

(Total:150 marks Time:120 minutes)

Conversation One

Listen to the conversation, and mark each statement as either true (T) or false (F) according to what you hear.

6. Fires through the Indonesian countryside are due to a natural phenomenon.
7. People are updated on the schools' situation by the state's Education Department every three days.
8. Visibility in these areas is around only 80 metres after the fire.
9. Nineteen flights scheduled for today have been canceled so far.
10. Current Indonesian laws can effectively prevent farmers from using the slash-and-burn techniques.

Conversation Two

Listen to the conversation. Then read the four choices marked A, B, C and D, and decide which is the best answer according to what you hear.

11. When did Dr Evans start to write her book Anger Management?
 - A. About two years ago.
 - B. About twelve years ago.
 - C. After finishing graduate school.
 - D. After she became a psychologist 20 years ago.
12. What important point does Dr Evans make in her book?
 - A. Anger can be avoided in life.
 - B. Anger is something positive.
 - C. Anger is in fact part of our life.
 - D. Anger does more harm than good.
13. What do many psychologists and community organizers think of anger?
 - A. It hurts people psychologically.
 - B. It is something difficult to control.
 - C. It helps people to release pressure.
 - D. It is a strong sign that something is wrong.
14. What is the focus of Dr Evans' book?
 - A. How people deal with anger.
 - B. What negative effects anger has.
 - C. Why people cannot accept anger.
 - D. What causes people to get angry.
15. What is a psychological symptom of bottling up anger?
 - A. Headaches.
 - B. Hypertension.
 - C. Violent thoughts.
 - D. Memory loss.

Section C (5 marks)

In this section, you will hear five short news items. Each item will be read only once. After each item, there will be a fifteen-second pause. During the pause, read the question and the four choices marked A, B, C and D, and decide which is the best answer. Then mark the corresponding letter on the answer sheet with a single line through the centre.

16. What has the research found?

- A. Cats usually like owners with light personality traits.
- B. People like to play with their cats in front of a mirror.
- C. People with dark personality traits should not keep cats.
- D. People's behaviour and mood have an effect on their cats.

17. What causes insect populations to decrease according to the news item?

- A. Humans' activities. B. Natural disasters. C. Warmer climate. D. Natural selection.

18. What is called the most serious public health challenge of the 21st century by the World Health Organization?

- A. Heart disease. B. Short-sightedness. C. Childhood obesity. D. Children's underweight.

19. What did the White House do to encourage more American students to choose STEM?

- A. Reduce their tuition to an affordable level.
- B. Lower the examination scores for admission.
- C. Increase the number of scholarship winners.
- D. Remove social and financial barriers to quality education.

20. Which is NOT a measure to boost development of traditional Chinese medicine?

- A. Conducting a survey on medicinal resources overseas.
- B. Working out standards for establishing overseas TCM centres.
- C. Improving the capacity and system of technological innovation.
- D. Standardizing the industry and regulating TCM health care services.

Section D (10 marks)

In this section, you will hear two short passages. The passages will be read twice. After each passage, there will be a thirty-second pause. During the pause, write the answers on the answer sheet.

Dictation

Listen to the passage. For questions 21—25, fill in the blanks with the exact words or phrases you hear.

We are very often impressed and excited by amazing predictions made by scientists regarding our future: how we will travel, how we will spend our free time, how we will eat and so on. (21) _____ before long we will have gadgets that let you watch TV while navigating in your auto-pilot car which also makes coffee and sandwiches as you travel to the station. There you will catch an air-train, which flies (22) _____ without touching

it and breaks the speed of sound. It would be interesting to be around in 150 years to see how many of these predictions are accurate, but for the moment we can (23) _____ some past predictions about how technology will improve or not.

Some of the most important inventions affecting our lives concern travel, and one of these is the aeroplane. We will soon all travel by gigantic flying shopping centres according to some experts, but was everyone convinced by the aeroplane back in the beginning? Some people believed that the aeroplane would just never happen.

For example, Mr Simon Newcomb declared that flight by machines (24) _____ air is insignificant and utterly impossible. Eighteen months later the Wright Brothers flew. Another who believed it was impossible was Lord Kelvin. He should have known better, being a mathematician, physicist and president of the British Royal Society.

The brilliant inventor Thomas Edison turned out to be a little short-sighted when looking at the sky: he declared in 1895 that the aeroplane's possibilities (25) _____ and that it was better to research something else.

Summary

Listen to the passage. For questions 26—30, complete the notes using no more than three words for each blank.

Elephants are highly intelligent animals with truly remarkable (26) _____. The average elephant spends much of its day eating and (27) _____ food. In fact, its memory may reach as far back as (28) _____ to recall a place where it ate in the past. In addition to these mental abilities, elephants can paint abstract pictures with their (29) _____, and some of the pictures have been sold for a great deal of money to (30) _____ feeding the elephants in the zoos.

Part II Vocabulary & Grammar (15 marks)

There are 15 incomplete sentences in this section. For each blank there are five choices marked A, B, C, D and E. Choose the one that best completes the sentence. Then mark the corresponding letter on the answer sheet with a single line through the centre.

31. Don't put the _____ on me! I'm not responsible _____ your financial problems.
A. guilt; about B. blame; for C. excuse; into D. cause; of E. burden; to
32. He was supposed to meet me at ten o'clock at the railway station, but he _____.
A. wasn't B. doesn't C. wouldn't D. didn't E. supposed not
33. —Did you like the new film?
—No, it didn't _____ my expectations.
A. make up for B. fall short of C. live up to D. come up with E. go down with
34. Mr. Peters had been with us for ten years and _____ the firm made us all very sad.
A. quitting B. his quitting C. being quit D. by quitting E. having quit
35. —Do you know anything about paper-cut?
—Well, I've seen it _____.
A. being done B. to be done C. having done D. to have done E. doing
36. —You look different, Maria. Have you done something different to your hair?
—Oh yes. I _____ red.
A. got it dyed B. got it to dye C. got it dye D. got dyed it E. got dyed
37. —Has the weather cleared up in New York?
—No, it's _____ cold.
A. so far B. hardly ever C. ever so D. too much E. too rather
38. —Did Jane get angry at the remark on the Internet?
—_____ it. She was quite pleased.
A. Longer for B. Far from C. Sooner than D. Rather than E. Instead of
39. —Will Michael eventually be put on trial?
—Not _____ his old age and poor health.
A. with respect to B. as for C. in view of D. apart for E. in spite of
40. They don't have to have any riding experience _____, and we'll teach them how to ride.
A. whatsoever B. wherever C. however D. whatever E. nonetheless
41. We invited two hundred people to the reception. Had we known that only fifty would turn up, we _____ so much food.
A. should not prepare B. would not prepare
C. did not prepare D. would not have prepared
E. had not prepared

42. Suppose we _____ so hard. Do you think we would have passed the examination?
 A. don't study B. are studying C. will study D. haven't studied E. hadn't studied
43. —I had to stay up late to work last night.
 — _____
 A. So I had. B. So had I. C. So I did. D. So did I. E. So you had.
44. —Concert Choice, thank you for waiting. May I help you?
 —Yes, I'd like two tickets for the New York Philharmonic on May 18th. _____
 —The orchestra section? Just a minute. There're only a few seats left. They're on the side. Would those be OK?
 A. What's available in the orchestra section?
 B. How's the orchestra section?
 C. I play in the school orchestra.
 D. Can you recommend any performances in the symphony section?
 E. I hope their concert is a huge success.
45. —Midland Express. How can I help you?
 —Hello. I travelled up to Birmingham on one of your services this morning, and I'm pretty sure I left my handbag on the bus.
 — _____
 —Yes. It's a small, black, plastic handbag, with a short handstrap. I was sitting near the back door.
 —Yes, it's OK, Madam. We've got your handbag. The driver handed it in.
 A. Where did you put the handbag?
 B. What's the handbag made of?
 C. Do you remember the items in the handbag?
 D. You didn't see anybody pick up your handbag, did you?
 E. Could you describe the item for me, please?

Part III Cloze (10 marks)

Read the following passage and fill in each blank with one word. Choose the correct word in one of the following three ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the answer sheet.

In the spring of 1947 some young Bedouins were busy looking for a lost goat along some cliffs (46) _____ (overlook) the Dead Sea in modern Israel when they found a cave containing jars filled with manuscripts. They did not realize that they had just made one of the most amazing discoveries of the century. Only in 1948 (47) _____ the academic world realize what had happened: the manuscripts changed hands between

dealers a few times before they finally ended (48) _____ in the hands of American and European scholars who must have been astonished by (49) _____ they saw.

A year later the site of the find was identified as the cave now (50) _____ (know) as Qumran Cave 1. Further searches of Cave 1 revealed archaeological finds and more manuscript fragments, which in turn showed that the scrolls must be ancient and authentic. Between 1949 and 1956, ten (51) _____ (much) caves were discovered around Qumran, and still more scrolls, as well as thousands of fragments of scrolls—scholars could hardly believe their luck. There were probably something like 800 manuscripts dating from approximately 200 BCE to 68 CE originally in the caves. Although scholars cannot know for sure who wrote the manuscripts, it is widely believed that the authors were connected to Jewish priests and were most likely not on (52) fri_____ terms with the priests of Jerusalem. They must have belonged to a (53) _____ (religion) Jewish community because the manuscripts are all references to the Old Testament, Jewish hymns, prayers and (54) _____ (write) of the patriarchs.

The Qumran library is highly (55) _____ (inform). These texts have increased our understanding of a particular historical moment in time, and they will most likely continue to be the object of close study for many years to come.

Part IV Reading Comprehension (35 marks)

Read the following passages. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the answer sheet.

Section A (5 marks)

Questions 56—60 are based on the following passage.

8, Warren St,
Manchester M14 0EU

Manager,
Telstar Electricals,
17, Purley Way,
Croydon CR9 2FZ

March 7th

Dear Sir / Madam,

I am writing with regard to the laptop that I ordered online from your company on 5th February (reference number 81406530). Unfortunately there have been several problems with this order, and I am extremely dissatisfied with the inefficient and unhelpful service I have received so far.

First of all, when I received an email confirmation of the order, I was told that you would contact me within 48 hours to arrange a time and date to deliver the computer. However, four days later I still had not heard from you. When I telephoned Customer Services, I was told that the computer was out of stock, and that they did not know when it would be in stock again. I therefore asked them to refund the money and they promised that they would do this within 3 to 5 working days. In the meantime, I bought a laptop from another company.

Yesterday I checked my bank statement and was shocked to see that the money I paid still had not reached my account. Moreover, as I have paid for two computers, my bank account is now overdrawn and I have to pay interest charges. Finally, when I telephoned Customer Services again they informed me that they could not give me a refund because I had placed the order over 30 days ago. They offered to deliver the laptop next week, but as you can see, I no longer need this product.

This situation has caused me great inconvenience, not to mention financial problems. I would therefore be grateful if you could cancel my order immediately, and refund the money I paid for the computer as well as the interest charges on my bank account within 7 working days.

I look forward to hearing from you,

Yours faithfully,

Erik Olsen

Questions 56—60

Complete the chart with no more than three words from the passage for each blank.

Service	It was (56) _____ and unhelpful.
Delivery	They promised to contact Erik within 48 hours.
Phone Call 1	They told Erik the computer was (57) _____. They promised to refund the money.
Yesterday	Erik discovered that his bank account was (58) _____.
Phone Call 2	They said that they could not give Erik the refund. They offered to (59) _____.
Erik's Request	They should (60) _____ and give him the refund.

Section B (10 marks)

Questions 61—65 are based on the following passage.

Allergy has become more and more common over the last 30 years. It is a reaction that occurs when the immune system has a strange and unnecessary reaction to a substance which is normally harmless, such as

pollen (花粉) or peanuts. The immune system is there to protect the body against outside attackers, including viruses, bacteria and parasites. To defend your body against an attacker, the immune system remembers these dangerous micro-organisms and attacks them if it meets them again. This work is done by antibodies. The immune system in allergy

sufferers makes antibodies against harmless substances, because it mistakenly believes them to be dangerous.

(61) _____ Sometimes people can eat nuts for years and then suddenly become allergic to them. What has happened is that the immune system has now decided the substance is dangerous and has made an allergy antibody. This antibody then attaches itself to cells, which contain histamine (组织胺). When the antibodies meet the allergen the next time, they attempt to destroy it. As they do that, the surface of the cells is broken, and histamine is released. The histamine and other chemicals inflame the tissues. This leads to the symptoms of allergy, such as swelling, rashes, sneezing and breathlessness.

(62) _____ Some people are born with the ability to make lots of allergy antibodies, and they are more likely to develop allergies and allergic disorders such as hay fever and asthma.

(63) _____ We eat more processed foods, with a wide range of additives and colourings; more and more people have central heating and double glazing, making our houses warmer and less draughty.

(64) _____ At one time our immune systems were kept busy fighting off disease and trying to win the battle for health, but antibiotics have reduced the amount of work our immune systems have to do. Now experts think they may direct spare energy to harmless substances. In other words, our immune systems have become over-sensitive.

(65) _____ Sufferers may be given medicine to control symptoms, and they may also be offered tests to find out what substances trigger an allergic reaction so that they can avoid contact with these substances in future.

Questions 61—65

Complete the passage with the following sentences. There are two extra sentences that you do not need to use.

- A. There may also be a link between allergies and antibiotics.
- B. Allergies run in families.
- C. A good deal of research is being devoted to finding a cure for allergies.
- D. One-third of us are affected by allergy at some point in our lives.
- E. Experts believe more people have developed allergies because of changes in our lifestyle which have exposed us to more allergens.
- F. In the UK, five per cent of children suffer from food allergy.
- G. An allergic reaction may not happen the first time a sufferer meets an allergen.

Section C (10 marks)

Questions 66—70 are based on the following passage.

In 2004, a Harvard student named Mark Zuckerberg decided that he needed a way to keep tabs on his schoolmates over the Internet that was easy and fun. So he created a modest little website using social network gadgetry. Two years later, he had managed to raise \$37.7 million and had registered about 7 million users. The name of his website was Facebook.

Zuckerberg, however, was not satisfied. Success is one thing, world domination is another. And he did not want cyber-success, he wanted the real thing. His main competitor was the social network MySpace. After reaching 8 million users, mainly college students, Facebook seemed to have peaked, while MySpace just kept mushrooming, reaching 10 million users in 2006.

Temptation knocked that same year. Yahoo wanted to launch a social network, and made an offer to buy Facebook from Zuckerberg. Initially he agreed to sell for a striking one billion dollars in cash. But then Yahoo hit some problems, times were difficult, and they reduced the offer. Offended, and no longer convinced that Yahoo was a reliable partner, Zuckerberg turned down the new, reduced offer. Yahoo then changed its mind and made the one billion dollar offer again. But Zuckerberg refused: No. Little more than a teenager, he walked away from a billion dollars and kept his baby, Facebook.

It seems that he made a sound decision. Without the help of Yahoo, he managed to help Facebook grow from a college network to a total social network used by a vast variety of people around the world. Zuckerberg is compared to gurus like Steve Jobs of Apple and Bill Gates of Microsoft. Something like 1 million people per week sign up to use Facebook, and the majority are people over 35, meaning that it has really moved away from its college basis. In 2007 Zuckerberg sold a 1.6% share in Facebook to Microsoft. At that time the value of Facebook was estimated at an overwhelming \$15 billion.

Born in 1984, but far from green, Zuckerberg is now considered to be one of the wealthiest men in America.

Questions 66—70

Answer the following questions according to the passage.

66. Why did Zuckerberg create Facebook?
67. When did Facebook's users get to 7 million?
68. Who used Facebook mostly at the beginning?
69. Why was Zuckerberg offended by Yahoo?
70. How much was the value of Facebook estimated in 2007?

Section D (10 marks)

Questions 71—75 are based on the following passage.

Many people complain that their memory is bad, particularly as they get older. Phone numbers, names, facts we studied only a few days ago—life would be so much easier if we could remember them all effortlessly. So how can we improve our memory?

Many people think that repeating things is the best way to remember them. While this undoubtedly helps short-term memory, psychologists doubt whether it can help you to remember things for very long. The British psychologist E. C. Stanford seemed to prove this point when he tested himself on five prayers that he had read aloud every morning for over 25 years. He found that he could remember no more than three words of some of them! More helpful, especially for remembering numbers, is “chunking”, or grouping the information. The following numbers would be impossible for most of us to remember: 1492178919931848. But look at them in “chunks”, and it becomes much easier: 1492 1789 1993 1848.

So what about “memory training”? We have all heard about people who can memorize packs of cards by heart—how is this done and can anyone learn how to do it? According to experts, there are various ways of training your memory. Many of them involve forming a mental picture of the items to be memorized. One method, which may be useful in learning foreign languages, is to create a picture in your mind associated with a word you want to remember. For example, an English person wishing to learn “pato” (the Spanish word for “duck”) could associate it with the English verb “to pat”. Imagining someone patting a duck on the head would remind the learner of the Spanish word.

Another method is to invent a story that includes all the things you want to remember. In experiments, people were asked to remember up to 120 words using this technique; when tested afterwards, on average, they were able to recall 90 per cent of them.

However, not all of us are interested in learning long lists of names and numbers just for fun. For those studying large quantities of information, psychologists suggest that the best way to “form meaningful connections” is to ask yourself lots of questions as you go along. For example, if you were reading about a particular disease, you would ask yourself questions like: Do people get it from water? What parts of the body does it affect? And so on. This is said to be far more effective than time spent passively reading and re-reading notes.

Questions 71—75

Complete the summary with a maximum of two words from the passage for each blank, changing the form where necessary.

Repeating things is thought to be helpful for (71) _____. A British psychologist found that chunking or grouping the information was a good way to (72) _____. As to memory training, experts suggest three ways. First, (73) _____ associated with the words you would like to remember will be useful in learning foreign languages. Second, invent a story with the things you want to remember. Third, learn to ask yourself lots of questions to form (74) _____, which is said to be (75) _____ than to read and re-read notes.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Remember to write the answers on the answer sheet.

76. Chinese people return home for family reunions during the Spring Festival holiday by tradition. This has led to massive seasonal travel rushes in recent years as lots of people leave their hometown to seek work elsewhere, known as the Spring Festival travel rush. It is called the world's largest human migration. Major changes have taken place in the

last few decades that have made travel much smoother in the country. Although navigating the Spring Festival travel rush remains a challenge, the path has become less bumpy (颠簸的), less stressful and less time-consuming thanks to the rapid development of railway transportation.

Section B (10 marks)

Translate the underlined sentences in the passage into English by using the hints given in brackets. Remember to write the answers on the answer sheet.

77. 比尔·盖茨曾经向数千名美国大学毕业生提供了一些职业及生活的建议(offer)。作为世界上最富有的人,他在数十条推特中使用了“影响”、“幸福”、“进步”等词语,唯独没有提到“金钱”。78. 相反,他告诉毕业生,如果他从今天开始找,会找什么工作(宾语从句)。他写道。“79. 人工智能、能源和生物科学是有发展前景的领域,你在这些领域可以产生巨大的影响(where 引导的定语从句)。”从哈佛大学退学、创建了微软的盖茨当年表示,人工智能具有“惊人的”潜力,“与此相关的任何事情都将会是一个令人兴奋的终身职业”。在哥伦比亚大学的同一篇演讲中,他表示,能源部门开发出“可靠、廉价、清洁”能源的需求量有了大幅增长。

除了敦促新毕业生密切接触“挑战你的人,教你并推动你成为你最好的自己的人”,80. 盖茨还提醒他们要为别人着想,特别是不那么幸运的人(remind sb to do)。他写道,自己花了几十年时间来了解世界上最严重的不平等现象,并将缺乏对此的早期认识描述为他的一大遗憾。他还提到:“与我的同龄时期相比,你们知道得更多。81. 你可以更早地开始向不平等开战,无论是在街头还是在世界各地(whether ... or ...)。”

Part VI Error Correction (10 marks)

Proofread the passage as required. Each indicated line contains a maximum of one error. Correct the passage in the following ways: for a right line, put the sign “√” in the corresponding blank; for a wrong word, underline the wrong word and write the correct one in the blank; for a missing word, mark the position of the missing word with the sign “^” and write the word you believe to be missing in the blank; for an unnecessary word, cross the unnecessary word with the sign “\” and put the word with the sign in the blank. Write the answers on the answer sheet.

For example:

One of my favourite writers are Charlotte Brontë. She was born in the early

is

nineteenth century when women had far fewer opportunities ^ they have now.

than

She lived in a small village in Yorkshire and she took great pleasure in walking

√

on the moors ~~where~~ near her home.

where

When it is difficult to find space to build more houses and offices, we automatically build upwards—we build skyscrapers. Now, some farmers are farming upwards too.

Vertical farms save space by growing plants inside buildings on special designed racks. Each rack can hold many plants and this increases the amount of food produced. Hydroponics is a system where special water is giving to the plants, water which contains everything the plant needs to grow. In traditional farming, plants grow in the ground, and in vertical farms plants grow in pots and are only fed by special water. Some farmers have racks attached to elevators. Because the elevators are always moving, so the plants are always moving too. By this way the plants receive more sunlight and grow better.

82. _____

83. _____

84. _____

85. _____

86. _____

87. _____

88. _____

Vertical farming works well because farmers have full control for the growing conditions. They control temperature, food and water, so vertical farmers can grow plants all year round and almost anywhere in the world. Furthermore, vegetables grown in the city do not have to transported as far to reach the shops. This means the food is delivered fresher and with less transport, so there is more pollution.

89. _____

90. _____

91. _____

Part VII IQ Test (5 marks)

There are five IQ Test questions in this part. Write the answers on the answer sheet.

92. Translate the underlined phrase into Chinese.

Don't try to build models when you're feeling ill. You'll make a pig's ear of it.

93. Change one word so that the sentence makes sense. Write the word you are taking out first and then your new word on the line.

It was so hot last night that a tree in our garden was blown over.

94. A, B, C, D, E and F are six seaside resorts. A, C and F have promenades (走道), the others do not. B, D and F have a fun fair and a caravan park, whereas C has a caravan park only. The others have neither. B and C are the only resorts without amusements.

Which seaside resort has neither a caravan park nor a promenade? Which resort with amusements also has a promenade and a fun fair?

95. Which number should replace the question mark?

6	8	6	3
5	2	5	7
9	5	9	?

96. Sequence

Which of the following continues the above sequence?

Part VIII Writing (30 marks)

Section A (10 marks)

97. The following data are about Chinese people's reading situation in 2016. Write a report in 80—100 words based on the information in the charts on the answer sheet.

Figure I Per capita book read in 2016

Figure II Reading formats in 2016

Figure III Frequency of reading

Section B (20 marks)

98. Not every person is alike. Most people have very different talents. Some people think that having a lot of friends and being popular is more important, while others hold that getting top grades in school is more important. And there are also some people who think both are important.

What is your opinion of this? Write an essay in at least 120 words on the answer sheet.

91. less

Part VII IQ Test

92. 弄糟;搞砸
93. hot; windy
94. E; F.
95. 0. (每组成正方形的四个方块里的数字相加总和均是 21。)
96. B. (大的弧线每次逆时针旋转 45° , 而其他两个弧线则每次逆时针旋转 90° 。)

Part VIII Writing

Section A

97. Omitted.

Section B

98. Omitted.

作文评分标准:

一、评分原则:

1. 本题满分为 Section A 10 分;Section B 20 分,按四个档次给分。
2. 评分时,先根据文章的内容和语言初步确定其所属档次,然后以该档次的要求来衡量,确定或调整本档次,最后给分。
3. Section A 词数少于 100 词或多于 140 词的,Section B 词数少于 140 词或多于 180 词的,从总分中减去 2 分。
4. 如书写较差,以致影响阅卷,将分数降低一档。

二、各档次给分范围和要求

第四档(很好):Section A 9-10 分;Section B 16-20 分

完全符合写作格式的要求,覆盖多个内容要点,表达思想清楚,文字通顺,连贯性很好,基本上无词汇和语法错误。

第三档(好):Section A 6-8 分;Section B 11-15 分

基本符合写作格式的要求,有个别地方表达思想不够清楚,文字基本通顺、连贯,有少量词汇和语法错误。

第二档(一般):Section A 3-5 分;Section B 6-10 分

未恰当完成写作格式的要求,漏掉内容要点,表达思想不清楚,文字多处出现词汇和语法错误,影响了对写作内容的理解。

第一档(差):Section A 1-2 分;Section B 1-5 分

未完成写作格式的要求,明显遗漏主要内容,表达思想紊乱,有较多词汇和语法的重大错误,未能将信息传达给读者。

0 分

白卷;作文与题目毫不相关;内容太少,无法评判;所写内容无法看清。

2019 National English Competition for College Students

(Level D - Final)

听力录音原文

Part I Listening Comprehension

Section A

In this section, you will hear five short conversations. Each conversation will be read only once. At the end of each conversation, one question will be asked, and you have fifteen seconds to read the four choices marked A, B, C and D, and decide which is the best answer. Then mark the corresponding letter on the answer sheet with a single line through the centre.

1. W: Rob, could you do me a favour?

M: Of course. What do you need, Cindy?

W: Well, I'm going to be out of town for a few days and I was wondering if you could look after a few things for me?

M: Like what?

W: Well, I've cancelled my mail, so you won't have to pick that up. But could you take care of my dog and goldfish and water my plants for me?

M: Of course. That's what neighbours are for.

Question: What doesn't Rob have to do while Cindy is out?

2. M: Kelly, have you decided on your wedding date yet?

W: No. We can't agree on anything!

M: What are the possibilities?

W: Well, I would like to get married in October, because I've always wanted a fall wedding. But Josh thinks it would be easier for people to travel and attend in August. My parents want it to be in December, because they think the snow would be pretty. Josh's pick is the most reasonable one, though, so we'll probably go with that.

Question: When will Kelly and Josh probably hold their wedding?

3. W: What are you working on, Sean?

M: Hey, Megan. I'm working on my resume. But it's not going very well.

W: Why do you say that?

M: Well, I've got a lot of years of experience and earned really good grades throughout college. However, I don't have a lot of extracurricular activities.

W: So what?

M: I've heard employers like people who have a balanced life with unique hobbies and interests.

Question: Why is Sean worried about his resume?

4. M: More than six million people live in Santiago, the capital of Chile. Many people work non-stop from morning until afternoon, like in most countries. But the tradition of nap is still important in Chile and many people feel that a break or a short nap is a good idea in today's busy world.

W: I think it's important to take a nap, especially during work hours, which is a time when people feel a lot of stress.

Question: What does the woman think of a nap?

5. M: Did you hear that James got into Boston University's School of Graduate Studies for philosophy? He's starting classes in September.

W: Yes, I did. I also heard he got a full scholarship. They're even paying for his apartment and giving him money for books and food.

M: That sounds unbelievable!

W: Well, but I guess he would be happier if he'd got into Columbia University.

M: That was his first choice. Actually he was also accepted by Princeton but they didn't give him a full scholarship, so he gave it up.

W: Well, anyway, he should feel quite contented.

Question: Why didn't James choose to go to Princeton?

Section B

In this section, you will hear two long conversations. Each conversation will be read only once. At the end of each conversation, there will be a one-minute pause. During the pause, read the questions and make your answers on the answer sheet with a single line through the centre.

Conversation One

Listen to the conversation, and mark each statement as either true (T) or false (F) according to what you hear.

W: Fires burn through the Indonesian countryside, spreading thick smoke across parts of the country. Do you know what has caused them?

M: As far as I know, they aren't due to extreme weather or any other natural phenomenon, but are instead part of a man-made process called slash and burn. This process of cutting down and burning trees in order to plant new crops is used by many countries.

W: Unfortunately, these fires produce thick smog that causes numerous negative health effects, which in turn has disrupted flights and forced the closure of schools in certain regions.

M: Yes. And we cannot be sure how long the school will be closed. Every two days we are updated on the situation by the state's Education Department and determine whether or not to reopen the school.

W: Visibility in these conditions is poor—around only 80 metres—and flights to and from the city's airport have either been delayed or canceled.

M: Yes. So far, there have been no arrivals or departures today. Of the 74 flights scheduled for today, 19 have been canceled. As a tour agent, I feel disappointed as many tour groups have ended up canceling their trips.

W: The negative health effects of this blanket of smog cannot be underestimated, either. In South Sumatra, one of the main centres of the fires, 22,585 cases of acute respiratory tract infections have been reported in just a few days.

M: Countries use slash-and-burn techniques every year, causing similar health problems and disruption to everyday life. I think current laws are not strict enough to prevent this from happening.

Conversation Two

Listen to the conversation. Then read the four choices marked A, B, C and D, and decide which is the best answer according to what you hear.

M: Psychologist Dr Evans has recently published a book entitled Anger Management. She has come on our show today to highlight the most important points of her new book. Welcome, Dr Evans.

W: Thank you. I'm happy to be here.

M: How long have you been writing this book?

W: In a sense I've been writing it since I became a psychologist twenty years ago. This book is based on all the research I've done throughout my career and on my experiences with patients. But I officially began writing it about two years ago, and it just came out in bookstores last month.

M: Now could you tell us about some of the most important points in the book?

W: One very important point I make at the beginning is actually hardly psychological, but rather sociological.

M: Interesting. And what's that?

W: Anger is not a bad thing. In modern society we view anger as something negative, something we want to avoid. That's a dangerous misconception. Anger is an emotion and we wouldn't be human if we didn't feel it. In fact, many sociologists and community organizers strongly promote that we accept anger in society because it's a strong sign that something is wrong. They say if we use our anger to drive us to improve society and ourselves, then anger can be a very good thing. However, this is easier said than done.

M: I see.

W: And therefore, what I concentrate on is the type of anger people get and how they express it. In other words, how they manage it.

M: What effect does inappropriate expression of anger have on people?

W: That depends on the person. But one common inappropriate way of dealing with anger is to bottle it up. This is something I blame on modern society. It's more acceptable for people to always be calm and coolheaded. Therefore, these people who follow this social norm instead of accepting their anger really suffer. This can lead to physical symptoms such as headaches and hypertension. Psychological symptoms of bottling up anger could be persistent violent thoughts or even nightmares.

Section C

In this section, you will hear five short news items. Each item will be read only once. After each item, there will be a fifteen-second pause. During the pause, read the question and the four choices marked A, B, C and D, and decide which is the best answer. Then mark the corresponding letter on the answer sheet with a single line through the centre.

16. According to Business Insider, “Research suggests cats mirror our behaviour and mood. If you’re anxious, this could mean your cat is more fearful and overweight. People with dark personality traits are also more likely to have cats who bully others.” Many have theorized that this occurs because they are surprisingly aware of humans’ emotions. Cats pick up on emotional gestures.
17. A growing number of Earth’s insect populations now exist only in collections in museums. A new review of over 70 studies of insect populations suggests that human pressures are causing insect populations to decrease by as much as a quarter every decade. Their collapse is being driven by human activities, everything from traffic to industrial farming and pesticides to light pollution.
18. According to CNN.com, “Childhood obesity continues to rise around the world”, and the World Health Organization has called it “one of the most serious public health challenges of the 21st century.” A university assistant professor in New York who has studied childhood obesity on a global scale, wanted to clarify: “There are still more children that are underweight in the world than there are obese, but that’s likely to change pretty soon.”
19. To recruit more American students in STEM fields, the White House five-year strategic plan tries to remove social and financial barriers to a rewarding education and technical fields. University of District of Columbia’s Engineering School’s Dean believes many students avoid STEM because they think they have better options. They see opportunities in sports, philosophy or history or arts. Some experts believe that to compete with countries like China and India, the country needs to encourage STEM education at young age.
20. China will take a host of measures to boost development of traditional Chinese medicine (TCM), according to a statement issued by the National Administration of Traditional Chinese Medicine. The administration vowed to further regulate TCM health care services, and to greatly improve the capacity and system of technological innovation in TCM. Efforts will also be made to further standardize the TCM industry and expedite the fourth national survey on medicinal resources in the country. Standards should be worked out for establishing overseas TCM centres, so as to expand foreign exchanges and co-operation in TCM.

Section D

In this section, you will hear two short passages. The passages will be read twice. After each passage, there will be a thirty-second pause. During the pause, write the answers on the answer sheet.

Dictation

Listen to the passage. For questions 21—25, fill in the blanks with the exact words or phrases you hear.

We are very often impressed and excited by amazing predictions made by scientists regarding our future: how we will travel, how we will spend our free time, how we will eat and so on. Apparently before long we will have gadgets that let you watch TV while navigating in your auto-pilot car which also makes coffee and sandwiches as you travel to the station. There you will catch an air-train, which flies along a rail without touching it and breaks the speed of sound. It would be interesting to be around in 150 years to see how many of these predictions are accurate, but for the moment we can content ourselves with some past predictions

about how technology will improve or not.

Some of the most important inventions affecting our lives concern travel, and one of these is the aeroplane. We will soon all travel by gigantic flying shopping centres according to some experts, but was everyone convinced by the aeroplane back in the beginning? Some people believed that the aeroplane would just never happen.

For example, Mr Simon Newcomb declared that flight by machines heavier than air is insignificant and utterly impossible. Eighteen months later the Wright Brothers flew. Another who believed it was impossible was Lord Kelvin. He should have known better, being a mathematician, physicist and president of the British Royal Society.

The brilliant inventor Thomas Edison turned out to be a little short-sighted when looking at the sky: he declared in 1895 that the aeroplane's possibilities were finished and that it was better to research something else.

Summary

Listen to the passage. For questions 26—30, complete the notes using no more than three words for each blank.

The mind of an elephant should not be underestimated. They are brilliant creatures blessed with both excellent memory and artistic talent. Elephants each consume approximately 495 pounds of vegetarian food a day. They spend about 16 hours a day eating, but must walk about 4 miles a day in search of food. This extreme need for food is a huge burden to the elephants. The average elephant lives approximately 70 years, and its sharp memory allows it to remember locations where it has found food as long as thirty years earlier, even as a baby.

In an elephant's travels, they come across other elephants also looking for food. Some elephants are friendly, and some are not so nice. Elephants remember every elephant they have ever met. They can even recognize an elephant they perhaps haven't seen for thirty years. They immediately remember whether this elephant is a threat or a potential friend.

When elephants are not searching for food, they sometimes produce art in the sand with their trunks. They seem to enjoy just relaxing and painting in the sand. One day, an elephant zoo-keeper noticed this and gave an elephant a paint brush filled with red paint to see what it would do. The zoo-keeper put a canvas on the ground to see if the elephant would paint on it. Sure enough, it did, and since then elephants in most zoos have been given paint brushes, paints, and canvases. The resulting abstract art has been sold for high prices around the world. The funds go to support feeding the elephants in the zoos. Most felt that the elephants were only capable of painting abstracts. However, they have been trained to paint trees, flowers, and other items in nature. This has enabled us to understand "elephant genius" even more.

This is the end of the listening part. Please transfer your answers to the answer sheet.

很多同学在备考大英赛时常有一种无力感，因为大英赛不像其他的英语考试，它范围广、题量大、获奖排名制。这就使大家在备考大英赛时没有头绪。

该从哪儿学起？该学什么内容？该怎么准备考试？

针对这些问题，英伽教育经过多年的课程迭代更新，为大家制定了一套完美的备考方案。

大英赛全程班

【学、练、测、评、答】五个维度助力获奖

【学】共 150H 的课程，覆盖各题型知识点和技巧

【练】每次课后打卡练习，巩固当天所学知识内容

【测】三次考前模拟测试查漏补缺，检验学习成果

【评】为三次模考提供翻译和写作的人工评阅服务

【答】特等奖助教每天群内答疑，一直持续到考前

可以看到咱们的课程解决了自己备考的弊端，帮助大家解决学什么、学了怎么用、学完有什么效果、不会的怎么办等问题，绝对比自己备考更高效。

觉得自己难以坚持，不知道该从哪儿学起的话，可以选择咱们的全程班，跟随课程学习哦~

英伽教育
备战2023年
大英赛全程班
五大课程模块全场景教学 六项课后服务全能陪伴

- 五步阶梯 登顶获奖 -

- 学** 150小时课程时长，七大题型技巧详解
- 练** 七十余次课后练习，学有所得熟练运用
- 测** 入门测试了解短板，考前模拟查漏补缺
- 答** 特等奖助教群内答疑，有问必答解决难题
- 评** 模考写译人工批改，重点突破稳拿高分

售价：499元
随到随学 服务至初赛结束
