

2021 年决赛试题

(Total: 150 marks Time: 120 minutes)

Part I Listening Comprehension (30 marks)

Section A (5 marks)

In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

1. A. Why the student should major in biology.
B. The field of study the student should major in.
C. How a degree in psychology will affect one's future.
D. The reasons why the student picked biology as a major.
2. A. They're too costly to send.
B. They're too reliant on humans.
C. It's too expensive to build robots.
D. It's hard to operate them for long enough.
3. A. He's worried he doesn't have enough time.
B. He would prefer working an additional month.
C. He is flexible about the length of time required.
D. He didn't know the position required so much time.
4. A. He favours comments that include numerical support.
B. He finds Marcy often makes interesting remarks in class.
C. He's disappointed with the quantity of Marcy's participation.
D. He doesn't think Marcy makes enough quality contributions.
5. A. His manager encouraged him to do it.
B. He had all along been interested in art.
C. The Japanese characters he drew sold well.
D. He was keen on drawing contemporary stuff.

Section B (10 marks)

In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause. During the pause, read the questions and make your answers on the **answer sheet** with a single line through the centre.

Conversation One

Listen to the conversation and mark each statement as either True (T) or False (F) according to what you hear.

6. Martin chose the history of banana growing in Australia for his tutorial paper.
7. Fiona has already finished her tutorial paper.
8. Fiona thought that Martin's tutorial topic was interesting at first.
9. The Cavendish banana originated in China according to Martin's research.
10. Martin said bananas were introduced directly into Australia from China.

Conversation Two

Listen to the conversation, mark each question as A, B, C or D according to what you hear.

11. Why did Melissa say her journey has only just begun?
 - A. She has only written about sixty countries.
 - B. She has just begun her travel around the world.
 - C. There're so many countries she hasn't travelled to.
 - D. There're some countries she particularly wants to visit.
12. How long has Melissa been a travel writer?
 - A. For thirteen years.
 - B. For over thirty years.
 - C. Since she graduated from college.
 - D. Since she climbed Mount Qomolangma.
13. What made a big difference in the world's travel and tourism in recent years?
 - A. More people prefer to travel overseas.
 - B. The airlines offer much cheaper flights.
 - C. Travellers can buy luxury food everywhere.
 - D. Climbing Mount Qomolangma isn't a challenge.
14. Why is Sandy Hill Pitman's travel to Mount Qomolangma mentioned?
 - A. She didn't quite enjoy the climb.
 - B. Her tour guide was a qualified one.
 - C. Travellers there don't need any training.
 - D. Mount Qomolangma isn't mysterious any more.
15. Which is NOT mentioned for young people to become travel writers?
 - A. Making writing a habit.
 - B. Writing things in great detail.
 - C. Looking more deeply than most people.
 - D. Travelling various places and seeing amazing things.

Section C (5 marks)

*In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

16. Where will the 2028 Summer Olympics be held?
 - A. In Paris.
 - B. In Milano Cortina.
 - C. In Los Angeles.
 - D. In Brisbane.
17. What causes the food waste in poor countries?
 - A. Food supplies go bad without cold storage.
 - B. They can't afford the cost of storing food.
 - C. The food gets polluted by waste water from companies.
 - D. Tons of food is thrown away from food stores and companies.
18. Why did the Serum Institute of India stop exporting the COVID-19 vaccines to Africa?
 - A. They had caused serious side effects there.
 - B. There was a rising demand for vaccines in India.
 - C. The COVAX program decided to suspend the project.
 - D. Some other countries were exporting vaccines to Africa.
19. What message does the news item mainly try to convey?
 - A. Certain causes of hearing loss cannot be prevented.
 - B. Some wrong lifestyle choices can result in hearing loss.
 - C. People with hearing problems are more likely to suffer from depression.

- D. 2.5 billion people in the world would have hearing problems by 2050.
20. Which is NOT a measure China has taken to help Palestine to fight against COVID-19?
- A. China sent a team of medical experts to Palestine.
- B. China donated lots of medical supplies to Palestine in 2020.
- C. China helped Palestine to construct some hospitals and temporary medical centres.
- D. China handed over a batch of donated Sinopharm COVID-19 vaccines to Palestine.

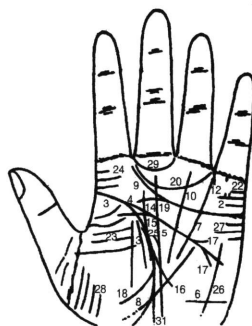

Section D (10 marks)

*In this section, you will hear **two** short passages. The passages will be read only **once**. After each passage, there will be a **one-minute** pause. During the pause, write the answers on the **answer sheet**.*

Dictation

*Listen to the passage. For questions 21—25, fill in the blanks with the **exact words or phrases** you hear.*

The ancient art of reading someone's palm has always been the most popular way of foretelling the future. After all, you don't have to believe it, and the best thing about it is that it doesn't require a lot of time or (21) _____. But many are skeptical that palm reading has any scientific basis at all. What could be more ridiculous than the idea that our future can be predicted from the random lines and creases on our hands? Cynics claim that palmists use other clues to gain their "amazing" insights. In other words, the more (22) _____ the reader is, the better she becomes at noticing things which help her to "predict" the future. While the more cynical the "victim" is, the less likely they are to believe a word of it!

However, scientists at the University of Barcelona have discovered that palmistry may have some basis in scientific truth. (23) _____ the palms of 140 children, they discovered that the more arches and loops children have on their palms, the more likely they are to be intellectually impaired. And the existence of a Simian line—a rare crease across the palm—appears to be one of (24) _____ indicators of mental deficiency. This may be connected with events between the thirteenth and eighteenth weeks of pregnancy, a crucial time for brain development and the period when fingerprints are formed. So maybe there is some truth in what the palm reader says. And there is nothing more guaranteed to (25) _____ than the news that you're about to meet a tall dark stranger who will change your life for the better!

Summary

*Listen to the passage. For questions 26—30, complete the notes using **no more than three words** for each blank.*

Brain pills, which help to (26) _____, would be welcomed by students who are studying for exams. Many professions would also use them: For example, people who work in shifts and (27) _____ who don't get much sleep. But brain pills raise many (28) _____ too, about how society would use them. They may lose (29) _____ if they aren't used correctly, just as plastic surgery and cloning. Consequently, many scientists say that the pill needs to (30) _____ more, before we can use it safely.

Part II Vocabulary & Grammar (15 marks)

*There are **15** incomplete sentences in this section. For each blank there are **four** choices marked **A**, **B**, **C** and **D**. Choose the one that best completes the sentence. Then mark the*

corresponding letter on the **answer sheet** with a single line through the centre.

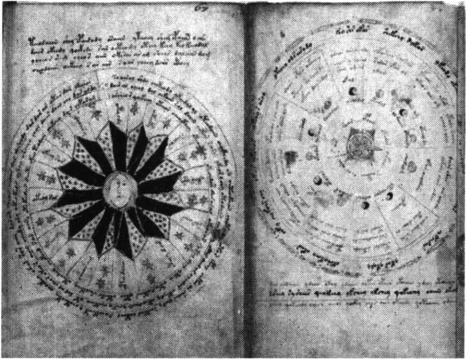

31. The officer asked for a detailed _____ of what happened at the time of the accident.
A. explanation B. declaration C. expression D. impression
32. When it comes to protecting the environment, cost should be _____.
A. impossible B. irresponsible C. irrelevant D. unreasonable
33. The translation of the story is _____ correct, except for a few problems at the end.
A. completely B. partly C. mutually D. basically
34. _____ after his arrival in Paris, Tom called me at the office.
A. Nearly B. Eventually C. Shortly D. Simply
35. We must act as soon as possible because time is _____.
A. coming out B. running out C. taking up D. giving up
36. The presentation will be very informal, so if you have questions or comments, feel free to _____ at any time.
A. go over B. come across C. take place D. jump in
37. A monument has been _____ in memory of the great inventor.
A. set up B. brought up C. made up D. held up
38. While Steve _____ his car, he _____ some dents on the doors.
A. washed; has discovered B. was washing; discovered
C. washed; was discovering D. was washing; had discovered
39. She tried to express her feelings _____ she could.
A. more honest than B. as honest as
C. more honestly than D. as honestly as
40. We don't agree to the means _____ which he solved the problem.
A. with B. in C. by D. of
41. Top universities in China should be evaluated based on talent cultivation and scientific research, _____ solely on rankings and other quantitative measures.
A. in spite of B. rather than C. more than D. in view of
42. Studies of Sanxingdui Site are an important project _____ tries to explain the origins of Chinese civilization and _____ diverse cultures communicate and come together.
A. which; where B. who; whose C. which; how D. what; that
43. There is a clear link between humans and environmental problems. _____, wherever humans live, they damage the environment in some way.
A. That is to say B. To say the least
C. Say what you like D. Having said that
44. —Do you think people work too much nowadays?
—Not really, I think people have always worked hard for a living. I mean it's never been easy for anyone, has it? You have to work hard if you want to achieve anything in your life—that's just the way it is.
—You said it. _____
A. I don't agree with you. B. I couldn't agree more.
C. It doesn't make sense. D. I don't like working hard.
45. —Hey, what's wrong? You look really stressed!
—I have an important test tomorrow. I've been studying for it all week, but I feel like I don't remember anything. I just can't seem to focus.
—_____ Whenever I feel stressed, I go for a run or do some yoga. Exercise is a good way to relax and take your mind off things.
—I'm too tired to exercise. Besides, I still have a few more chapters to read.
A. What about having a picnic? B. Why don't you go travelling?

- C. You should go get something to eat. D. Maybe you need to take a break.

Part III Cloze (10 marks)

Read the following passage and fill in each blank with **one** word. Choose the correct word in one of the following **three** ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the **answer sheet**.

The Voynich Manuscript, written in the 15th century in Western Europe, is beautiful to look at. The pages of this “book” are full (46) _____ colourful, lovely drawings of plants and astronomical objects, like suns and moons. The handwriting that surrounds the drawings appears to (47) des_____ herbal remedies from plants. You can imagine that the author was a doctor or a scientist. But if you look more (48) _____ (close), you will notice two very strange things: the words aren’t in any known language and the plants don’t exist. That is incredible, isn’t (49) _____?

Scientists have studied the Voynich Manuscript for years and have tried to understand the (50) _____ (mean) of the words and the strange drawings. The words do (51) fo_____ some “rules” of a language, or even two languages, but scientists still cannot work out (52) _____ the language is. And they don’t know where the author learned about the strange plants. An early theory was that the writer used an (53) art_____ language. Another theory was that the whole thing was a hoax(欺骗). But why would someone spend so much (54) _____ on a manuscript and work so hard if it was just a prank(玩笑)?

Today, a group of scientists from around the world are working (55) to_____ to create a machine that will help them finally crack the code. What do you think? Will a computer be able to help them understand the information that the 15th-century writer beautifully and carefully put into this manuscript? Let us see and wait.

Part IV Reading Comprehension (30 marks)

There are **three** passages in this part. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the **answer sheet**.

Section A (10 marks)

Questions 56—60 are based on the following passage.

Michael Wesch is a cultural anthropology professor who explores the effects of new media on society and culture. He believes that all human relationships depend on communication. Change the type of communication, and you change the relationships. (56) _____

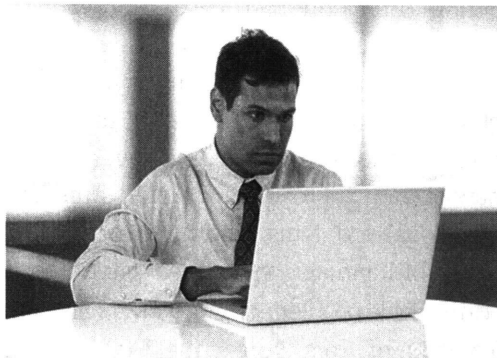

One example of this, he says, is television. When television became the dominant medium in the 1950s, it changed the way families interacted. (57) _____ The people on the television spoke, and the TV viewers listened. In this one-way type of

communication, only the people on TV had power. Only they had a voice.

Today, the Internet is changing our relationships again. (58) _____ Wesch and his students study social networks and other interactive Internet sites. For example, they studied YouTube. As Wesch explains, “Instead of simply watching TV, we can create and edit our own videos.” Viewers all over the world can watch and write comments. This kind of sharing changes the way we communicate. With the Internet, everyone can have a voice.

Wesch created and posted his own short video on YouTube. It has had more than 11 million views. The video asks us to think about how we use and interact with the Internet. The Internet is no longer just connecting people with information. It’s connecting people with people. It’s a way for us to share our thoughts and ideas with the world. It wouldn’t exist without us.

Wesch wants to make changes in education to fit this new style of communication. He has made some changes in his own classes. For example, in his Introduction to Cultural Anthropology class, he didn’t simply teach his students about different cultures. Instead, he asked each student to become an expert in one culture. Then the class used their knowledge to create an online role-playing game. (59) _____

According to Wesch, activities such as the role-play exercise help prepare students to be active and responsible members of society. “I ask students to think not about what new media was designed for,” he says, “but how they can use it for something else.” A great example, he believes, is social media. It was created to help friends connect, but now it also allows people to share and collaborate on projects.

(60) _____ However, he warns that online content can also be misleading. He believes that it’s important for everyone, especially students, to understand the dangers of digital media and learn how to use it wisely.

Questions 56—60

*Complete the passage with the following sentences. There are **two extra** sentences that you do not need to use.*

- | |
|--|
| <ul style="list-style-type: none">A. Family members began to sit in front of the TV to watch rather than face each other to talk.B. Information is available to anyone with an Internet connection.C. As they learned about the different cultures, they increased their knowledge about global problems.D. Change the relationships, and you change the structure of society.E. One of the goals of education should be to prepare students to find, analyze and think critically about online information.F. Wesch understands that the new media can provide opportunities for sharing and participation.G. The newest media of communication are on the Internet, and these media change and grow every day. |
|--|

Section B (10 marks)

Questions 61—65 are based on the following passage.

Each generation has its own set of values and characteristics. But one thing common to

all generations is that they are suffering from stress. In a recent poll by the American Psychological Association (APA), all age groups now report higher levels of stress than in the past. Baby Boomers (those born roughly between 1946 and 1964, and who are now moving into their retirement years) said that they are stressed about money and health issues. Gen Xers (born roughly between 1965 and 1980) are concerned about work, money, and job stability. However, Millennials (born roughly between 1981 and 2004) are turning out to be the most stressed-out of all generations. Poll results indicate that stress levels for these younger respondents are significantly above average. So what's worrying the Millennials?

Millennials are the first generation to grow up with computers in the home and the classroom. Due to the rise of modern technology and social media, they are constantly bombarded with information. Over time, this information overload can become too much to handle and can result in chronic stress, which can cause serious physical, psychological, and emotional problems. Another contributing factor, according to author Michael D. Hais, is that many Millennials have lived sheltered lives due to overprotective parents. These young adults lack problem-solving skills and may struggle with fear of failure once they leave home. To make matters worse, the 2008 recession occurred when many Millennials were graduating from school or college. The resulting economic slowdown reduced the number of available jobs for graduates. Sure enough, in the APA poll, Millennials said that work, money, relationships, family responsibilities, and the economy are the main stressors in their lives.

However, the poll results may be a bit misleading as they don't take into account public attitudes toward stress and mental illness. Ronald Kessler of Harvard Medical School, who has studied the prevalence of mental disorders in the U. S., points out that changes in social attitudes have helped reduce the stigma attached to mental illness over the years. It's possible that young people now are more willing to admit to being stressed than in the past.

Despite the high levels of stress reported by Millennials in the APA poll, there is reason for optimism. Many happiness and well-being surveys show that happiness generally increases as people grow older. This seems to imply that the ability to manage stress effectively comes with age. As Millennials gain more life experience and develop better problem-solving skills over time, they should become better at handling stress. Moreover, with the greater awareness surrounding mental health issues today, the stigma associated with seeing a psychiatrist or psychologist has lessened. This means that people are more likely to seek professional help to reduce their stress and anxiety levels. There is now a wide range of stress management techniques available, including exercise, meditation, and hypnotherapy (催眠疗法). Millennials must develop effective strategies to deal with stress in order to be productive members of their community.

Questions 61—65

Answer the following questions according to the passage.

61. What do Sen Xers refer to?
62. What contributes to Millennials' stress?
63. What is a common cause of worry across all generations?
64. Why does the passage say the poll results may be a bit misleading?
65. Compared to the past, what is different about young people today?

Section C (10 marks)

Questions 66—70 are based on the following passage.

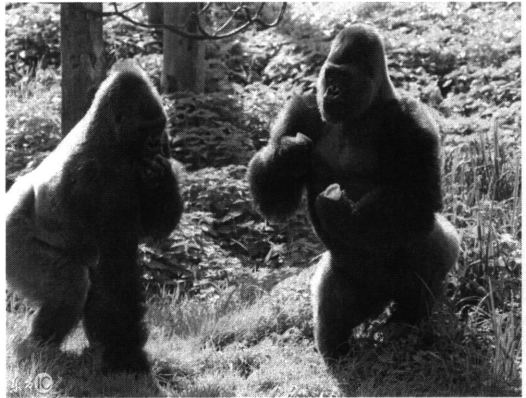

Outside of their respective sizes, gorillas and chimpanzees are very similar physically, but what about socially? In fact, there are some notable differences in their social structure.

First, about similarities. Gorillas and chimpanzee share almost the exact same DNA as humans. Gorillas and humans share about ninety-seven to ninety-eight percent of the same DNA, while chimpanzees and humans have around ninety-eight to ninety-nine percent in common. Evolutionally, this not only makes gorillas and chimps closely related to humans, but to each other as well. So obviously, they share lots of similar characteristics. For example, both gorillas and

chimps walk on their knuckles and tend to form groups.

Each of these groups consists of a dominant male that acts as the group leader. But there are some differences in group structure that work to differentiate them. Gorillas are much more solitary than chimps. They do form groups, but these gorilla groups are much smaller than chimp groups. A gorilla group usually consists of about a dozen individuals: a male gorilla, several adult females, and their young. Sometimes the group may include a few younger males, but they rarely mate

with any of the females. The females belong to the dominant male. Chimps, on the other hand, live in large groups of 50 or more individuals, sort of like a mini-society. Unlike gorillas, many chimps in the group may be male. This large group consists of several smaller subgroups—another characteristic that is not seen with gorillas. These subgroups often consist of a mother and siblings. Much of the younger chimps, behaviour is learned from the different individuals in their subgroups and, like humans' chimps appear to have a special bond with their mothers and siblings.

As in the case of many social animals, the dominant males in both gorilla and chimpanzee groups are usually the biggest in size and brute strength. This isn't to say that the dominant male will stay in power forever. Both gorillas and chimpanzees can be, and often are, overthrown by others. Dominant male gorillas can be overthrown by a stronger,

tougher gorilla, who will then take over the group. The displaced gorilla will usually spend the rest of his life alone by himself. Chimpanzees display similar dominance patterns, although displaced males aren't always sent into isolation. There is one exception to this system of dominance. Whereas gorillas rely on brute strength to gain the dominance of a group, it appears that chimpanzees may rely on intelligence to move up their group hierarchy.

Questions 66—70

Complete the summary below with information from the passage, using **no more than three** words for each blank.

The passage discusses the (66) _____ between gorillas and chimpanzees. These animals share similar (67) _____ to humans and live in male-dominated societies. However, gorilla groups are smaller, consist of only one male per group, and rely on (68) _____ to determine the leader. Chimp groups are larger, consist of (69) _____, which is characteristic to gorillas, and have been known to rely on (70) _____ to determine the leader.

Part V Translation (15 marks)

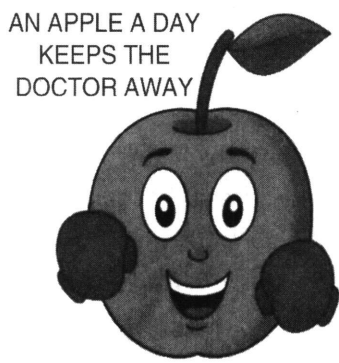

Section A (5 marks)

Translate the following paragraph into Chinese. Remember to write the answers on the answer sheet.

71. Almost every language has some topic areas that are especially rich in vocabulary and idiomatic expressions. For example, the Inuit(因纽特) people who live in the far north of Alaska and Canada have many different ways to describe snow. The Irish, on the other hand, have a wide variety of ways to describe a green landscape. Other examples can be found in languages relating to food. For instance, the French and Italian languages are rich in vocabulary for talking about wine, while American English has many ways to indicate how a steak should be cooked. We can conclude from this that the development of a language is influenced by both environment and culture.

Section B (10 marks)

Translate the following sentences into English by using the hints given in brackets. Remember to write the answers on the answer sheet.

每种文化都有自己的谚语。(72) 谚语(proverb)是关于生活的短小名言,代代相传(pass on)。它们可以追溯到几十年、几百年甚至几千年前,总结了使用谚语的人们的实践经验。谚语能给我们以忠告,所以可以帮助我们做决定。(73) 中国有句谚语:“一失足成千古恨”就是一个很好的例子(slip; regret)。任何人如果不先权衡利弊就匆忙做出决定,就会被警示做出一个错误选择的可怕后果。

有时谚语似乎有不同的含义。英国谚语“滚石不生苔”就是一个例子。(74) 一些人认为,这句谚语是对那些不断迁徙、永不安定的人的一个警示(settle down)。如果这些人“聚不生苔”,那就意味着他们什么都没做成。另一些人认为这句谚语是对那些从不做事的人的警示。(75) 如果你不随时代而改变,你就会变得像一块长满青苔的石头(mossy)。

我们经常发现不同文化中都有相似的谚语。也许这是因为谚语已经广为流传，并被翻译成另一种语言，或者这只是因为它们是常识。（76）类似“种瓜得瓜，种豆得豆”的说法出现在很多语言里，意思是你付出什么，就会得到什么（reap；sow）。

Part VI Error Correction (10 marks)

Proofread the passage as required. Each indicated line contains **a maximum of one** error. Correct the passage in the following ways: for a right line, put the sign “√” in the corresponding blank; for a wrong word, underline the wrong word and write the correct one in the blank; for a missing word, mark the position of the missing word with the sign “^” and write the word you believe to be missing in the blank; for an unnecessary word, cross the unnecessary word with the sign “\” and put the word with the sign in the blank. Write the answers on the **answer sheet**.

For example:

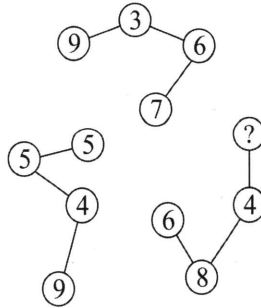

One of my favorite writers are Charlotte Brontë. She was born in the early is
nineteenth century when women had far fewer opportunities ^ they have now. than
She lived in a small village in Yorkshire and she took great pleasure in walking √
on the moors ~~where~~ near her home. where

Imagine being able to print rocket engine parts, chocolate figurines, designer sunglasses, or even pizzas—just with pressing a single button. It may sound like something out of
77. _____
science fiction, but it’s increasing becoming a reality. Thanks to 3-D printing, 78. _____
companies are reimaging their long-term business plans.
Invented in mid-1980s, 3-D printers create solid, three-dimensional objects
79. _____
from various materials such as plastic, wax, wood, gold, or titanium. A major advantage of
3-D printing is that designs for objects can be easily changed. When designs
80. _____
were changed in traditional
manufacturing, the machinery that make the objects needs to be redesigned or upgraded,
81. _____
which can be very cost. But in the case of 3-D printers, only the software
82. _____
needs to be modified.
3-D printing is also better than traditional manufacturing because there is no wasted
83. _____
material. With traditional manufacturing, some material is cut away from to create an object,
84. _____
but 3-D printing uses only which is necessary. Guided by software, a 3-D printer builds
85. _____
an object one layer at a time, place material only where it needs to be. As a result,
86. _____
it can make complex objects less expensively.

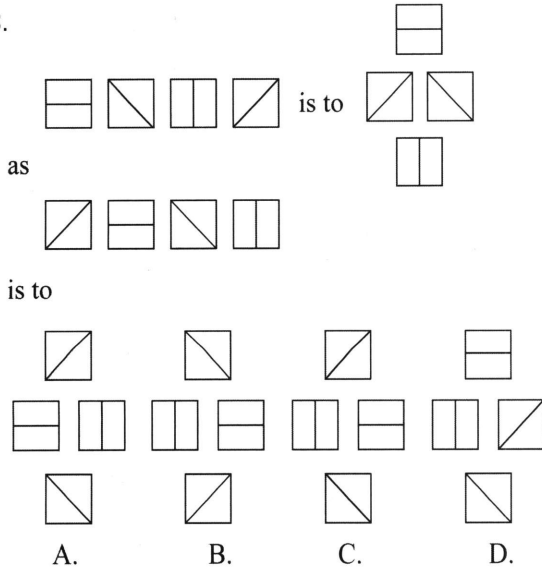

Part VII IQ Test (10 marks)

There are **five** IQ Test questions in this part. Write the answers on the **answer sheet**.

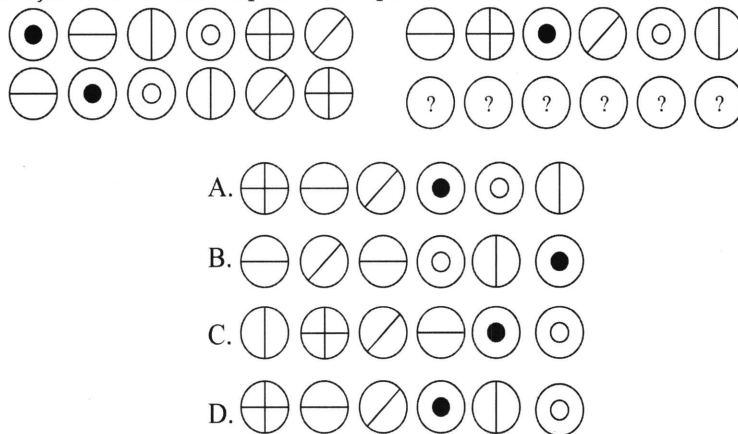

87. Which number should replace the question mark?

88.

89. Which set of symbols should replace the question mark?

90. Use the following letters to form a word and complete the sentence.

G I Y R H W A L T P S

Shakespeare is one of the most famous _____ in English literature. He wrote approximately 40 plays in his lifetime, including comedies, tragedies and historical plays.

91. —Hello, Sam, what a surprise meeting you here!

—You can say that again!

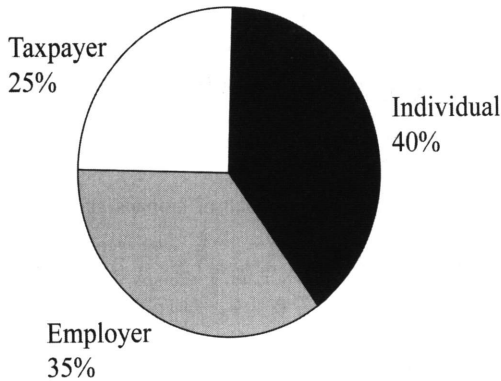

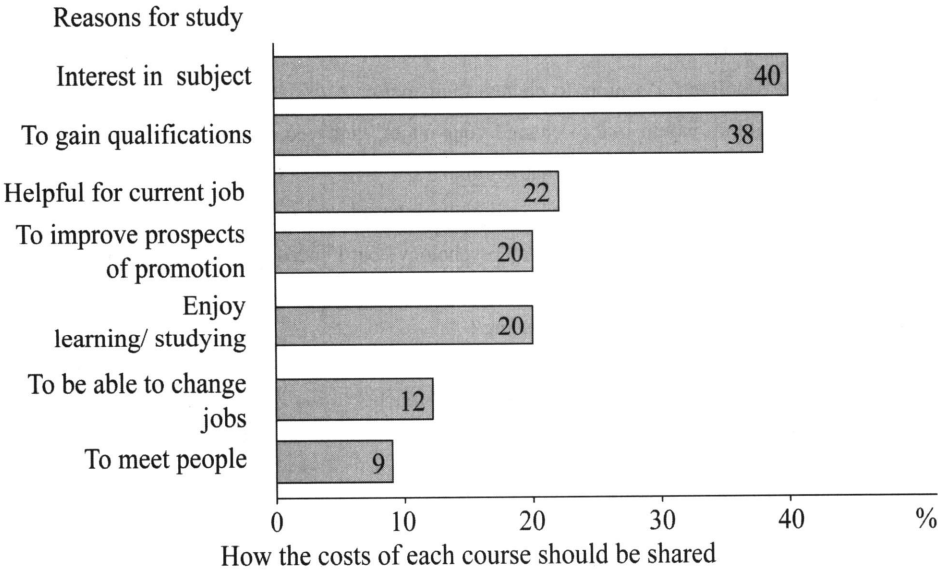

What's the Chinese meaning of the underlined sentence?

Part VIII Writing (30 marks)

Section A (10 marks)

92. The charts below show the results of a survey of adult education. The first chart shows the reasons why adults decide to study. The pie chart shows how people think the costs of adult education should be shared.

Write a report in **80-100 words** based on the information in the charts on the **answer sheet**.

Section B (20 marks)

93. In today's job market it is far more important to have practical skills than theoretical knowledge. In the future, job applicants may not need any formal qualifications.

What is your view on this? Write an essay in **at least 120 words** on the **answer sheet**.
