

2022 年决赛试题

(Total: 150 marks Time: 120 minutes)

Part I Listening Comprehension (30 marks)

Section A (5 marks)

*In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

1. A. He's trying to find the location of a different library.
B. He's unable to locate a particular journal that he needs.
C. He doesn't know which library has the journal he needs.
D. He doesn't know which journal contains the article he wants.
2. A. Looking for a job abroad.
B. Learning a new language.
C. Studying for a higher degree.
D. Traveling all over the world.
3. A. Its technical revolution.
B. Its superiority to the Internet.
C. Its importance as a social phenomenon.
D. Its comprehensive coverage of history facts.
4. A. It is dangerous.
B. It is convenient.
C. It is easier to learn.
D. It is less expensive.
5. A. The best way to gain experience.
B. The students' countries of origin.
C. The benefit students might gain from the English course.
D. The importance of learning a foreign language.

Section B (10 marks)

*In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause.*

Conversation One

*Listen to the conversation. Then read the **four** choices marked **A**, **B**, **C** and **D**, and decide which is the best answer according to what you hear. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

6. Who would Hannah like to be with on an ideal day of riding?
A. Her teachers. B. Her family.
C. Her friends. D. Her schoolmates.
7. What is the scariest thing that has happened to Hannah while snowboarding?
A. Training in a snow storm.

- B. Snowboarding in very bad weather.
 - C. Crushing to the ground and being taken to hospital.
 - D. Breaking her favourite snowboard.
8. Which is Hannah's ultimate goal in snowboarding?
- A. To work hard and have fun.
 - B. To win the World Cup.
 - C. To travel around the world.
 - D. To improve her health.
9. What does Hannah say about being away from home so often?
- A. She has got used to it.
 - B. She misses her family and friends.
 - C. She's always feeling excited.
 - D. She can travel more.
10. What do we learn about Hannah's family?
- A. They're very well educated.
 - B. They don't support her hobby.
 - C. They're all tough and active.
 - D. They go in for different sports.

Conversation Two

*Listen to the conversation and complete the sentences with **one word** according to what you hear. Then write the answers on the **answer sheet**.*

11. Mary is worried because she hasn't enough _____ experience if she teaches after graduation.
12. Professor Maxwell advises Mary to do an _____ study course next semester.
13. Mary can get some experience by assisting Professor Maxwell with one of the _____ level classes.
14. Work with a couple of volunteer _____ will take up some of Mary's free time next semester.
15. Professor Maxwell found it _____ to do a similar independent study course when he was an undergraduate.

Section C (5 marks)

*In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

16. What is the greatest contribution of the 2022 Beijing Winter Olympics?
- A. China can provide the best winter sports infrastructure for the athletes.
 - B. People of the world have come to know more about Chinese culture.
 - C. More than 300 million Chinese people are involved in snow and ice activities.
 - D. The number of snow and ice tourism trips in winter has increased considerably.
17. What is said to be beneficial for memory according to the news item?
- A. Raising a variety of pets at home.
 - B. Having a long-term pet companion.
 - C. Having much physical exercise.
 - D. Memorizing new words every day.
18. Why does Australia encourage backpackers and students to seek jobs in the country?
- A. There isn't enough workforce due to COVID-19.

- B. Backpackers need money to cover their expenses.
 - C. To make them know more about Australia.
 - D. To boost Australia's tourism industry.
19. What has the recent study found according to the news item?
- A. A college degree isn't worth its cost in America.
 - B. American people have fewer friends than before.
 - C. American colleges and universities encourage their students to make friends on campus.
 - D. College graduates are more likely to have friends than high school graduates in America.
20. What are the scientists aiming to do?
- A. Further study the growth and life of the penguins.
 - B. Explore the continent's mineral resources.
 - C. Better understand the area's environmental health.
 - D. Find out how many kinds of penguins are left.

Section D (10 marks)

*In this section, you will hear **two** short passages. The passages will be read only **once**. After each passage, there will be a **one-minute** pause.*

Dictation

*Listen to the passage and fill in the blanks with **the exact words or phrases** you hear. Write the answers on the **answer sheet**.*

A trip to France is definitely not complete without visiting the tallest structure in all of France—the Eiffel Tower. Located in Paris, this iron tower is 324 metres high and weighs about 10,000 tons. However, the size isn't the characteristic that makes the tower (21) _____. The design is. The curved design of the tower shocked most people when it was built for the 1889 International Exhibition. No one had ever designed a building shaped like that, but Gustave Eiffel, a French structural engineer, architect, and master metal worker, wasn't like everyone else. He planned the tower around the wind patterns in Paris. He added lots of curves to the structure to accommodate the wind. When the Eiffel Tower was completed, it was the tallest tower in the world and (22) _____ so until 1930, when New York City constructed a taller building.

Eiffel started his career by studying literature and history in high school, but he wasn't (23) _____ the most prestigious engineering school in France. Instead, he took a job working for a construction company that built railway bridges. Over time, he (24) _____ as a creative architect, and he was awarded bigger and bigger projects.

Eiffel designed more than the Eiffel Tower. He designed the Statue of Liberty for the United States in 1886 and the San Sebastian Church located in the Philippines. This church is the only steel church in all of Asia and is considered (25) _____.

Summary

*Listen to the passage and complete the table using **no more than three words** for each*

blank. Write the answers on the **answer sheet**.

Immigration

Reasons: Push factors—war, poverty, (26) _____ and marriages

Pull factors—better education, more job opportunities, (27) _____ and lower costs of living

Challenges: Trouble finding a job, (28) _____, a lack of knowledge about the laws, cross-cultural (29) _____ and racism

Problems: Host country—unemployment

Home country—“brain drain”

Positive effects: Increasing cultural (30) _____ and population

Part II Vocabulary & Grammar (15 marks)

There are **15** incomplete sentences in this section. For each blank there are **four** choices marked **A**, **B**, **C** and **D**. Choose the one that best completes the sentence. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

31. I know Megan seems nosey, but her _____ are good; she only wants to help.
A. intentions B. plans C. aspirations D. beliefs
32. Albert is remarkably _____; he can come up with a solution for any problem that comes his way.
A. ambitious B. resourceful C. reluctant D. impatient
33. My friend Tammy is very _____. She always surprises us with her behaviour.
A. uncertain B. unprejudiced C. unpredictable D. unaware
34. Managers prefer to select people who have been _____ to many different types of office environments.
A. displayed B. exposed C. opened D. experienced
35. Jim _____ talking about his success for so long that we began to feel annoyed.
A. set up B. carried out C. set in D. carried on
36. Jack's plan is to lose 5 pounds by this summer. He will try to exercise more and _____ eating sweet things.
A. cut down on B. get rid of C. put up with D. run up against
37. John is very persistent. He won't _____ no matter how difficult it is. He'll keep trying.
A. mix up B. keep up C. break up D. give up
38. Susan would really like to join the debate team but she _____ ever has any free time.
A. nearly B. almost C. neither D. hardly
39. I don't know when the rain will stop. It _____ all morning and the sky is still dark.
A. has been raining B. rains
C. rained D. had rained
40. The content of the second lecture in the “Tiangong Class” series was selected from opinions and suggestions collected from the public, and has been designed _____ facility conditions on China's space station.
A. on top of B. in spite of C. in line with D. instead of

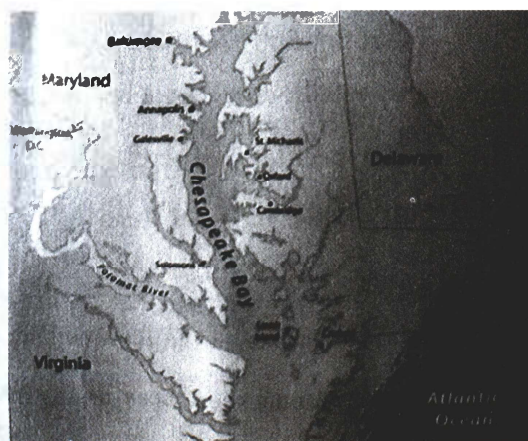

41. —Two members of your group have not arrived yet. Should we continue to wait?
—I'm worried. Something _____ to Mark because he's never late and hasn't missed even one rehearsal so far.
A. ought to happen B. must have happened
C. is happening D. may happen
42. —Can I go to the local club?
—Yes, _____ you are back before midnight.
A. in order that B. on condition that C. until D. nevertheless
43. —Do you mind if I see what's on the other channel?
—_____. I wasn't really watching this anyway.
A. Not at all B. Calm down C. Of course D. Be patient
44. —How long have you been looking for a new job?
—I just started this week.
—Didn't you have any interviews with those firms that came to our campus last month? I hear quite a few companies came to recruit students for their finance departments.
—I could only get one interview with Fidelity Company because of my heavy work-schedule. A month has gone by, and I haven't heard from them. I guess I didn't make it.
—_____ You always did well in school.
A. You deserve it. B. Don't worry. C. Don't mention it. D. Forget it!
45. —Mark, I just finished my paper. Can you proofread it before I hand it in?
—Sure, let me take a look. This is terrific. Your ideas are so original.
—Thanks.
—I can see you worked hard on it.
—I really did! I started thinking about what I wanted to say three weeks ago.
—_____
A. I cannot make it. B. Give me a hand.
C. Don't flatter me. D. It was definitely worth the time.

Part III Cloze (10 marks)

Read the following passage and fill in each blank with **one** word in one of the following **three** ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the **answer sheet**.

When you think of oceans or rivers, do you envision clean, clear water that you could swim in or drink? Or do you picture muddy water that fish and plants can't live in? If you visit the Chesapeake Bay in the United States, you won't see many animals or plants living there. Instead, you'll find that area is a marine "dead zone", which is a body of water that doesn't have (46) eno_____ oxygen to support life. It didn't use to be this way.

The Chesapeake Bay is 200 miles long and holds

more than 15 trillion gallons of water. It's (47) _____ very complex ecosystem that used to support more than 3,600 species of fish and animals and more than 2,700 plant species.

But in the 1970s, scientists discovered that the water (48) _____ (run) into the bay from nearby farms and gardens was causing a loss of oxygen because it was filled (49) _____ nutrients from fertilizers used on farms. The nutrients were good for plants that grew on the land, but in the water, they (50) _____ (attract) a kind of plant life called algae. The algae grew all across the top of the water and prevented sunlight (51) _____ reaching the plants underwater. The underwater grasses stopped growing, and the birds, and other animals that (52) re _____ on the water started to die.

(53) _____ (eventual), the algae died, too. They siphoned (抽吸) the oxygen from the water, killing the oyster (54) pop _____. Oysters clean and filter the water where they live. With (55) _____ (few) oysters around, the water in the bay got dirtier and dirtier.

Today, many groups help to clean up the bay, but it could be years before the water in the bay runs clean again.

Part IV Reading Comprehension (30 marks)

*There are **three** passages in this part. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the **answer sheet**.*

Section A (10 marks)

Questions 56–60 are based on the following passage.

We all try to remember certain things in our daily lives: telephone numbers, email addresses, facts that we learn in class, important tasks. But did you know that people once had great respect for memory?

People began to value memory as a skill about 2,500 years ago. That's when the poet Simonides of Ceos discovered a powerful technique known as the loci method. Simonides realized that it's easier to remember places and locations than to remember lists of names, for example. According to the loci method, if you think of a very familiar place, and visualize certain things in that place, you can keep those things in your memory for a long time.

(56) _____ Your memory palace can be any place that you know well, such as your home or your school. To use the loci method to remember a list of tasks, for example, visualize yourself walking through your house. Imagine yourself doing each task in a different room. Later, when you want to remember your list of tasks, visualize yourself walking through your house again. You will remember your list of tasks as you see yourself performing each one.

(57) _____ He memorized religious texts, all of the laws of the time, 200 speeches, and 1,000 poems. By using the loci method, he was able to reread books stored in the

“memory palaces” of his mind. “When I travel, I can truly say I carry everything I own with me,” he wrote.

When Simonides and Peter of Ravenna were alive, books and pens were not widely available for people to write notes with, so people had to remember what they learned. Mary Carruthers is the author of *The Book of Memory*, a study of the role of memory techniques in the past. She writes, “Ancient and medieval people reserved their awe for memory. ” (58) _____ They considered memory to be an art and a great virtue because a person with a good memory could turn external knowledge into internal knowledge.

Peter of Ravenna

(59) _____ Memorization gained a complex set of rules and instructions. Students of memory learned what to remember and techniques for how to remember it. In fact, there are long traditions of memory training in many parts of the world. In some cultures, memorization of religious texts is considered a great achievement; many other societies value storytellers who can retell myths and folktales from the past.

But over the past millennium, many things have changed. (60) _____ We’ve invented technological crutches so we don’t have to store information in our brains. We have photographs to record our experiences, calendars to keep track of our schedules, books (and now the Internet) to store our collective knowledge, and note pads—or iPads—for our ideas. By using these, we don’t have to remember anything anymore. When we want to know something, we look it up. We’ve gone from remembering everything to remembering very little. How does this affect us and our society? Did we lose an important skill?

Questions 56–60

Choose from the sentences A-G the one which best fits each gap of 56 –60. There are **two extra** sentences which you do not need to use.

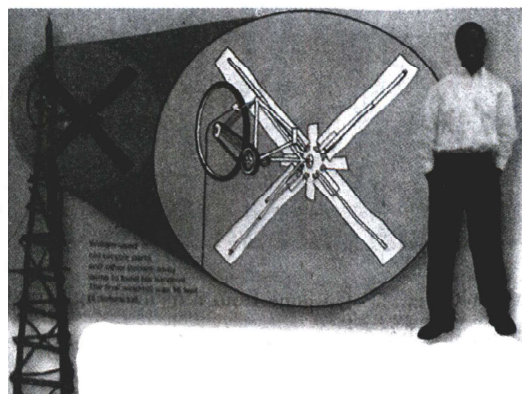

- A. We’ve gradually replaced our internal memory with external memory.
- B. In other words, these people thought that a genius was a person with excellent memory.
- C. Can you think of any other ways a person could improve their memory?
- D. Simonides called this imagined place a “memory palace.”
- E. By getting a good night’s sleep, people help their brains form memories.
- F. After Simonides’ discovery of the loci method, others continued to develop the art of memory.
- G. Nearly 2,000 years later, a man in 15th-century Italy named Peter of Ravenna used the loci method to memorize books and poems.

Section B (10 marks)

Questions 61–65 are based on the following passage.

William Kamkwamba lives in Malawi, Africa, where most people have to grow their own food and have no electricity or running water. Only two percent of Malawians can afford electricity. With no electricity or running water, life is difficult. In 2001, when William was 14 years old, life in Malawi became even more difficult. There was a severe drought and most families, including William's, couldn't grow enough food. He says, "Within five months all Malawians began to starve to death. My family ate one meal per day, at night."

Because of the drought, William's family couldn't afford to send him to school anymore. So one day William went to the library near his home. He wanted to continue his education. He found a science book titled *Using Energy*. It included instructions for building a windmill. Windmills can be very efficient sources of electricity, and they can bring water up from underground. William didn't know much English, and he wasn't able to understand most of the book, but it was full of pictures and diagrams. Looking at the pictures, William thought he could build a windmill for his family.

When William went home and started building his windmill, a lot of people laughed at him, including his mother. They didn't think he could do it, but William was confident. He saw the photo of the windmill in the book. That meant someone else was able to build it, so he knew he could build it, too. William was creative. He didn't have the parts and equipment that he saw in the book's instructions, and he couldn't buy them. So he looked for parts in junkyards. He says, "I found a tractor fan, a shock absorber, and some PVC pipes. Using a bicycle frame..., I built my machine."

William changed and improved his design little by little. First, the windmill powered only one lightbulb. Eventually, it powered four lights. Then there was enough electricity for four lights and a radio. No one laughed at William after that, and people in his town started to come to his house to get power for their cell phones. Later William built a second windmill. This one brought water up from underground. After that, William began to teach other people how to build windmills. He also continued to build more of them himself, including one at a primary school in Malawi.

Because of his success with the windmills, William was able to go back to school. He also helped with other projects, including solar power, clean water, and malaria prevention. He wrote a book about his life, *The Boy Who Harnessed the Wind: Creating Currents of Electricity and Hope*. In addition, he uses his website, movingwindmills.org, to educate and give hope to people. His main message is this: "To the Africans and the poor who are struggling with your dreams...trust yourself and believe. Whatever happens, don't give up."

Questions 61–65

Answer the following questions with the information given in the passage.

61. Why did life become very challenging for Williams family in 2001?
62. Why did William go to the library near his Home?
63. What in the book *Using Energy* helped William build a windmill?

64. What was William's second windmill able to do?
65. What is William's advice to people struggling with their dreams?

Section C (10 marks)

Questions 66–70 are based on the following passage.

Music can be found in all cultures in the world. It plays an important role in many societies. Because of this, it has long been called “the universal language of all mankind.” Recent research suggests that language and music not only complement each other, but may be more connected than anyone has ever realized. They share the same fundamental building blocks. Both can be used as a way to communicate with others. There may also be a link between the two that suggests that music improves intellectual and emotional capacity in children.

Music and language can be broken down into basic components and compared. They are made of small parts that can be used to create the meaning of something bigger. Language can be broken down into basic sounds, or phonemes, while music is made up of individual notes. Both music and language are symbolic and can be used to communicate. They can also be read and written. The vocabulary of language is made up of different letters while music is made up of notes. These notes can be arranged into measures in music, and many measures can create a piece. Similarly, words make up sentences, and sentences are used to create paragraphs.

Music and language both have a certain logic and consistent rules to them. Language has an order in which words can be arranged to make sense. By following these rules, words can be put together in an endless variety of ways. Understanding basic grammatical rules allows people to understand sentences they may have never heard before. Music also has rules for putting notes in sequences that sound good together. There are also rules for stringing sequences together to create a melody.

Both music and language have the ability to function in bringing people together. Language is used to communicate and to form social bonds. Music can form bonds between people. Singing, such as a national anthem, can evoke a strong sense of emotion and togetherness. This is especially true of group singing. The interesting thing about music is that it doesn't need to be explicit in order to be understood or send a message.

Scientists determined years ago that certain areas of the brain are responsible for language production and comprehension. Ongoing research suggests that music and language involve the same areas of the brain. The ability to comprehend and produce language is located in the Broca's area in the left hemisphere at the front of the brain. This area is also where knowledge of grammar is stored, which allows people to create sentences that make sense to others. During brain scans, the Broca's area shows activity while listening to and interpreting speech and music.

Studies show the importance of using music to enhance learning. Researchers believe that music helps students learn to recognize the differences between sounds and increases the ability to understand patterns within a language.

Questions 66–70

Complete the summary below with information from the passage, using **no more than three words** for each blank.

Music and language have something in common. They can (66) _____ each other and bring people together. They can both be (67) _____ basic components and have a logic and (68) _____. Moreover, they are symbolic and can be used to communicate. Research also indicates that music and language involve the same areas of (69) _____, and in some way music can be helpful for learning, for example, helping to recognize the differences between sounds and increase the ability to understand (70) _____ within a language.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Remember to write the answers on the **answer sheet**.

71. Research suggests that more and more Millennials (千禧一代) are interested in pursuing altruistic (利他主义的) goals, such as helping others. A study found that young adults at the age of 21 to 31 are less focused on financial success than they are on making a difference. Their highest priorities seem to be giving back, and working to improve society. As a generation that grew up amidst the Internet revolution, it's not surprising that Millennials tend to see themselves as part of the bigger picture. Many of today's young adults are therefore hoping to go into careers that make an enduring impact on others.

Section B (10 marks)

Translate the following paragraph into English. Remember to write the answers on the **answer sheet**.

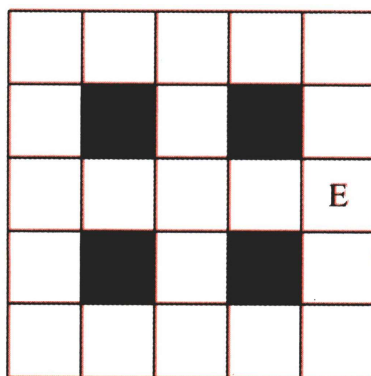

72. 北京冬奥会吉祥物“冰墩墩”的人气越来越高。有人说，吉祥物已经成为北京冬奥会最好的大使。“冰墩墩”的流行主要源于它可爱的外表。它的形状结合了熊猫和冰晶壳的形象。该设计充满了现代和科技，传达了中国的魅力，展现了奥运之美。

Part VI IQ Test (10 marks)

There are **five IQ Test** questions in this part. Write the answers on the **answer sheet**.

73. Give the two missing pairs of letters in the following sequence.
AT _____ GW IX KY
74. Move one letter from the first word and add it to the second word to make two new words.
farce limb _____
75. I want the whole team to **give one hundred per cent** this afternoon and hopefully we'll get into the finals.
What's the Chinese meaning of the underlined idiom?

76. Fill in the crosswords so that all the given words are included. You have been given one letter as a clue.

evens, await, super, stale, rates, peace

77. Which code matches the shape or pattern given at the end of the line?

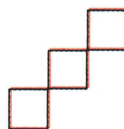

UL

WL

VM

UM

VN

?

A. VN

B. WM

C. UL

D. WN

E. UN

Part VII Error Correction (10 marks)

*There are 10 errors altogether in the following passage. The errors are: missing words, unnecessary words and wrong words. Please correct them as follows: for a missing word, mark its position with the symbol “^” and write it; for an unnecessary word, cross it out with the symbol “\” ; for a wrong word, underline it and write the correct word. An example of how to correct the error is provided below. Write the answers on the **answer sheet**.*

For example:

One of my favorite writers are Charlotte Brontë. She was born in the early
is
nineteenth century when women had far fewer opportunities ^ they have now.
than

She lived in a small village in Yorkshire and she took great pleasure in walking
on the moors wh~~ere~~ near her home.

Have you wondered why it is so easy to gain weight and so difficult to slim down? Think the average young person's lifestyle today. After you wake up, maybe you rushed to your computer to check your e-mail and see what's happening on your favourite social networking sites. Then you go to school and spend the day sitting in classrooms. At the night you have to study to keep your grades up. When do you have time to exercise? You don't.

Young people's diets are also a problem so they don't have time to eat well. Instead of eat balanced meals with lots of fresh fruits and vegetables, they eat hamburgers and French fry.

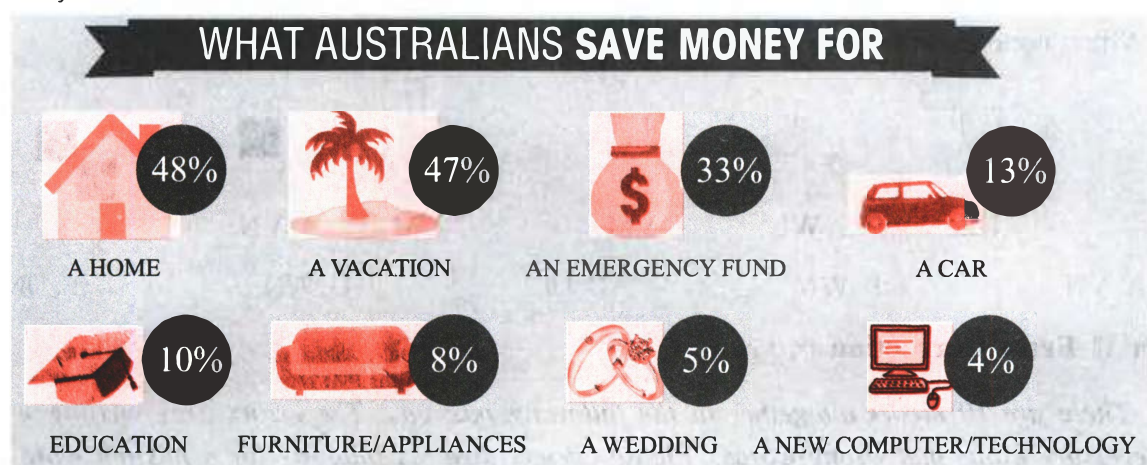

In 2005, the most overweight country in the world was the Republic of Nauru, an island country in the South Pacific. In Nauru, 94.5% of the population was overweight! People in many other countries suffered of weight issues as well!

Unfortunately, many health problems are associated to weight gain. Being overweight or obese increase your chances of having heart disease, diabetes, cancers, and breathing problems. The solution to weight-related health problems is simple: eat a health diet and exercise every day. The biggest challenge is finding the time.

Part VIII Writing (30 marks)

Section A (10 marks)

88. Everyone saves money for different reasons. Read about what Australians save money for.

Write a report on *what Australians save money for*. Write the essay in **no less than 120 words** on the *answer sheet*.

Section B (20 marks)

89. When new unemployment figures are released, some people often wonder if the jobless really deserve our sympathy. They get the impression that we have a generation of people who are sitting around waiting for the perfect job to come along. People need to take the initiative to get a job. But if there really are no jobs available, they should be doing something constructive with their time.

What's your view about this? Write an essay in **no less than 160 words** on the *answer sheet*.
