Section A

1. W Hi, Bob. How do you like your new job?

M Well. I know, you may think being a postman's not a very good job, long hours and not a lot of money, but I enjoy it better than some things I've done. When I first left school, I spent a month or two cleaning windows, and then I got a job building houses that was hard. 5. M Amy, why did you go to British Columbia in the first place?

W Well, my friend Christine and I were on our way to a remote ski lodge. I'm an outdoor enthusiast and a good skier and I was thinking of working at the lodge as a cook for the winter season. My real intention was to see if the wild untamed location was right for me. So I decided to hike to the interview rather than take the usual helicopter ride in. And Christine had come along for the adventure. We drove off the highway onto a steep dirt road in the mountainous area of bevel stoke. We parked my four wheel drive vehicle by the trail entrance. We knew it would be a 6 hour hike up the mountains and across a glacier to the lodge.

Question Why was Amy hiking to a remote ski lodge in the mountains?

C 【解析】题目问艾米要徒步去山上一个偏僻的滑雪小屋的原因。对话中女士(即艾米)说她真正的目的是想看看荒野是否适合她。故选 C。

Conversation One

- W Today I'm with Toby Marshal, who has just written a book about traveling in Argentina. Toby tells us something about it.
- M Well, I've traveled to South America a lot for my work. I know Argentina pretty well now so well that I could be a tour guide if I want it. I speak fluent Spanish so I don't need anyone to translate for me. (6) My job involves travelling around selling products for my company. I meet a lot of people doing that, and I wanted to share my experiences with others. So I decided to try writing.
- W Now tell us about your last visit to Argentina. What was the weather like then?
- M Well, it was winter there. So mornings were cold, but I'd expected that every day, they said on the radio that it would be sunny later. And sure enough it was, (7) I wanted to go sightseeing and the weather was perfect for that.
- W And where did you go when you went sightseeing?
- M Well, I went to a wonderful market that sold everything from modern art to old records of traditional music which I collect. (8) I came home with a beautiful painting of the area. I also saw a wonderful antique chair, but unfortunately, it was too big to bring back.
- W We all know Argentina is famous for its dancing. Did you see any performances during your trip?
- M I did. Yes. It reminded me of when I used to attend dance classes. I enjoyed them although I was never very good. I'm sure my teacher was pleased when I said I wasn't going to continue, but these dancers made it look so easy. At that moment, (9) I felt like joining in and dancing with them.
- W It sounds wonderful. And what else did you do?
- M Well, I went to a small village on the coast. I took the bus there and got a room in a small hotel. The hotel owner was very friendly. He took me down the river in his boat. It was very beautiful. You could see the forest in the distance.
- W Do you have a favorite place in Argentina?
- M Definitely. It's a mountain near Buenos Aires. It's famous for its spectacular scenery. But when I went there, it was very misty and the sun was just rising. You couldn't see much. There were no birds or animals about. (10) It was totally quiet. And I loved that. I should go back one day.

Conversation Two

- W Do you have trouble remembering people's names? Do you tend to forget where you put your door key than fear not? Help is at hand. Today, we have with us well-known psychologist Gavin Bonnet. Gavin, is there really a way of improving our memories? And if so, what are the steps we can take?
- M The first thing to remember is that we can all help ourselves remember effectively by doing quite ordinary things, like writing things down, using a diary, a calendar, a notebook, a notice board, and checking these things regularly. You can use colored highlighter pens to pick out really important bits of information, rather than making your brain lazy as some people think. (11) Scientific studies have proved that these aids encourage a very organized and methodical approach, which helps the brain to function effectively.
- W Now I've heard people say, you know, if they want to remember to buy fish for supper, they carry around a mental picture of a huge fish, flapping on a line. Is there any truth in this? It all sounds a bit strange to me.
- M Centuries ago, the ancient Greeks developed the system of mnemonics or memory, aids, isolated and fragmented bits of information are difficult to remember. Mnemonics is a way of linking what you wish to remember with something that means something to you. (12) It could be a mental image, a word, a short poem, and so on. For example, imagine I want to remember the number, 1843465. I could link these numbers to personal experiences. 18 is easy. That's the age I went to university. 4 is a number of children I have. 34

is the number of my house, and 65 is the age at which I'm going to retire. (12) Linking things we want to remember with rhymes or colors or visual images is helpful as well. (13) Our lifestyle plays a part in memory, too. Eating a healthy diet and taking plenty of exercise and having fresh air all help us to be more clear-headed and less absent-minded.

W So it's mind and body together, is that it?

M Yes. I think so. Scientists are gradually finding out more and more about how the brain works and what we can do to assist its functioning. When taking notes, for example, it has been shown that mapping out notes from essential sphere with lines radiating out in different directions is worth adopting because it reflects the way we link information in the brain (14) using different colored pens, for note-taking, not just black, helps the brain too.

W Are there any differences between men's and women's recall ability? Do you think?

M Men are good at remembering directions and phone numbers? Women are better at names and appointments. Why? We don't really know. You have to take into account upbringing as well as innate differences. Factors that seem to be bad for men and women equally aren't anxiety and worry. (15) These definitely decrease your thinking ability.

W Thank you very much, Gavin, for some very interesting and practical suggestions.

Section D

Dictation

The carrying of the Olympic flame from its source in Olympia in Greece is one of the more (21) spectacular features of the Games. It is also one of the ways in which the modern Games are linked to the original Ancient Greek games up to 2,500 years ago, although when the modern Olympic Games were first held in Athens in 1896, the Olympic flame played no part. It was not introduced into the opening ceremony until the 1928 Games in Amsterdam, and the relay, the carrying of the flame from Olympia itself, was only introduced eight years later at the celebrated Berlin Games of 1936. The flame was lit at Olympia by women wearing (22) traditional Greek costume and it was then carried by relays of runners of the 1,910 miles overland to Berlin in 12 days. They passed through five other countries on the way.

Sometimes the flame goes out, and (23) a backup lantern is always carried from Olympia in case relighting is necessary. In 1976 and in 1984 this happened and the torch was successfully relit. The Olympic flame features in both summer and winter Olympics. Fresh torches were lit from the Olympic Torch Lantern each morning, and each of the runners was given the option of purchasing their torch (24) as a memento.

Once the Olympic flame finally arrives at the Games stadium, it is used for (25) ceremonial lighting of the Olympic cauldron, the giant flame which burns throughout the Games and forms a symbolic focus of the event. It is the dramatic physical reminder of nearly three millennia of Olympic tradition.

Summary

For many people, electricity is a vital part of everyday life and is often taken for granted, but not everyone has access to it. Improving the supply and availability of electricity across the world has challenged scientists for decades. Now, however, (26) technological advances mean that a cheap, safe source of electricity may soon be available virtually anywhere on the planet.

The idea is to harness the sun's energy using satellites. Of course, solar powered satellites are not a new idea. They were first thought of over 30 years ago, in fact, but it is only relatively recently that technology has advanced far enough to make the idea a practical possibility. The basic idea is that the solar powered satellites will convert the energy in sunlight into electricity. (27) The energy will be beamed to Earth in the form of microwaves, which will be collected by a device known quite simply as a microwave collector. A re-conversion plant will then turn the energy harnessed by the microwave collectors into electricity, ready for distribution.

(28) The solar powered satellites involved will take just 90 minutes to orbit the earth. (29) They are able to produce electricity extremely efficiently with less absorption and scattering of radiation. Each solar powered satellite used for harvesting solar energy will be only 200 meters long and also very light in weight. These advantages will make launching them into orbit much cheaper.

As there is no night time in space, it will be possible to generate electricity virtually 24 hours a day. Scientists are anxious to reassure people about the safety of microwaves. After all, many of us have seen what microwave

ovens can do to food. And there are definitely some health issues to consider. However, (30) if the microwaves operate at the correct frequencies, scientists assure us that people and the environment should both be safe.

50. well

解析 该句的意思是“但是当观光巴士不再来的时候, 这些图书馆的成败将取决于它们是否能很好地满足各自社区的需要——它们是否真的是好地方, 而不仅仅是引人注目的建筑”。空格后面的句子不缺少任何成分, 所以空格处应填入副词, 修饰行为动词 serve, 由空格前面 how 可知, 这里指“多好”, 故填入 well。

51. different

71. COVID-19 表明,一种传染病能以极快的速度席卷全球,将卫生系统推向崩溃边缘,并颠覆全人类的日常生活。疫情还揭露出:我们未能从急性呼吸综合征、禽流感、埃博拉等近期的突发卫生事件中吸取教训。疫情提醒我们,全世界仍然没有准备好阻止局部疫情向其他国家蔓延、进而演变为全球大流行病。传染病仍然对每个国家构成明确而现实的危险。在应对这场卫生危机的同时,我们需要为下一场危机做好准备。这意味着加强地方一级的初级卫生保健,以防出现崩溃。最重要的是,这意味着加强全球团结,让每个国家都能有遏制传染病蔓延的机会。

句式分析

1. 该段第一句为翻译难点。how 引导宾语从句,句中三个并列动词分别为 sweep, push 和 upend,可分别译为“席卷”“推向”和“颠覆”。

2. 该段第二句中的 failure 是名词,表示“失败”,翻译时使用词性转换,将 failure 翻译为“未能做某事”。

3. 该段第三句为翻译难点。that 引导宾语从句,stop...from 表示“阻止……做某事”,from 后接动词-ing 形式,该句中 spilling 和 spiraling 属于并列结构,spilling across the borders 和 spiraling into a global pandemic 分别译为“向其他国家蔓延”“演变为全球大流行病”。

高频词汇

demonstrate v. 示范;表达,显露

infectious adj. 传染的,传染性的

upend v. 颠倒,使倒立

localized adj. 本地化的

spill v. 溢出;散落

spiral v. 螺旋上升;持续恶化

pandemic n. 大流行病

collapse v. 倒塌;瓦解,崩溃

Section B

72. The first day of the first month in Chinese lunar calendar is Spring Festival, the most important traditional festival, celebrated by Han people and some ethnic minorities in China. When that day comes, children will set off firecrackers in streets. Even adults also joyfully bid farewell to the old year and usher in the new. The custom of paying New Year's visits comes from ancient times. As the legend goes, there was a monster called Nian, who would come out of the mountains in search of people for food. People were so scared that they put meat at the door for the monster, while they hid themselves inside their houses. The next day they would open their doors and congratulate each other for not having been eaten by Nian. Later when they paid New Year visits, they would not only express best wishes but also exchange New Year cards.

句式分析

1. 第一句是难点,可以使用主系表结构,系动词是 be 动词,破折号前后内容相同,可以使用同位语结构表达。“我国汉族以及一些少数民族最为隆重的传统节日”中心词是节日,前面都是修饰语,“传统”使用 traditional,“最为隆重的”使用最高级 the most important,而“我国汉族以及一些少数民族”在翻译时添加词汇,放到中心词 festival 的后面,作后置定语。

2. 第四句“传说在很久以前……”,可以使用句型“As the legend goes, ...”,翻译时使用省译技巧,省去“很久以前”,该句后面使用 there be 句型,注意使用定语从句将前后两个分句连起来。

3. 第五句比较长而松散,翻译时使用 while 连接起来,前面说“人们十分惊恐,便把肉食放在门口让怪兽吃”,可以使用 so...that...结构,表达“如此惊恐以致……”。

4. 最后一句使用句型 not only...but also...,表达“不但……而且……”,“说祝福的话”可译为 express best wishes,“互赠贺年卡”可译为 exchange New Year cards。

73. fair.

解析 题干要求填入同一个单词,能用于所给的三句话。根据句意,符合条件的单词为 fair,一词多义。第一句话意为“即使是最顽固的罪犯也有权得到公正的审判”,fair 意为“公正的”;第二句话意为“父母是

黑头发,父母是黑头发,但所有的孩子都是金发碧眼”,fair意为“(头发)金色的”;第三句话意为“天气预报说明天天气晴朗,有零星阵雨”,fair意为“晴朗的”。

74. He was bald.

解析 题干意为“十个人坐在船上。船翻了,九个人的头发都湿了。为什么第十个人头发没湿?”该题属于脑筋急转弯,因为第十个人没头发,是个秃头。因此答案为 He was bald.

75. B

解析 观察已知字母发现,每组字母中均有字母“a”,并且每个单词中的“a”字母的位置依次在第1、2、3、4位,下一个应该在第5位,因此答案选B。

76. A

解析 图形的数量转换。将1个向上的三角形看作4个向下的三角形,则每个图中向下的三角形的个数依次是10、9、8、7,选项中A是6个向下的三角形,因此答案选A。

77. C

解析 每个图形都代表一个单词,图形重叠就是将各自图形单词中都有的字母取出来。YOGA + CATS = A, HORN + NICE = N, CATS + BELT = T,所以是ANT,同理,CATS + NICE = C, YOGA + CATS = A, YOGA + HUGE = G, NICE + BELT = E,所以是CAGE,因此答案选C。

78. **解析** 该句的意思是“《极端天气》是由气象学家迈克尔·莫吉尔编写的一本美丽的科学图画书,书中充满了关于大自然强大力量的事实”。illustrated是形容词,意为“有插图的”,前面应该用副词修饰形容词。因此需将 beautiful 改为 beautifully。

79. **解析** 该句的意思是“这本书旨在提供足够的知识让读者理解有关变化问题的辩论的复杂性”。这里的 debate 是名词“辩论,讨论”,后接介词 on 或者 about,表示“关于……的辩论”。因此需将第二个 of 改为 about 或 on。

80. **解析** 该句的意思是“莫吉尔对大众在这个问题上被误导的方式感到震惊……”。这里使用了 mislead 的被动语态,表示“被误导”。因此需将 mislead 改为 misled。

81. **解析** 该句的意思是“……在气候变化问题上他们被政客们的竞选活动和新闻媒体对好故事的需求推向特定的立场”。这里的 campaigning 指的是政客们的竞选活动。因此需将 politics 改为 politicians。

82. **解析** 该句的意思是“他想证明气候变化是一个极其复杂的问题”。incredibly 的首字母发音是元音音标。因此需将 a 改为 an。

83. **解析** 该句的意思是“……做出过于简单的假设将不可避免地损害我们的理解”。will 后面接动词原形。因此需将 to 删掉。

84. **解析** 该句的意思是“因此,他反复强调,天气记录很短,通常是不完整的,很难比较”。由天气记录短,很难比较,可以推导出天气记录是不完整的。因此需将 complete 改为 incomplete。

85. **解析** 该句的意思“莫吉尔认为,与遥远的过去相比,气候变化的幅度远远大于近代”。由该句上下文语境,可知这里应该用一般现在时,因此需将 suggested 改为 suggests。
86. **解析** 该句的意思是“莫吉尔认为,与遥远的过去相比,气候变化的幅度远远大于近代”。in the distant past 和 in recent times 是比较的两个时间点,climate change 是比较对象,这句话是比较句。因此需要在 greater 后加上 than。
87. **解析** 该句的意思是“正是这些最近的事件被记录下来的无数细节,使它们有别于过去”。这句话是强调句,去除强调句的结构后,可以看出主语的中心词是不可数名词 detail,谓语动词是 differentiate,应该用其第三人称单数形式。因此需将 differentiate 改为 differentiates。

Acme Ltd is located in Causton where there is only a population of 10,000 and it is far from booming commercial areas. All raw materials are imported by sea. As our business thrives, its current facilities can no longer meet our requirements. There are pros and cons for business relocating from Causton to Bellport.

First, I think a better location will mean more business. Bellport has a favorable business climate where there are transportation facilities, well-kept businesses and properties, and booming commercial areas. In addition, Bellport offers a better pool of potential talents or more clients/customers, which will ensure customer retention and growth. But business relocation also brings about disadvantages, one of which is that business relocation will disrupt production. Besides, relocating business can disrupt current customer or client relations.

To sum up, the benefits of relocation justify the costs. I recommend our business relocate from Causton to Bellport.

My Outlook for Consumption

Material goods don't bring them happiness and there is no need to update their possessions regularly.

My reasons are as follows: Firstly, people should have a correct view of consumption and consume according to their own needs. The desire for fulfillment can never be satisfied through attaining material possessions. Extravagance may cause waste of resources and degradation in environment, and the temporary indulgence can't even guarantee a sense of fulfillment in the long run. Secondly, they should be independent. They should not follow suit. That is, their consumption should be compatible with their income, and ultimately moderate consumption should be carried out. Lastly, they should establish a rational consumption structure. Attention should be also paid to spiritual and cultural consumption. Studies show when people consume spiritually pure items, they imbibe positive energy from them and this benefits them in their daily lives. They feel healthier, more clear-headed and become more productive also by consuming them.

In conclusion, it is not wrong for people to pursue a better life. They should stay sensible to identify their real needs. Materialism can be a bait to delude people into comparing with others, but everyone should be the decision maker for their own life.
