

2020 年全国大学生英语竞赛决赛(D 级)

2020 National English Competition for College Students (Level D – Final)

(Total: 150 marks Time: 120 minutes)

Part I Listening Comprehension (30 marks)

Section A (5 marks)

*In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

1. A. The principal. B. The school board. C. The woman. D. The students.
2. A. \$ 40. B. \$ 60. C. \$ 80. D. \$ 100.
3. A. He ignores the information in the textbook.
 B. He doesn't encourage group discussions.
 C. He refuses to listen to the students' opinions.
 D. He doesn't conduct the class discussions well.
4. A. To discover resources for use on Earth.
 B. To see whether there is life on other planets.
 C. To find out about the origin of our planet.
 D. To establish a colony on Mars for humans.
5. A. He greeted everybody on the way.
 B. He wore two different-coloured boots.
 C. He wore a strange-looking hat.
 D. He pushed his bike instead of riding it.

Section B (10 marks)

In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause. During the pause, read the questions and make your answers on the **answer sheet** with a single line through the centre.

Conversation One

Listen to the conversation, mark each statement as either true (**T**) or false (**F**) according to what you hear.

6. The woman offered the definition of a particular theory about memory.
7. According to the man, the smaller the animal is, the better the memory.
8. The female wasp was outside the nest when the researchers did the experiment.
9. The wasp noticed the change after the researcher moved the circle of pine cones.
10. The experiment indicates that even small insects have some kind of memory.

Conversation Two

Listen to the conversation, mark each question as **A**, **B**, **C** or **D** according to what you hear.

11. What are the speakers mainly discussing?
 - A. How the student can use the campus libraries.
 - B. How graduates can continue attending lectures.
 - C. Why non-students are not allowed in the library.
 - D. Why the student cannot graduate as scheduled.
12. What does the librarian suggest the man put in his application form?
 - A. The title of the project he is working on.
 - B. The time he needs to work in the library.
 - C. The contact number of the professor he is working with.
 - D. The type of services he needs in the library.
13. What do we learn about the man from the conversation?
 - A. He has already graduated.
 - B. He lost his library card.
 - C. He is applying for a research project.
 - D. He knows nobody in the university campus.
14. Why does the man need to use the university library?
 - A. He wants to save money for his research project.
 - B. He is working on an independent study project.
 - C. He is taking some difficult courses this semester.
 - D. He needs to finish a research project before graduation.

15. What does the man think of the amount of money he has to pay?
- A. It is unfair. B. It is too much. C. It is reasonable. D. It is no big deal.

Section C (5 marks)

*In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the **four** choices marked **A**, **B**, **C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

16. What do we learn from the news item?
- A. The experiment of baking cookies inside the International Space Station wasn't successful.
B. The cookies baked inside the International Space Station tasted sweeter than those baked on Earth.
C. The time for baking cookies inside the International Space Station was six times that on Earth.
D. The cookies baked inside the International Space Station were not as delicious as those baked on Earth.
17. How is the government of Luxembourg going to tackle the country's traffic jams?
- A. People can use all public transport for free.
B. More main roads are planned for construction.
C. Personal cars aren't permitted to be on the road.
D. More traffic lights will be installed at crossroads.
18. Which of the following are NOT shown in the exhibition?
- A. Paintings and textiles. B. Sculptures.
C. Wearable art. D. Old books.
19. What warning was announced by the International Olympic Committee in January?
- A. Making hand signs and bending down on one knee are forbidden during competitions.
B. Coaches and athletes must not carry their national or regional flags during competitions.
C. During medal-awarding ceremonies winners cannot refuse to appear on the stage.
D. No physical violence or verbal abuses are allowed throughout the Games.
20. Why does the programme mainly target original works of active literary and artistic workers under the age of 45?
- A. It wants to encourage workers who are creative and productive.
B. It wants to put more vigor into literary and artistic creation.
C. These workers have much greater literary and artistic talent.
D. These workers have more outstanding literary and artistic works.

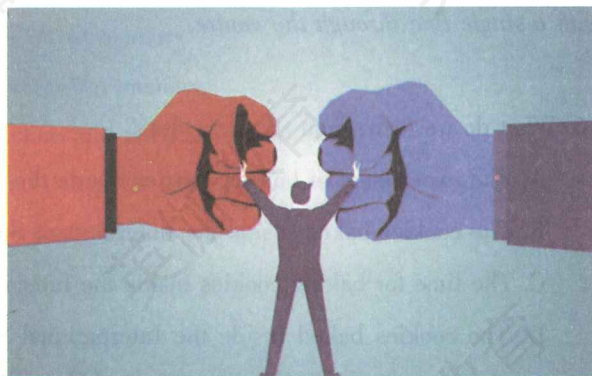

Section D (10 marks)

In this section, you will hear **two** short passages. The passages will be read only **once**. After each passage, there will be a **one-minute** pause. During the pause, write the answers on the **answer sheet**.

Dictation

Listen to the passage. For questions 21—25, fill in the blanks with the **exact words or phrases** you hear.

Obviously conflict is an important part of human relations, it's something we can't avoid when we have dealings with other people. Other people (21) _____ do things that upset us, or say things that we disagree with. So it's not a question of avoiding conflict; it's how we deal with it. That's important for our long-term mental health.

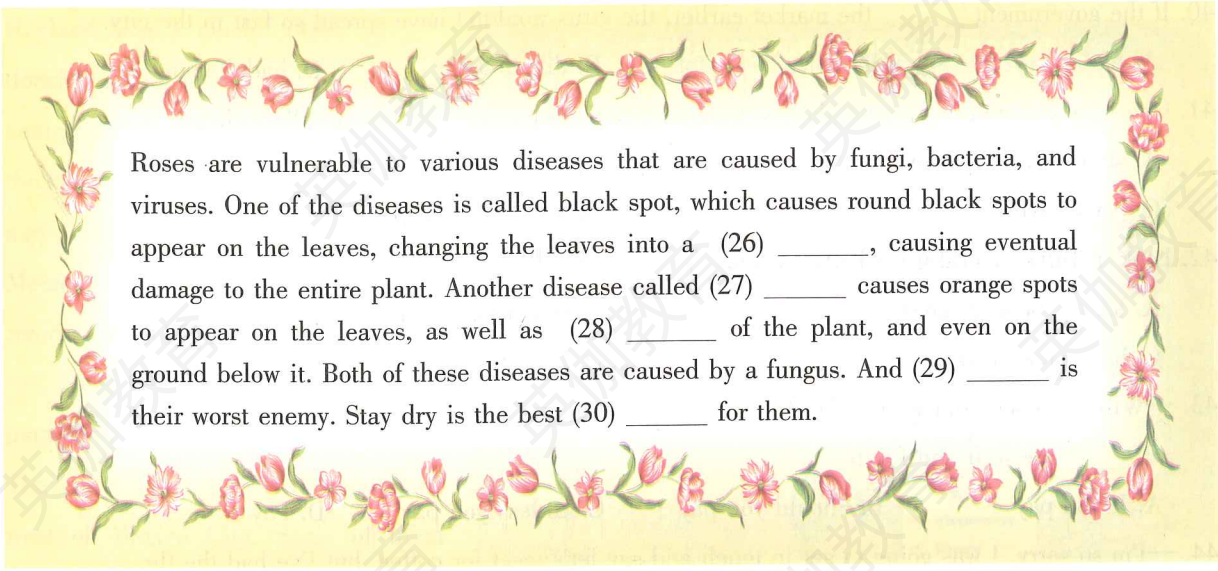

There are basically three reactions. Firstly you can do nothing. This is what I call the “passive” response. This may sometimes be a good idea, for example, if you're faced with a difficult or violent person. Doing nothing may help him or her to calm down. But there are lots of disadvantages if you always avoid conflict, too. You are saying “my opinion is not worth anything” and some people will (22) _____ what they see as your weakness.

The second reaction to conflict is (23) _____. This is what I call the “aggressive” response. It's what happens when you can't control your emotions, and you begin to shout at people or dominate them in other ways. It's useful in (24) _____, or when you need to give orders, but most of the time it's just unkind or selfish. Most people don't like being bullied, and you will end up losing your friends if you are not careful.

The third reaction to conflict is to (25) _____ it and put forward your own views. It's called the “assertive” response. If you have a viewpoint, and you feel strongly about what someone has done, you have the right to let the other person know how you feel, and so has the other person. If you and the other person can both walk away from the discussion feeling that you have put forward your points of view and listened to the other person's views, then you will both feel good about it, and there won't be bad feelings between you.

Summary

Listen to the passage. For questions 26—30, complete the notes using **no more than three** words for each blank.

Roses are vulnerable to various diseases that are caused by fungi, bacteria, and viruses. One of the diseases is called black spot, which causes round black spots to appear on the leaves, changing the leaves into a (26) _____, causing eventual damage to the entire plant. Another disease called (27) _____ causes orange spots to appear on the leaves, as well as (28) _____ of the plant, and even on the ground below it. Both of these diseases are caused by a fungus. And (29) _____ is their worst enemy. Stay dry is the best (30) _____ for them.

Part II Vocabulary & Grammar (15 marks)

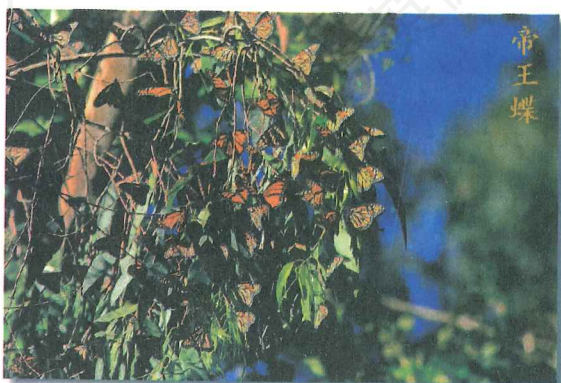

There are 15 incomplete sentences in this section. For each blank there are **four** choices marked **A, B, C** and **D**. Choose the one that best completes the sentence. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

31. President Xi Jinping was given a very warm _____ by the people who were waiting for him to arrive at the airport.
A. invitation B. reception C. recognition D. collection
32. You should know that you are not _____. If you are not good at your job, the company will fire you.
A. indifferent B. unnecessary C. unpredictable D. indispensable
33. Yale university's distinguished faculty includes many _____ have been trained or educated abroad and many _____ fields of research have a global emphasis.
A. that; which B. who; those C. which; whose D. who; whose
34. _____ have I seen such a talent in math. His abilities are amazing.
A. Rare B. Seldom C. Scarce D. Little
35. —What's happened to Jane?
—Coming back from work, _____ down by a car.
A. she been knocked B. she knocked C. she was knocked D. she was being knocked
36. Now that you have found a new job you cannot possibly come to the beach tomorrow, _____?
A. have you B. can't you C. haven't you D. can you
37. Ellen, I know it wasn't your fault, so stop apologizing _____ to my poetry reading.
A. you don't come B. don't come C. for not coming D. not coming
38. As the exam date _____, more and more students began attending weekly review sessions.
A. drew near B. filled in C. went over D. came down
39. When you sign up for a conversation partner, the teacher will _____ with a native English speaking student.
A. come up B. hook you up C. put up D. wrap you up

40. If the government _____ the market earlier, the virus wouldn't have spread so fast in the city.
A. had shut B. shut C. didn't shut D. hadn't shut
41. One in ten candidates passed the recruitment examination. It _____ dreadfully difficult.
A. shouldn't have been B. would have been
C. can't have been D. must have been
42. Look at Bill's beautiful garden! He must _____.
A. have a heart of gold B. pay through the nose
C. have green fingers D. keep his chin up
43. —Will you come and work for us?
—_____ me well and I will.
A. If you pay B. Should you pay C. Unless you pay D. Pay
44. —I'm so sorry. I was going to get in touch and say let's meet for coffee, but I've had the flu.
—_____ I'll meet you next week. Just say where and when!
—Well, I'd like to suggest the Café Nero near your university.
—Fine!
A. It's so fabulous. B. Don't worry. C. You're the best. D. That's too bad.
45. —I'm shooting for the moon. By the time I'm 40, I'll have set up my own business, and I'll be earning a fortune.
—Wow! You've really got your future figured out!
—Yeah, I simply won't consider failure.
—_____
A. I envy you your success. B. Do you enjoy your work?
C. I admire your confidence. D. How do you cope with your work?

Part III Cloze (10 marks)

Read the following passage and fill in each blank with **one** word. Choose the correct word in one of the following **three** ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the **answer sheet**.

In early fall, before the winter cold sets in, delicate black and orange monarch butterflies leave the milkweed fields and patches where they hatched. As they fly to their warm winter homes, they fill the sky (46) _____ their colourful midair displays.

The monarchs that live west of the Rocky Mountains (47) mig_____ to winter homes along the California coast. Monarchs that live east of the

Rockies face a much (48) _____ (long) flight. Their winter home is in central Mexico. Monarchs starting near the Great Lakes in the United States may travel 2,500 miles to reach Mexico. They cross lakes, plains, rivers, and mountains.

By November, millions of eastern monarchs are in their winter homes. They nest in forests in the mountains west of Mexico City. Some of them have returned to the very same tree (49) _____ their “great-grandparents”

were in years before. The new generation of monarchs (50) _____ (settle) in the trees in such large numbers that the trees seem made of butterflies. They are such a popular (51) att_____ for tourists that visitors are advised to visit midweek to avoid crowds.

By winter's end the monarchs head back to their summer homes. The females (52) l_____ eggs on plants along the way. The life cycles of the monarchs are almost complete. Some will reach their places of birth before they die. Others will die (53) al_____ the way. Even if they don't make it back, their “children” will continue the journey back to the starting point. There the cycle begins again.

No one knows how these (54) _____ (fascinate) insects find their way across long distances to their places of birth or winter homes. Maybe they have a built-in compass, (55) _____ some scientists suspect. Maybe they just know how to follow the sun. Only time and research will tell.

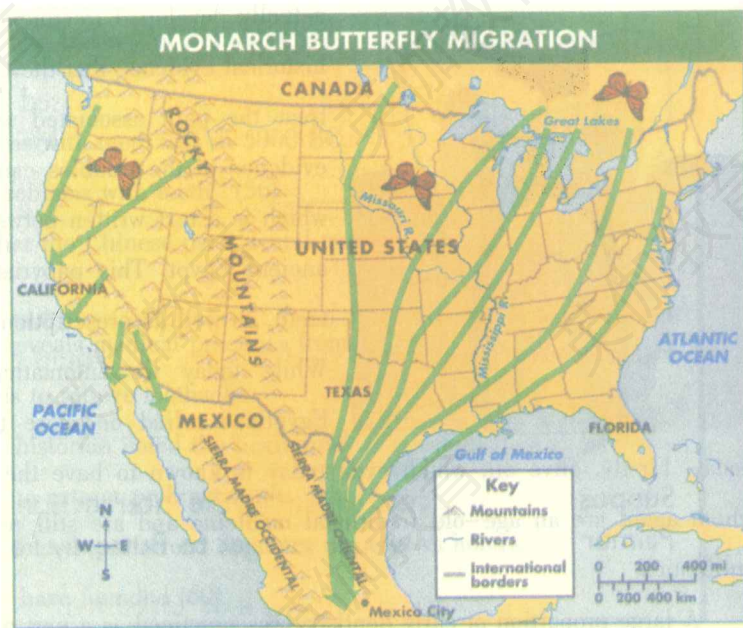

Part IV Reading Comprehension (30 marks)

There are **three** passages in this part. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the **answer sheet**.

Section A (10 marks)

Questions 56 to 60 are based on the following passage.

Skulls of the Cro-Magnon people who inhabited the Earth 25,000 years ago show evidence of tooth decay and the earliest recorded mention of oral disease was in 5000 BC. This proves that oral disease is by no means a modern-day problem and has in fact plagued humans since time began. That particular reference appeared in a text written by the ancient people of Sumeria, which referred to “tooth worms”. There is also evidence that dental problems caused difficulties in other early civilizations and people from those times

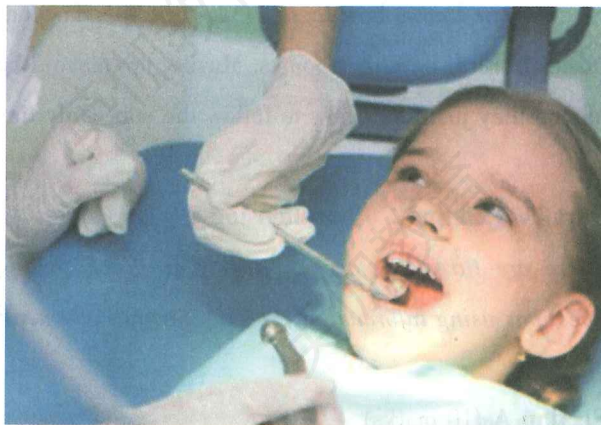

actually developed treatments for them. For example, we have found historical evidence that the Chinese used *acupuncture* (针灸疗法) to treat the pain associated with tooth decay. There is even further evidence of the troubles caused by toothache in the *Ebers Papyrus*, which is a text written between 1700 and 1500 BC by the people of ancient Egypt. This papyrus contains references to diseases of the teeth, as well as prescriptions for medications they used at that time. While today we automatically prescribe antibiotics, the ancient Egyptians relied on more traditional remedies to help with tooth

decay. Firstly, olive oil, which even today is known to have therapeutic qualities, and secondly, onions, which again are an age-old traditional medicine and are still recognized as a reliable source of natural antibiotics.

A large proportion of early dentistry was practiced as a part of general medicine. However, by the fifth century BC, Herodotus, a Greek historian, made the following observation: "In Egypt, medicine is practiced on a plan of separation—each physician treats a single disorder and no more. Some undertake to cure diseases of the eye, others the head and others again, of the teeth." The Greeks were at the forefront of dentistry of that time and it was a Greek physician who lived between 1300 and 1200 BC who chose to extract problem teeth long before anyone else. Arabs were also pioneers in the area of oral hygiene and used a small polishing stick as a toothbrush as early as 100 BC.

What of Europe? Well, throughout the Middle Ages, dentistry was made available to the wealthier classes thanks to physicians who would visit individuals in their home, while dentistry for the poorer people took place in the market place. Italian sources from the 1400s mention the use of gold leaf as dental filling material, but it was a Frenchman, Pierre Fauchard, who is credited with being the father of modern dentistry, thanks to his book *The Surgeon Dentist: a treatise on teeth*, which describes basic oral anatomy and the signs and symptoms of tooth decay.

Questions 56 to 60

Fill in the blanks below with information from the passage, using **no more than three** words for each blank.

The history of dentistry

Early history

- The earliest reference to problems with teeth was in 5000 BC.
- The ancient Sumerians called problems with teeth "(56) _____".
- There is (57) _____ to show that the Chinese used dental treatments.

Remedies and treatments

- An old text from (58) _____ reveals medical practices from 1700 to 1500 BC. The text refers to the use of olive oil and onions to relieve toothache.
- In the fifth century BC a Greek historian noted the beginnings of specialization in medicine.
- A Greek physician was the first to extract problem teeth.
- In Europe during (59) _____, doctors performed dentistry in people's homes.
- A dentist from France is said to have founded (60) _____.

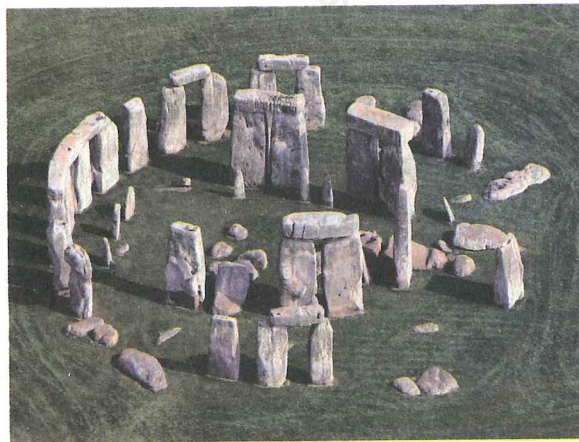

Section B (10 marks)

Questions 61 to 65 are based on the following passage.

Stonehenge is probably the most important prehistoric monument in the whole of Britain and has attracted visitors from earliest times. It stands as a timeless monument to the people who built it. The Stonehenge we see today is the final stage that was completed about 3,500 years ago, but first let us look back 5,000 years.

The first Stonehenge was a large earthwork or Henge, comprising a ditch, bank, and the Aubrey holes, all probably built around 3100 BC. The Aubrey holes are round pits in the chalk, about one metre wide and deep, with steep sides and flat bottoms. They form a circle about 284 feet in diameter. Excavations have revealed cremated human bones in some of the chalk fillings, but the holes themselves were probably made, not for the purpose of graves, but as part of the religious ceremony. Shortly after this stage Stonehenge was abandoned, left untouched for over 1,000 years.

The second and most dramatic stage of Stonehenge started around 2150 BC. Some 82 bluestones from the Preseli Mountains in south-west Wales were transported to the site. It is thought these stones were dragged on rollers and sledges to the headwaters on Milford Haven and then loaded onto rafts. They were carried by water along the south coast of Wales and up the rivers Avon and Frome, before being dragged overland again to near Warminster in Wiltshire. The final stage of the journey was mainly by water, down

the river Wylde to Salisbury, then the Salisbury Avon to west Amesbury. This journey covers nearly 240 miles. Once at the site, these stones were set up in the centre to form an incomplete double circle.

The third stage of Stonehenge, about 2000 BC, saw the arrival of the Sarsen stones, which were almost certainly brought from the Marlborough Downs near Avebury, about 25 miles north of Stonehenge. The largest of the Sarsen stones transported to Stonehenge weigh 50 tonnes and transportation by water would have been impossible, the stones could only have been moved using sledges and ropes. Modern calculations show that it would have taken 500 men using leather ropes to pull one stone, with an extra 100 men needed to lay the huge rollers in front of the sledge. These were arranged in an outer circle with a continuous run of lintels. Inside the circle, five trilithons were placed in a horseshoe arrangement, whose remains we can still see today.

The final stage took place soon after 1500 BC when the bluestones were rearranged in the horseshoe and circle that we see today. The original number of stones in the bluestone circle was probably around 60, these have long since been removed or broken up. Some remain only as stumps below ground level.

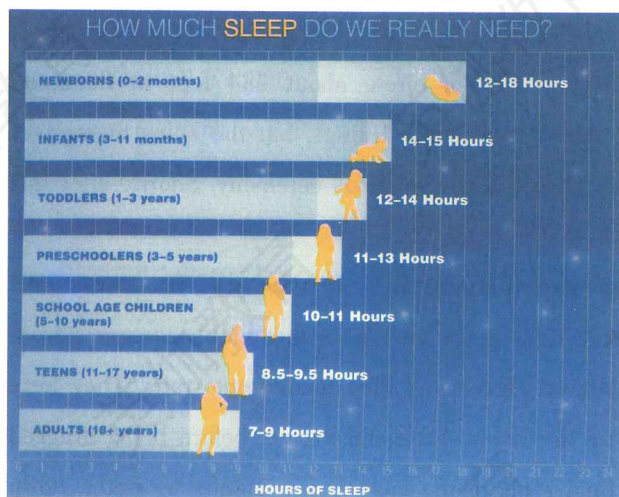

Questions 61 to 65

Answer the following questions with the information given in the passage.

61. What was the first Stonehenge made of?
62. What were some of the chalk fillings made for?
63. What shape did the stones form in the second stage?
64. How were the Sarsen stones transported to Stonehenge?
65. How many bluestones were rearranged in the final stage?

Section C (10 marks)

Questions 66 to 70 are based on the following passage.

We have all had restless nights when we couldn't get to sleep—and have suffered the next day as a result. Sleep experts say the average adult requires seven to nine hours of sleep per night; in fact, anything less could harm our health.

In spite of the importance of sleep, many people are not getting enough. For example, Americans sleep one hour less per night on average than they did 20 to 30 years ago. "The dependency on caffeine and the whole Starbucks

culture is certainly one proof that our society is sleepier than ever before,” says William Dement, a sleep researcher at Stanford University. Sleep is a biological need, much like food and water. If totally deprived of shut-eye, humans ultimately perish. Yet millions of people are increasingly *skimping* (舍不得花) on their sleep.

Why has sleep deprivation become such a big problem? There are a couple of possible reasons. Researchers say that today’s sleep deprivation is partly due to modern expectations. These days, consumers expect information, entertainment, and food to be available round-the-clock. One of the results of this 24/7 culture is that consumers stay awake longer and later than they used to. Consequently, workers who provide us

with goods and services can’t stop working when the sun goes down. In addition, the fast-paced and competitive world of business often rewards employees for arriving at work early and staying late. As a result, many employees are willing to skip sleep in order to impress the boss.

Sleep deprivation can have a significantly detrimental impact on our performance, however. According to Charles Czeisler of Harvard University, staying awake for 24 hours or sleeping only five hours a night for a week is like having a blood-alcohol level of 0.1 percent. This is well above the legal limit for safe driving in most countries. Most people probably wouldn’t get drunk before going to work or taking an exam; but if they are sleeping an average of five hours a night, they may be working, studying, driving and making decisions as though they are intoxicated.

Sleep deprivation can result in poor grades or poor performance at work. In some cases, it can even have more dangerous effects. The US Institute of Medicine reports that almost 20 percent of car accidents happen because drivers are sleepy.

Sleep deprivation can be a particularly grave problem in the medical profession. In 2007, Czeisler researched the habits of 2,700 first-year medical residents. Most of these residents worked for extremely long periods, some working 30-hour-long shifts twice a week. Many admitted that fatigue had had severe consequences on their performance and treatment of patients.

We all know that we need sleep, but sleep deprivation continues to be a widespread problem around the world. To many people, the ability to function without much sleep is something to brag about. However, sleep is crucial to our well-being and our performance. It may be time to wake up and change our perspective on sleep.

Questions 66 to 70

Complete the summary below with information from the passage, using **no more than three** words for each blank.

According to sleep experts, sleep is crucial to our health and performance. Nowadays sleep deprivation is very common because of (66) _____. One is 24/7 culture, and the other is fast-paced and competitive world of (67) _____. People want information, entertainment and food 24 hours a day, and employees reward for (68) _____ work early and staying late. Sleep deprivation can lead to a lot of poor performance. For example, students get (69) _____ grades, drivers cause more (70) _____, and nurses and doctors make more medical mistakes. It's time to acknowledge that lack of sleep is a significant problem.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Remember to write the answers on the **answer sheet**.

71. Confucianism is an early collection of ethics and social and philosophical ideas that are based upon the teachings of the ancient Chinese philosopher Confucius. The basic idea of Confucianism is how each person can participate in creating a peaceful, well-organized society. Confucianism stresses the importance of individual relationships, basically, how people relate to each other in terms of their place in society. Confucianism actually discourages seeking profit—Confucius said that it led people to do wrong to other people. That idea wouldn't be a good thing to apply to a business.

Section B (10 marks)

Translate the underlined sentences in the passage into English by using the hints given in brackets. Remember to write the answers on the **answer sheet**.

远程办公,也称为在家办公或电子通勤。

72. 它是员工在办公室外的一种工作安排,通常是在家或离家近的地方工作(定语从句)。但有些工作必然还是不能在家做的。有数以千万计的涉及各种技能的职位都不适合远程工作,如:建筑工人、法官、医生、牙医,以及世界上无数的其他各种医疗工作者。

为什么要远程办公? 远程办公的存在必然有它的好处与适宜的人群。

73. 远程办公(telecommuting)使得员工在工作时间和工作地点两方面有着更大的自由(regarding)。员工可以更灵活地平衡工作和个人事务。

74. 在家工作通常可以让你更有效率,因为没有办公空间的干扰(distraction)。当然,如果你很容易被诸如发出噪音的洗衣机之类的家用电器分心,或者你是一个真正需要老板监督才能专心工作的人,那么你在家工作的效率不一定会高。想要在家高效工作有时需要划分你的住所——在其中划出一个远离舒适的沙发、床、电视的空间(用来工作)。

2015 年, 斯坦福大学经济系教授 Nicholas A. Bloom 带领团队, 在 *The Quarterly Journal of Economics* 上发表了一项针对中国某大型网上旅游平台员工在家办公效率的研究。他们发现:在家办公产生了 13% 的绩效提升,其中 9% 来自每班工作更多分钟(更少的工作间休息、更少请病假);75. 4% 来自每分钟更多的通话,这归因于更安静和更方便的工作环境(attribute to)。

允许员工远程办公通常会提高他们的工作效率,这对公司有利。76. 远程工作者在工作中也可能更快乐,因此更可能留在公司(be likely to do)。远程办公甚至为公司节省了办公开支。

Part VI Error Correction (10 marks)

Proofread the passage as required. Each indicated line contains **a maximum of one** error. Correct the passage in the following ways: for a right line, put the sign “✓” in the corresponding blank; for a wrong word, underline the wrong word and write the correct one in the blank; for a missing word, mark the position of the missing word with the sign “^” and write the word you believe to be missing in the blank; for an unnecessary word, cross the unnecessary word with the sign “\” and put the word with the sign in the blank. Write the answers on the **answer sheet**.

For example:

One of my favourite writers are Charlotte Brontë. She was born in the early
nineteenth century when women had far fewer opportunities ^ they have now.
She lived in a small village in Yorkshire and she took great pleasure in walking
on the moors ~~where~~ near her home.

is
than
✓
~~where~~

Next time you are in a lift, look for the name of the company that made it. Chances are it is the
Otis Elevator Company. It was Elisha Otis who invented the gadget which made 77. _____
the modern passenger lift possibly. The concept of elevation was already well 78. _____
established. Louis XV of France disliked stairs very much that he was regularly 79. _____
hoisted skywards in a “flying chair” by several strong men hauling on ropes.

At Otis's time, warehouses commonly used moving platforms to transport goods 80. _____
 between floors. However, elevating anything further than one floor or weighing
 more than 71 kilogram would have been considered far too dangerous. 81. _____

Otis worked for a bed manufacturer who was keen to expand his business but needed
 to find a way to move his beds to an upper floor for a storage. The inventive 82. _____
 Otis soon had a solution to the safety problem: a tough steel spring system
 that meshed with ratchets on neither side of the lift shaft so that if the rope 83. _____
 gave way the sudden loss of tension would trigger the device, stopping the lift from falling.

At the 1854 World Trade fair in New York, Otis unveiled his invention and
 orders began to pour, including one from the United States Assay Office which 84. _____
 at that time was constructing one of the first buildings with an internal steel frame
 to support the exterior walls. This was the same construction method that skyscrapers
 would use. If not for lifts, the towering landmarks which feature so prominent 85. _____
 in today's architecture would have been impossible and the character of our cities 86. _____
 would be entirely different.

Part VII IQ Test (10 marks)

There are **five** IQ Test questions in this part. Write the answers on the **answer sheet**.

87. Her novels reflect her background, highly allusive and in style. They draw their characters from
 academic and artistic works.

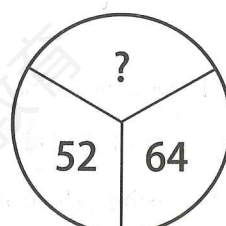

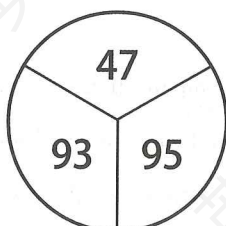

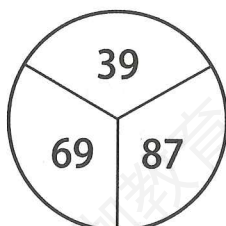

One word has been removed from the sentence above. Select that word from the choices below and
 reinstate it into its correct place in the sentence. Write the correct sentence on the *answer sheet*.

A. rich B. indirect C. written D. literary

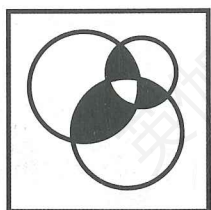

88. Arrange the three-letter bits below into the correct order to spell out a familiar saying:

nwo ion der tha eak rds lou ssp act

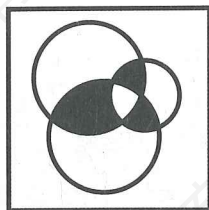

89. What number should replace the question mark?

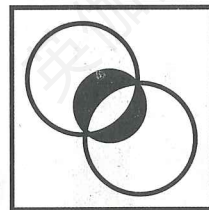

90. Which is the odd one out?

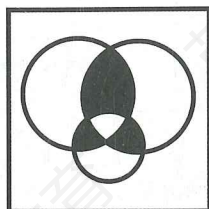

A.

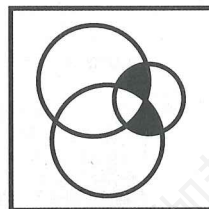

B.

C.

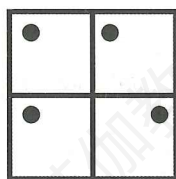

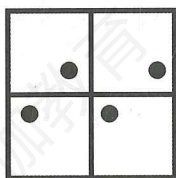

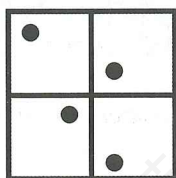

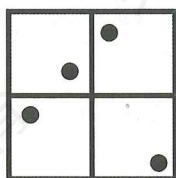

D.

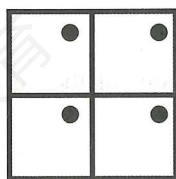

E.

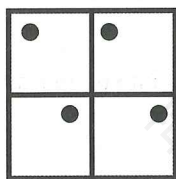

91. What comes next in the following sequence?

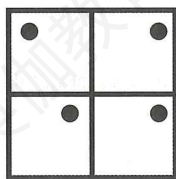

A.

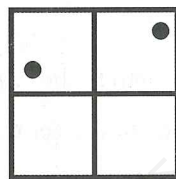

B.

C.

D.

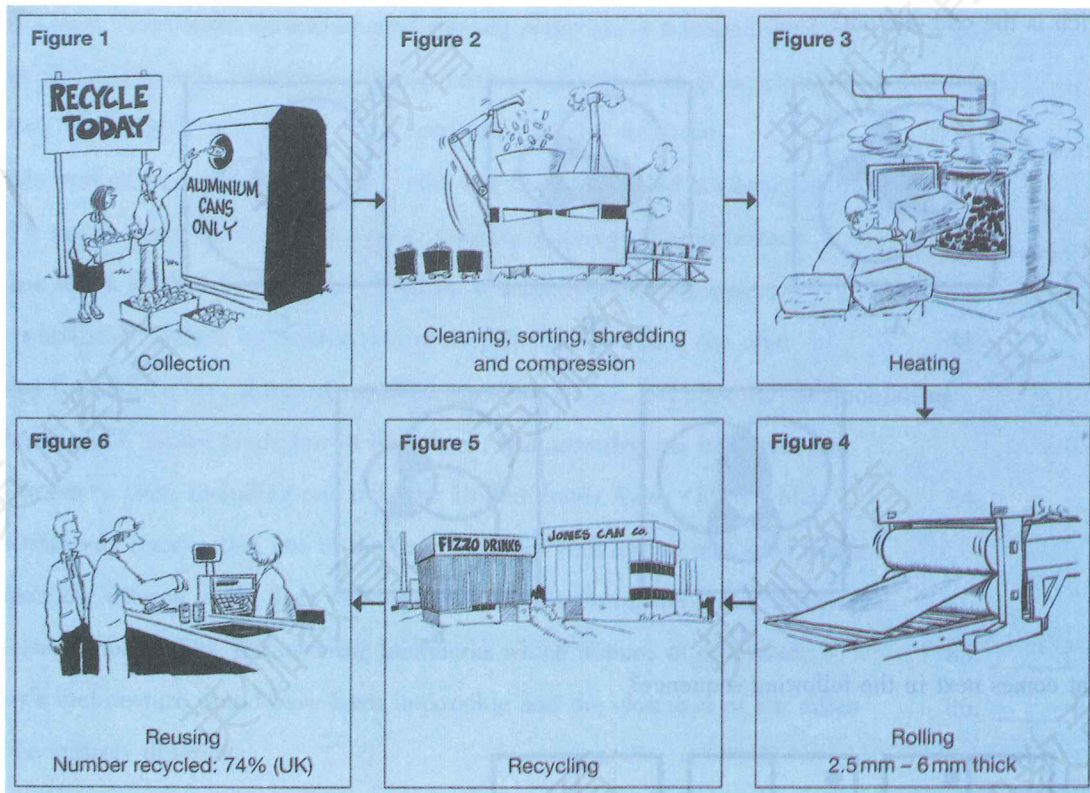

E.

Part VIII Writing (30 marks)

Section A (10 marks)

92. The following pictures show the recycling process of aluminum cans.

Write a report for a university lecturer describing the information above in 80—100 words on the answer sheet.

Section B (20 marks)

93. Whoever controls the media also controls opinions and attitudes of the people and there is little that can be done to correct this.

What is your opinion of the statement? You should use your own ideas, knowledge and experience and support your arguments with examples and relevant evidence. Write the essay in at least 120 words on the answer sheet.

2020 National English Competition for College Students

(Level D - Final)

Part V Translation (15 marks)

Section A (5 marks)

71. 儒家思想是以中国古代哲学家孔子的教义为基础的伦理、社会和哲学思想的早期集合。儒家思想的基本理念是,每个人怎样去参与创建一个和平的、组织良好的社会。儒家思想强调个人关系的重要性,基本上就是指人们根据各自的社会地位与他人相处。事实上,儒家思想不鼓励追求利益——孔子说,这会导致人们对他人做错事。这种理念不适用于商业。

Section B (10 marks)

72. It is a work arrangement in which the employee works outside the office, often working from home or a location close to home.
73. Telecommuting allows workers greater freedom regarding their work hours and work locations.
74. Often, working from home can make you more productive, because you don't have the distractions of office space.
75. 4 percent from more calls per minute, which is attributed to a quieter and more convenient working environment.
76. Telecommuters are also likely to be happier in their jobs and are therefore more likely to stay with the company.

Part VI Error Correction (10 marks)

Next time you are in a lift, look for the name of the company that made it. Chances are it is the

Otis Elevator Company. It was Elisha Otis who invented the gadget which made 77. that
the modern passenger lift possibly. The concept of elevation was already well 78. possible
established. Louis XV of France disliked stairs very much that he was regularly 79. so
hoisted skywards in a "flying chair" by several strong men hauling on ropes.
At Otis's time, warehouses commonly used moving platforms to transport goods 80. In
between floors. However, elevating anything further than one floor or weighing
more than 71 kilogram would have been considered far too dangerous. 81. kilograms

Otis worked for a bed manufacturer who was keen to expand his business but needed
to find a way to move his beds to an upper floor for a storage. The inventive 82. a
Otis soon had a solution to the safety problem: a tough steel spring system
that meshed with ratchets on neither side of the lift shaft so that if the rope 83. either
gave way the sudden loss of tension would trigger the device, stopping the lift from falling.

At the 1854 World Trade fair in New York, Otis unveiled his invention and
orders began to pour ^, including one from the United States Assay Office which 84. in
at that time was constructing one of the first buildings with an internal steel frame
to support the exterior walls. This was the same construction method that skyscrapers
would use. If not for lifts, the towering landmarks which feature so prominent 85. prominently
in today's architecture would have been impossible and the character of our cities 86. ✓
would be entirely different.

Part VII IQ Test (10 marks)

87. Her novels reflect her background, highly allusive and literary in style. They draw their characters from academic and artistic works.
88. Actions speak louder than words.
89. 29
90. E
91. D

Part VIII Writing (30 marks)

Section A (10 marks)

92. Omitted.

Section B (20 marks)

93. Omitted.

作文评分标准:

一、评分原则:

1. 本题满分为 A 10 分;B 20 分,按四个档次给分。
2. 评分时,先根据文章的内容和语言初步确定其所属档次,然后以该档次的要求来衡量,确定或调整本档次,最后给分。
3. A 词数少于 100 词或多于 130 词的,B 词数少于 160 词或多于 200 词的,从总分中减去 2 分。
4. 如书写较差,以致影响阅卷,将分数降低一档。

二、各档次给分范围和要求

第四档(很好):A 9-10 分;B 16-20 分

完全符合写作格式的要求,覆盖多个内容要点,表达思想清楚,文字通顺,连贯性很好,基本上无词汇和语法错误。

第三档(好):A 6-8 分;B 11-15 分

基本符合写作格式的要求,有个别地方表达思想不够清楚,文字基本通顺、连贯,有少量词汇和语法错误。

第二档(一般):A 3-5 分;B 6-10 分

未恰当完成写作格式的要求,漏掉内容要点,表达思想不清楚,文字多处出现词汇和语法错误,影响了对写作内容的理解。

第一档(差):A 1-2 分;B 1-5 分

未完成写作格式的要求,明显遗漏主要内容,表达思想混乱,有较多词汇和语法的重大错误,未能将信息传达给读者。

0 分

白卷;作文与题目毫不相关;内容太少,无法评判;所写内容无法看清。

2020 National English Competition for College Students

(Level D - Final)

听力录音原文

Part I Listening Comprehension

Section A

In this section, you will hear five short conversations. Each conversation will be read only once. At the end of each conversation, one question will be asked, and you have fifteen seconds to read the four choices marked A, B, C and D, and decide which is the best answer. Then mark the corresponding letter on the answer sheet with a single line through the centre.

1. W: I really think the principal is making too many new changes. He just got here, he should learn how the school operates before he makes such dramatic decisions.

M: May I say something here? True, he is making a lot of changes, but this school has had a lot of problems these last few years, especially regarding disciplining the students. The school board hired him because they wanted him to get those unruly children in line!

W: I suppose you have a point, but I still don't like it.

Q: Who does the woman criticize?

2. M: How much money did you spend on the books for that accounting class you're taking?

W: Too much! The textbook was \$60 and there were two course packets that cost \$20 each.

M: Wow! That's a lot. When I took a literature class down at the university they gave us the option of borrowing the books for free! Of course, most of us ended up buying them anyway.

Q: How much did the woman spend on the books for her accounting class?

3. W: Excuse me, professor? I was hoping you had a second to talk about the class.

M: Hi Grace, I'm happy that you came. I've been curious about the students' sentiments toward the class. So what's on your mind?

W: Well, honestly, I guess I'm just having a problem with the setup of the class. I feel like you don't give us the information we need during class, and that we're kind of wasting time with the group discussions.

M: What do you mean?

W: Well, it just seems like every time I'm in a group discussion, nobody's really sure what we're supposed to talk about.

M: But the purpose of the group discussion is to see what ideas you all have. I figured nobody wanted to hear me go on by myself.

Q: What problem does Grace have with the professor's class?

4. W: Hello, John. How was your conference on space travel?

M: Hi, Susan. It was great. We heard some fascinating speakers, especially one fellow who was an expert on Mars. He thinks it's quite feasible for humans to live there in the near future.

W: Well, if we spent the billions of dollars that go into space research on looking after our planet, then perhaps we wouldn't worry about the Earth being uninhabitable in a hundred years' time. Nor would we need to look for another planet to colonize!

M: You're right, but there're some important things that space exploration can teach us, you know, especially about the history of our own planet and its atmosphere. That sort of knowledge could help us solve some of the problems that threaten our planet.

Q: According to John, what is the main advantage of space exploration?

5. M: I was late for work and I was running down the street.

W: Just a second, don't you usually cycle to work?

M: Usually, yes, but my bike had broken down. Anyway, as I was running, I noticed that people were smiling at me all the time, but I didn't think anything of it and I just smiled back. And then I saw two people pointing at my boots and ...

W: Hang on, didn't you think it was a bit odd that so many people were smiling at you?

M: Well yes, but I was in a rush, so I didn't think too much about it. But then I looked down and noticed I'd got two different boots on, one brown and one black.

W: How come you didn't notice that?

M: Well, I put them on in a hurry. As I didn't have time to go back home, I had to wear them all day.

Q: Why did people smile at the man when he was running?

Section B

In this section, you will hear two long conversations. Each conversation will be read only once. At the end of each conversation, there will be a one-minute pause. During the pause, read the questions and make your answers on the answer sheet with a single line through the centre.

Conversation One

Listen to the conversation, mark each statement as either true (T) or false (F) according to what you hear.

W: Today we're going to go over the theory of memory in animals, and I'm going to support the theory with a specific example. First, please tell me what you think is the relationship between animal size and memory function.

M: Um, I guess that the bigger the animal, the better the memory.

W: Actually, there's not a concrete correlation to be seen here. So, this leads us to the topic for today. I want you to understand that some animals have much more developed memories than you would have ever expected. One such type of animal is an insect.

M: An insect? I can't imagine a tiny insect having a great memory.

W: Well, there's a study that supports this point. The study involved an experiment where a group of researchers placed a circle of pine cones around a female wasp's nest. The wasp was inside the nest when this happened. So, what the wasp did—the wasp left the nest and started checking out the pine cones, getting familiar with the positions, making sure they weren't a threat ... that kind of thing. When the wasp left the area, a researcher moved the circle of pine cones a little distance away from the nest. It was the same pattern, but it was a few feet away from the nest.

M: What, and the wasp came back and thought the nest was still in the middle of the pine cones?

W: That's exactly what happened. The wasp flew straight to the middle of the pine cone circle and buzzed around for a little while, seeming confused. So, what is it that we can deduce from this experiment?

M: Well, it seems to me that wasps have extremely developed memories.

W: Perhaps. I mean, it certainly proves that wasps have some sort of memories, probably more than we would have imagined.

M: Well, doesn't it suggest something about the nature of a wasp's memory? I mean, how it works?

W: That's what I was getting at. We will discuss it next time.

Conversation Two

Listen to the conversation, mark each question as A, B, C or D according to what you hear.

W: Good afternoon. How are you today?

M: I'm good, thank you. But I have a weird question.

W: What is it?

M: I officially graduated last spring, but I'm still kind of working on an independent study project under a professor, so I guess by the university's standards, I'm not really a student here anymore.

W: So you can't use the university libraries? Don't worry, there's a way around that.

M: What a relief! I was really starting to worry about how I was going to get the rest of my research done.

W: We actually have a lot of people in similar situations, so we have to find a way to accommodate them. What you have to do is apply for a non-student pass.

M: But as I said, I'm kind of a student.

W: Officially, you're not. But it's really just a label. You'd get all the same access as a student, and you can even keep your campus email address, since all that stuff is administered by the library.

M: That's cool. Well, I'd like to get this processed as soon as possible, and I'd be glad to fill out whatever you need me to do.

W: OK. Here's the application. At the bottom it asks you about your relationship to the university—make sure to note that you're a recent graduate and give the name of the professor you're working with. And if you can put a contact number for the professor, that would be even better because then we can confirm the project faster.

M: I'm sorry, but I just saw that there's a fee for this. What's that all about?

W: It's basically like a membership fee and if you think about it, it's a pretty good deal. I mean, access to all campus libraries and the computer network for only \$50 a semester. It's really not that bad.

M: Does that apply even to people in situations like mine? I mean, I'm actually working on this at my professor's request. It just doesn't seem fair that I should have to pay extra at this point.

W: I'm sorry, but everybody who wants non-student library access has to pay.

Section C

In this section, you will hear five short news items. Each item will be read only once. After each item, there will be a fifteen-second pause. During the pause, read the question and the four choices marked A, B, C and D, and decide which is the best answer. Then mark the corresponding letter on the answer sheet with a single line through the centre.

16. Astronauts aboard the International Space Station recently tested an oven they used to bake five chocolate cookies. We now know the results of this experiment: the cookies took a lot longer to bake in space than on Earth. The cookies that came out best required two hours of baking time inside the International Space Station. The baking time for cookies on Earth is generally about 20 minutes.
17. With a population of 602,000, Luxembourg is one of Europe's smallest countries—yet it suffers from major traffic jams. But that could be about to change. As of March 1, 2020 all public transport—trains, trams and buses—in the country will be free. The government hopes the move will alleviate heavy congestion and bring environmental benefits, according to a spokesperson for the Ministry of Mobility and Public Works.
18. A major new exhibition in the heart of Washington celebrates the artistic achievements of native American women with more than 80 works of art. There have been other exhibitions in the past that have featured only native women artists. But those exhibitions tended to feature contemporary art. So the curators of this show wanted to make sure that this exhibition is comprehensive, in the time span as well as including many different artistic mediums as possible. Those mediums range from paintings, textiles and sculptures to baskets and even wearable art.
19. The International Olympic Committee announced in January that athletes are banned from making political statements at Olympic events. It said banned actions can include making hand signs and bending down on one knee during medal -awarding ceremonies and competitions. The warning came as part of new guidelines for rule 50 of the Olympic Charter—the set of rules governing the Olympic movement. The guidelines state that it is a fundamental principle that sport is neutral and must be separate from political, religious or any other type of interference.
20. The China Federation of Literary and Art Circles has launched a programme to further support the country's young literary and artistic workers. Aiming to instill more vigor into literary and artistic creation, the programme mainly targets original works of active literary and artistic workers under the age of 45, and will set up projects for outstanding works. The completed works are expected to be released before the end of 2020. Those selected will be supported by the federation in terms of funds, instruction and promotion, and will be included along with the artists in a database of literary and artistic talent.

Section D

In this section, you will hear two short passages. The passages will be read only once. After each passage, there will be a one-minute pause. During the pause, write the answers on the answer sheet.

Dictation

Listen to the passage. For questions 21—25, fill in the blanks with the exact words or phrases you hear.

Obviously conflict is an important part of human relations, it's something we can't avoid when we have dealings with other people. Other people inevitably do things that upset us, or say things that we disagree with. So it's not a question of avoiding conflict; it's how we deal with it that's important for our long-term mental health.

There are basically three reactions. Firstly you can do nothing. This is what I call the “passive” response. This may sometimes be a good idea, for example, if you’re faced with a difficult or violent person. Doing nothing may help him or her to calm down. But there are lots of disadvantages if you always avoid conflict, too. You are saying “my opinion is not worth anything” and some people will take advantage of what they see as your weakness.

The second reaction to conflict is the complete opposite. This is what I call the “aggressive” response. It’s what happens when you can’t control your emotions, and you begin to shout at people or dominate them in other ways. It’s useful in emergencies, or when you need to give orders, but most of the time it’s just unkind or selfish. Most people don’t like being bullied, and you will end up losing your friends if you are not careful.

The third reaction to conflict is to face up to it and put forward your own views. It’s called the “assertive” response. If you have a viewpoint, and you feel strongly about what someone has done, you have the right to let the other person know how you feel, and so has the other person. If you and the other person can both walk away from the discussion feeling that you have put forward your points of view and listened to the other person’s views, then you will both feel good about it, and there won’t be bad feelings between you.

Summary

Listen to the passage. For questions 26—30, complete the notes using no more than three words for each blank.

Today we will be discussing two widespread diseases that roses are vulnerable to. Gardeners know how difficult roses are to take care of since they can be susceptible to various fungi and bacteria. We’ll talk about these rose diseases today.

The first disease we will discuss is black spot, caused by a fungus. It’s one of the most severe diseases that affect roses. It can be detected by the characteristic development of round black spots which spread out throughout the leaf, changing the rest of the leaf into a yellowy colour. It causes the affected leaves to fall off prematurely. If nothing is done to control black spot, then the entire plant becomes weak and won’t blossom. It’s worse after wet and warm times of the year. Consequently, the best thing to do is keep the plant as dry as possible.

Now, onto the next disease—rose rust is also brought on by a fungus. Some people don’t think it actually causes rust, since roses aren’t made of metal. Actually, rose rust causes orange spots to show up on the leaves and stems of the plant. So it looks like rust. If the rose is badly affected, then an orange dust will appear not only on the plant but also on the ground below it. Usually brown growths appear underneath the leaves and the leaves become twisted. After that, they die and drop off. Like black spot, wetness is the rose rust’s worst enemy. As for preventative measures, it’s best to make sure the plant stays dry. So, watering in the evening is out, just try to control the humidity around the plant as much as you can.

This is the end of the listening part. Please transfer your answers to the answer sheet.

很多同学在备考大英赛时常有一种无力感，因为大英赛不像其他的英语考试，它范围广、题量大、获奖排名制。这就使大家在备考大英赛时没有头绪。

该从哪儿学起？该学什么内容？该怎么准备考试？

针对这些问题，英伽教育经过多年的课程迭代更新，为大家制定了一套完美的备考方案。

大英赛全程班

【学、练、测、评、答】五个维度助力获奖

【学】共 150H 的课程，覆盖各题型知识点和技巧

【练】每次课后打卡练习，巩固当天所学知识内容

【测】三次考前模拟测试查漏补缺，检验学习成果

【评】为三次模考提供翻译和写作的人工评阅服务

【答】特等奖助教每天群内答疑，一直持续到考前

可以看到咱们的课程解决了自己备考的弊端，帮助大家解决学什么、学了怎么用、学完有什么效果、不会的怎么办等问题，绝对比自己备考更高效。

觉得自己难以坚持，不知道该从哪儿学起的话，可以选择咱们的全程班，跟随课程学习哦~

英伽教育
备战2023年
大英赛全程班
五大课程模块全场景教学 六项课后服务全能陪伴

- 五步阶梯 登顶获奖 -

- 学** 150小时课程时长，七大题型技巧详解
- 练** 七十余次课后练习，学有所得熟练运用
- 测** 入门测试了解短板，考前模拟查漏补缺
- 答** 特等奖助教群内答疑，有问必答解决难题
- 评** 模考写译人工批改，重点突破稳拿高分

 **售价：499元**
