word, mark its position with a symbol "Λ" and write it; for an unnecessary word, cross it out with the symbol "\"; for a wrong word, underline it and write the correct word. An example of how to correct the error is provided below. Write the answers on the **answer sheet**.

For example:

One of my favourite writers are Charlotte Brontë. She was born in the early is nineteenth century when women had far fewer opportunities Λ they have now. than She lived in a small village in Yorkshire and she took great pleasure in walking on the moors where near her home. where

In order to obtain a licence, a vaccine must pass rigorous safety checks and a certain level of effective must be proved. The vaccine must 73. _____ satisfy a variety of experts include those in the fields of public health, 74. _____ immunology and statistics. Ethical questions are arise when, for instance, 75. _____ finding from pharmaceutical companies and public health experts are in 76. _____ conflict. Pharmaceutical companies, in particular, stand to make huge profits if its vaccine is adopted in a country or worldwide. 77. _____

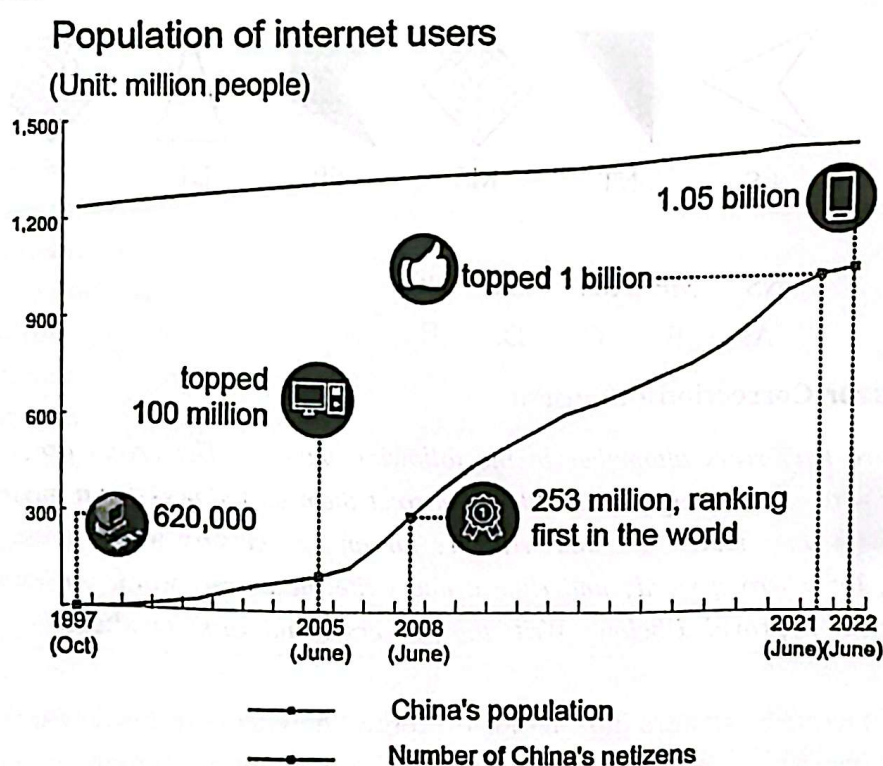

On the other hand, some groups, especially government bodies, might be

motivated by political pressure to take act to protect the population against 78. _____
 a vaccine which is not yet deemed safety. For a clinical trial to be valid, there 79. _____
 needs to be a control group—a group of volunteers who will not receive the 80. _____
 vaccine. An ethical dilemma exists when in deciding who will not receive the 81. _____
 vaccine. To illustrate this, imagine a scenario where a dead epidemic has 82. _____
 begun but we think a vaccine has found. In order to test it, researchers _____
 have to decide who are going to be asked to remain without immunisation, while
 others are protected.

Part VIII Writing (30 marks)

Section A (10 marks)

83. Write a **120-word** report on the growth of internet users in China. Write the report on the answer sheet.

Section B (20 marks)

84. Starting with last fall semester, students in primary and middle schools must have at least one course every week on basic household skills such as cleaning and cooking, according to a new curriculum standard for labor education in compulsory education released by the Ministry of Education.

Should household skills be made compulsory at schools?

Write a **180-word** essay to express your opinions. Write the essay on the answer sheet.
