

2023 年初赛试题

(Total: 150 marks Time: 120 minutes)

Part I Listening Comprehension (30 marks)

Section A (5 marks)

In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

1. A. His left leg. B. His back. C. His right ankle. D. His shoulder.
2. A. It's windy and warm. B. It's sunny and hot.
C. It's snowy and dry. D. It's rainy and chilly.
3. A. £1250. B. £15. C. £1650. D. £10.
4.

A.

B.

C.

D.

5. A. Future business transactions. B. The volume of the sales.
C. A special tax exemption. D. Reduced shipping fees.

Section B (10 marks)

In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause. During the pause, read the questions and make your answers on the answer sheet with a single line through the center.

Conversation One

Listen to the conversation. Then read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer according to what you hear. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

6. What motivated Daphne to participate in the cycle ride?
A. She took it as a chance to distinguish herself in cycling.
B. She decided to use her cycling skills to raise money for charity.
C. She wanted to encourage the production of organic food in the UK.
D. She found it a good way to test her physical endurance.

7. How did the participants feel when they first met each other?
 - A. They were eager to share their thoughts about the coming ride.
 - B. They were embarrassed to admit how much training they had done.
 - C. They were unsure they were adequately prepared for the event.
 - D. They were optimistic about how well they would get on together.
8. What initial problem did Daphne encounter in Spain?
 - A. She found the gears of her bike different from the model she owned.
 - B. She found the cycle path a bit too rough to ride on.
 - C. She was so saddle sore that she couldn't get on her bike.
 - D. She was not used to being escorted by the police through the town.
9. What made the cyclists feel the cycle ride less challenging?
 - A. The warm reception by Victoria's mayor.
 - B. The beautiful countryside scenery.
 - C. The police escort all the way.
 - D. The descent from the first summit.
10. What did Daphne think of the cycle ride?
 - A. A record-breaking event.
 - B. Too adventurous.
 - C. Too laborious.
 - D. A pleasant experience.

Conversation Two

*Listen to the conversation, and complete the following sentences with **one word** according to what you hear. Write the answers on the **answer sheet**.*

11. Kevin Spacey was a successful _____ actor in his earlier career.
12. Kevin Spacey had won a reward of a Best Actor _____ for *American Beauty*.
13. Actors should not be held responsible for a movie's poor reception because Kevin holds the view that movies aren't an actor's _____.
14. If a movie one plays in turns out to be unsatisfying, the actor should still do it with the best of _____.
15. According to Kevin, a good film is one that can stand the test of _____.

Section C (5 marks)

*In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

16. What do we learn about the satellite?
 - A. It was launched jointly by the USA and UK.
 - B. It was sent into space before nightfall on Friday.
 - C. It is used mainly to keep track of ocean tides.
 - D. It will help scientists better understand climate change.
17. What has archaeologist Kathleen Martinez spent most of her life trying to find?
 - A. A secret Egyptian tunnel.
 - B. Mysteries of the pyramids.
 - C. The meaning of life.
 - D. Queen Cleopatra's tomb.
18. Where is the speaker reporting the accident?
 - A. In a residential compound.
 - B. Outside a chemical factory.
 - C. From a nearby town.
 - D. In the TV studio.
19. Why was the football match between Serbia and Albania abandoned?
 - A. Because there was a serious quarrel involving players and fans.
 - B. Because a remote-controlled mini helicopter entered the stadium.
 - C. Because the referee was accused of making an unfair judgment.
 - D. Because an Albanian threw their national flag into the pitch.
20. What can be learned about the famous star?
 - A. He was diagnosed with cancer at the age of 70.

- B. He was known for his last and furious piano playing.
- C. He was a founding member of a heavy metal rock band.
- D. He regretted that his music career was incomplete.

Section D (10 marks)

*In this section, you will hear one monologue. The monologue will be read **twice**. After listening, complete the notes using **not more than five words**. Write the answers on the **answer sheet**.*

Turner's father left rural Devonshire to (21) _____ in London. Turner developed an illness and went to live with his uncle. Turner's interest in (22) _____ began when he was still quite young. Copying a print of Folly Bridge in Oxford proved a (23) _____ for the young artist. Turner's signature appears on the stones of the riverbank. Turner's drawings of (24) _____ can be found in his 1789 sketchbook. He found it difficult to make friends with others when he was a young teenager. Turner imitated works by the old masters when he was a student. A water-color by Turner appeared in an exhibition at the (25) _____ in 1790.

Part II Vocabulary & Grammar (15 marks)

*There are **15** incomplete sentences in this part. For each blank there are **four** choices marked **A, B, C** and **D**. Choose the one that best completes the sentence. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

26. Londoners have been journeying south _____ Brighton for almost 250 years, ever since a doctor claimed that bathing in and drinking the local sea water was therapeutic.
A. through B. around C. to D. in
27. The TV networks believe that the period between 7 p.m. and 10 p.m. is the _____ television viewing time.
A. prime B. primitive C. primary D. principle
28. The pressure _____ causes Japanese to be energetic, but it also puts them under a constant emotional strain.
A. competing B. to compete
C. to be competed D. having competed
29. "For all good poetry is the spontaneous flow of powerful feelings" was put forward by _____.
A. Robert Burns B. William Blake
C. William Wordsworth D. Charles Lamb
30. Oxford University is an _____ of over 35 colleges, varying in _____ of foundation from medieval times to recent years.
A. entity; size B. organization; manner
C. integrity; form D. association; date
31. _____ is a grammatical category used for the analysis of word classes displaying such contrasts as masculine/feminine/neuter, animate/inanimate, etc.
A. Gender B. Case C. Number D. Mood
32. If you want a shop to keep something for you until later, you may have to _____.
A. give a discount B. give a refund C. open an account D. pay a deposit
33. But we have to acknowledge that, for some people, religious identity is such an important part of their lives that it may _____ everything else.
A. overcome B. transcend C. excel D. predominate
34. An investigation was carried out on the admission rate of the children in the south area,

- _____ were surprising.
- A. which results B. the results of which
C. as the results D. the results of theirs
35. There is already growing evidence, on the basis of ongoing research, that some crop yields are declining _____ climate change.
A. on account of B. with regard to C. in spite of D. by means of
36. If you perform a service or _____ a commodity for others, you should be _____ for your pains.
A. compose; gratified B. fabricate; fulfilled
C. produce; rewarded D. originate; benefited
37. We're older now and we shouldn't really still be _____ a grudge towards one another.
A. yielding B. directing C. bearing D. cherishing
38. Helen's parents wanted her to give up writing, but she _____ and went on to become a famous writer.
A. carried coals to Newcastle B. cost an arm and a leg
C. called a spade a spade D. dug in her heels
39. **Erwin:** how much did you pay for it?
Dennis: 200 bucks.
Erwin: 200 bucks for a piece of junk like that? That's a rip-off!
Dennis: What do you mean?
Erwin: _____
Dennis: Oh. I guess I really did get ripped off.
A. It's not worth it. B. That's the best I can offer.
C. It just slipped my mind. D. I'm kind of broke.
40. **Niles:** When are you gonna take your vacation?
Gloria: I was planning to take it at the end of this month. My husband and I haven't had a chance to have a vacation over the past three years. So we're planning to travel to Europe this time. Why! Has something come up?
Niles: Well, would it be too inconvenient for you to wait until next month?
Gloria: Hm...not really. _____, but I've got to talk about it with my husband.
Niles: Thank you very much. I really appreciate your being so flexible.
A. I wish I could get away for a while B. I think I'll just need a break
C. I guess I can put it off until next month D. You really scared the heck out of me

Part III Cloze (10 marks)

Section A (5 marks)

Read the following passage and fill in the blanks with the correct forms of 5 words out of the 7 given in the box. Write the answers on the **answer sheet**.

lie what warn understand success it consecution

The technique for making your brain work well for you rather than against you is to apply advanced forms of positive thinking. Negative thinking, or a negative 'mental set', quite simply and obviously programmes your brain to work against (41) _____ and you. There is also a danger, often experienced but seldom (42) _____, that positive thinking can produce a negative result. Consider the following example: A golfer shoots into a water-hole of a certain

course in three (43) _____ matches. Knowing about the functions of his upper and lower brain, he decides to take some positive action, and programmes himself not to go into the same water-hole next time. He spends months programming himself this way, gets to the same part of the course for the fifth time, and to his amazement and discouragement goes straight into the water-hole again. Why? The reason (44) _____ in the subtlety of the brain, and the necessity for great care in self-programming. What the unfortunate golfer was unwittingly doing was programming both his brain and his body to concentrate almost entirely on the water-hole, rather than on his real goal, which was the far side. In other words, he was putting a positive on to a negative, and constantly, although unwittingly, expanding the negative. (45) _____ is essential in positive thinking is to programme a positive on to a positive.

Section B (5 marks)

Read the following passage and fill in each blank with **one** word in one of the following **three** ways: according to the context, by using the correct form of the given word, or by using the given letter (s) of the word. Remember to write the answers on the **answer sheet**.

For Egyptian farmers and fishermen, the Nile is not just a beautiful view. It is a gift, without (46) _____ there could be no Egypt, only a scorched wasteland. In a country which does not receive much rainfall, the river is their livelihood. It covers only four percent of the country but its banks are where almost all of the 67 million Egyptians live. The Nile irrigates corn crops and citrus orchards, and (47) pro_____ water for herds of cows and for doing the laundry. Its seasons are the rhythms of the Egyptian way of life; when it floods every July, locals move to (48) _____ (high) ground until it subsides three months later.

The waters of the Nile flow for nearly seven thousand kilometres, from the jungles of Uganda through the deserts of Sudan to arrive at Cairo, Africa's largest city. For (49) cen_____, no one knew where it began, and the whereabouts of its source was a legend and a quest—a dangerous one, as the Nile contains crocodiles—and intruders into the heart of Africa were often not welcomed (50) _____ the natives. The source was finally discovered in the mid-nineteenth century.

Part IV Reading Comprehension (30 marks)

Read the following passages. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the **answer sheet**.

Section A (10 marks)

Questions 51–55 are based on the following passage.

One of the most important tasks in marketing a new product is giving it a name. In terms of marketing, the quality of a product is not as important as the quality of the name it is given. This is because marketing is not about the product; it is about selling the product. Marketers use strategies such as attractive packaging, catchy slogans, and other gimmicks to convince consumers to buy their product. The most powerful marketing strategy, however, is giving a product a powerful name.

(51) _____ In the early days of computers, there were several competing brands on the market, including Apple II, Commodore Pet, IMSAI 8080, MITS Altair 8800, and Radio Shack TRS-80. In those days, most buyers knew very little about computers, so they were not able to judge the quality of one over the other. As a result, they rejected the computers with complex names. Instead, they chose the brand that invoked familiar ideas. They chose, of course, Apple II.

The name must also be easy to pronounce. If customers can't pronounce the name of a product, they won't buy it. A short name is easier to remember and to pronounce. According to research done by Strategic Name Development consultants, the best names have three or fewer syllables, such as Tums (antacid tablets), Xerox (copiers), or Cheerios (cereal). Many well-known names are longer, of course, such as Energizer (batteries) and Coca Cola (soft drinks), so length is not the only factor.

(52) _____ It shouldn't sound like the name of any other product, especially a competing product. Shoppers tend to confuse Breyer's Ice Cream with Dreyer's Ice Cream and Rolex (watches) with Rolodex (desk indexes), for example.

In addition, an effective name should hint at what the product is used for. For example, Sleepiez is a sleeping medication and Windex is a window cleaner. A name should also be appropriate for the type of product it represents. Names of medicines should sound medical, names of foods should sound tasty, and names of domestic cleaning products should sound hard-working.

(53) _____ Sometimes, the product name sounds like another descriptive word that has a positive meaning. The pain reliever Aleve, for example, sounds like "relieve." Band-Aid (a small plastic bandage) includes the word "aid." Frequently, names of products aimed at high-income consumers implicitly advertise luxury. Consider the names of these cruise ship companies: Crystal, Princess, Royal Caribbean, and Celebrity.

(54) _____ A survey administered by the above consultants asked English speakers about their reactions to various letters of the alphabet. The results showed that people associate the letters C, S, and B with something traditional, but associate the letters Q, V, X and Z with something innovative. Additionally, people in the survey associated certain letters with one sex or the other. They considered the letters F, L, V, and W feminine, but the letters M, X and Z masculine. It is not clear how those surveyed might react to the automobile names Volvo, Mazda, or Lexus.

Marketers must also consider how a product name will translate in other languages if the product is exported. When the Chevrolet Nova automobile was exported to Argentina in the 1970s, some people predicted that it would sell poorly because in Spanish the two words "Nova" mean "I doesn't go." Fortunately, "nova" (a bright star) is the same word in both Spanish and English.

(55) _____ Many words have an implicit message as well as an explicit meaning. Why, for example, has no car manufacturer named a car the Elephant? Elephants are big, strong, and dependable, but they are also slow-moving, fat, and eat a lot. There used to be a weight-loss product called Aids. It disappeared once AIDS became a serious illness worldwide.

Once the right name is chosen, advertisements are widely published to introduce the new product to the buying public. Only time will tell if the important marketing decisions made earlier will be effective in selling the product.

Questions 51–55

*Choose from the sentences A–G the one which best fits each gap of 51–55. There are **two** extra sentences which you do not need to use.*

- A. The letters within names are important, too.
- B. A name must not generate negative associations in the minds of consumers.
- C. To be powerful, the name must be easy to remember.
- D. A product name should be unique.
- E. An attractive name helps convince consumers to buy a product.
- F. An effective name also includes words, or parts of words, that are positive and inviting.
- G. Corporations put forth great effort to find the right name for a new product.

Section B (10 marks)

Questions 56–60 are based on the following passage.

In an experiment conducted in the United States during the height of the Vietnam War, researchers arranged for an actor to dress up as a protestor and attend a number of anti-war demonstrations. The actor's task was to pretend to become very ill during the protest, and request assistance to see how other protestors would react. Generally, the other protestors were very quick to assist the man to a first-aid station, and often even agreed to pay his bus fare so he could return home. Later, the researchers gave the actor a haircut, dressed him in conservative clothing, and handed him a pro-government sign to take to other anti-war demonstrations. When the actor pretended to be severely ill in these circumstances, the peace protestors were far less willing to come to his aid, despite his requests for help. Now, it seemed, he was no longer 'one of them'.

One unfortunate aspect of human character is the tendency to be biased against people who belong to different racial, religious, political and social groups. Researchers have found that people feel positive emotions such as admiration, sympathy and trust more easily for those categorized as being like them, and are quicker to feel negative emotions like suspicion and distrust when dealing with outsiders. Unfortunately, this bias has been documented in cultures all round the world, suggesting that this tendency might be hard-wired in the brain. In early human history, threats to our safety typically came from outsiders such as people from neighbouring tribes. Though this instinct may have served humanity well in the distant past, in modern society it can interfere with maintaining peace and international cooperation. Even in multi-cultural societies, such as those found in North America and Europe, people tend to naturally segregate themselves according to race, nationality, and other broad group categories. There are exceptions, of course, but for most people their friends tend to be very much like themselves.

This instinct to form groups and reject outsiders is the basis of stereotyping and prejudice. Stereotyping of those outside our group prevents us from seeing the individual. Once this occurs, it is easy to make assumptions that have a high probability of being false and grossly unfair. Stereotypes like 'people from country X are thieves', or 'people from country Y are selfish and rude', serve to put negative labels on outsiders, which can make discrimination seem justified. Once established, stereotypes are reinforced through confirmation bias; we see only the evidence which supports our assumptions. When we meet someone who does not fit a particular stereotype, we try to explain it away as an unusual exception or simply ignore it. People who hold negative beliefs about a particular group can be surprised to find that, once they stop to think about it, very few of the people they actually know from that group come even close to matching the stereotypes.

There is also some evidence that an individual's self-esteem is a factor in promoting prejudice. One study manipulated the self-esteem of participants by randomly giving them very high or very low scores on an IQ test. Next, the researchers asked the participants to evaluate two people in what the participants thought was an unrelated study. One of the people to be evaluated was of the same race as the participants, while the other was of a different race. Those whose self-esteem was boosted by the fake IQ test results gave both candidates similar scores, while those whose

self-esteem had been diminished gave much lower evaluation scores to the person from a different race. The researchers concluded that prejudice was used as a way of maintaining self-esteem. Indeed, subsequent research found that just getting people to engage in activities which improve their self-esteem results in a reduction in negative views towards outside groups.

Saint Exupery once wrote, 'If I differ from you, far from wronging you, I enhance you.' Certainly there is nothing wrong with enjoying the company of people who belong to your own national, racial and social groups. However, people who limit themselves to the familiar are in turn limited in how much they can learn and grow. Exposure to new ideas results from communicating with people who come from different backgrounds and have different perspectives on life. We have much to gain by overcoming the natural instinct to prefer our own kind, whilst distrusting those we know less well. In fact, the future of our species on this planet may depend on it.

Questions 56–60

Answer the following questions with the information given in the passage.

56. Why were the first group of protesters more likely to help the actor?
57. What does the phrase *hard-wired in the brain* in the second paragraph mean?
58. In what way are people's stereotypes reinforced?
59. How can people lower their prejudice towards outsiders according to the passage?
60. Please paraphrase the quote 'If I differ from you, far from wronging you, I enhance you.' in the last paragraph.

Section C (10 marks)

Questions 61–65 are based on the following passage.

When Ruth Redding, an account manager, was sent on a management training course to improve her relationships with her colleagues by learning how to communicate with them more effectively, she found herself talking to a horse instead of being asked to address her boss or her peers. In fact, during the course, which was organized by Manchester University Business School, Redding was asked to stand in a pen to whisper to an animal and communicate in a non-aggressive way. This form of communication, which is the subject of the best-selling novel *The Horse Whisperer*, later filmed with Robert Redford in the starring role, might appear bizarre on a stud farm (种马场), let alone a management training course. But horse whispering is among a number of unusual activities now being used to teach staff about every aspect of working life, from self-confidence to communication.

In the 1980s and 1990s, it became fashionable to dump executives on a remote mountainside, or windswept Scottish isle; and leave them to survive a weekend in order to develop initiative, build team spirit and promote leadership skills. An alternative to the classic 'chalk and talk' format, with lecturer and obedient staff seated round a table, it all seemed wild and rather outlandish (别开生面的).

Today, by comparison, it looks increasingly tame. A new generation of management training gurus (大师) are adopting a different approach. In Italy, stressed executives have been dressing up as gladiators (角斗士) to confront each other as their ancestors did, and in America, sales-people are herding cattle, while in Britain, one supermarket reportedly put its executives in Native American teepees (圆锥形帐篷) for a weekend to develop a spirit of cooperation. Naturally, the originators of these new courses claim to have respectable psychological theories to back them up.

Tudor Rickards, a professor at Manchester, was intrigued when he heard about the work done by the famous horse whisperer, Monty Roberts. 'The idea is that instead of "breaking" the horse, you cooperate with it. Traditionally, you would coax a horse into a box and then reward it by slamming the door shut. Monty leads the horse in and out of the box and offers it a reward,' explains Professor Rickards. 'Monty's approach is founded on the recognition of a horse's instinctive desire to be part of the herd.' he matched this with research from the Industrial Society, which revealed that often the difference between a successful and an unsuccessful leader is trust. 'As they observe the way horses react to certain behaviour, participants think about how they themselves or other colleagues react to different management styles,' explains Professor Rickards. 'The discussion often leads to one about experiences of bullying and abusive behaviour, a discussion that might not otherwise surface in a leadership course. We've found this helps the participants draw fine distinctions between being tough, being assertive, being supportive and being soft.'

Team building is also the aim of murder mystery days run by a company called Corporate Pursuits. Actors mingle with participants and play out a scene until someone is found 'murdered'. Clues, such as photographs, personal items or a secret message, are arranged around the room, and small teams, often pitted against each other, will work to solve the mystery under the gaze of trained observers.

Although fun and a sense of release is important, managing director Mandie Chester-Bristow admits that this type of corporate Cluedo occasionally meets with scepticism among clients. 'On one occasion, people were messing around and not taking it seriously at all, so I had to say to them, "You're behaving like a bunch of school children."'

Another challenge can be reporting the observers' findings. 'We would never say, "You are failed," if they didn't identify the murderer correctly. Instead, we would praise them for the progress they made and how they worked together as a team.'

'There are lots of gimmicks (招式) in training and headline-grabbing courses at the moment, but what they deliver is often variable,' says Nick Isles of the Industrial Society. 'People often say afterwards that they enjoyed the event, but it's very difficult to measure how much they've actually learned from it.' He argues that ongoing training in the workplace, or courses that last months, are a better way of improving aspects of business such as productivity and customer service.

Questions 61–65

Complete the summary below with information from the passage, using **no more than three words** for each blank.

Ruth Redding was participating in a training programme called (61) _____, which was becoming more popular despite its eccentricity. In the late 1990s, management training techniques were regarded as (62) _____. The creators of modern management training schemes are convinced of their effectiveness based on (63) _____. Research carried out by Tudor Rickards and the Industrial Society showed that the key element of a successful leadership lies in (64) _____. Nick Isles, however, holds an opinion that alternative courses can be a (65) _____ of improving management ability.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Write the answers on the answer sheet.

66. "Hearth and home", a symbol of traditional family values and home life, was a phrase commonly on men's lips in times past until about fifty years ago. Why is it now so little—if at all—used? And what are the implications of this? It is hardly too much to say that in almost the whole of mankind's history—from the very earliest times to the most recent period—the hearth (火炉) was the most significant center of the human home. From cave to house to castle to mansion, a fire has been the warm heart of every household.

Section B (10 marks)

Translate the following paragraph into English. Write the answer on the answer sheet.

67. 在校园里，随着体育课课时持续增加，更多青年学生既在课堂上课，也在操场上进行体育运动。超过3700万名农村义务教育学生受惠于政府开展的学生营养改善计划，身体素质得到明显提升。2018年，14岁至19岁青年学生体质达标测试合格率达92%，优良率持续上升。在社区中，青年积极参加群众性体育运动，例如跑步、游泳和各项球类运动。

Part VI IQ Test (10 marks)

There are five IQ Test questions in this part. Write the answers on the answer sheet.

68. Put the underlined words in the right order to complete the conversation.

A: Will you marry him?

B: I wouldn't marry him were alive if last the man he.

69. Which set of letters is the odd one out?

70. A test was taken by 60 students and was scored on a scale from 0 to 100. Only 21 students scored higher than or equal to 80. What is the lowest possible average score of all 60 students?

71. What number should logically replace the question mark?

72. Which shape on should replace the question mark?

Part VII Error Correction (10 marks)

There are ten errors altogether in the following passage. The errors are: missing words, unnecessary words and wrong words. Please correct them as follows: for a missing word, mark its position with a symbol “^” and write it; for an unnecessary word, cross it out with the symbol “\”; for a wrong word, underline it and write the correct word. An example of how to correct the error is provided below. Write the answers on the **answer sheet**.

For example:

One of my favourite writers are Charlotte Brontë . She was born in the early is nineteenth century when women had far fewer opportunities ^ they have now. than She lived in a small village in Yorkshire and she took great pleasure in walking on the moors where near her home. where

For most of human history, humans have had to live with the body that nature gave them. They lacked the knowledge to improve eyes that couldn't see clear, 73. _____ or help ears that couldn't hear. Such disabilities were more than an inconvenient 74. _____ for early humans; they were a threat to their existence. A person with impaired vision might not be able to hunt or work with tools, for example. Over time, the incentive to survive led people develop devices that would fix the errors in 75. _____ their bodies.

During his 12th century travels through China, Marco Polo supposedly saw

people using eyeglasses. Soon, eyeglasses became into common use in Italy. 76. _____
 The object of the earliest lenses was to help people see things that were close 77. _____
 up so they could do tasks like carving or sewing. Soon after, lenses to help people
 see distant objects became common. In the 18th century, the two types of lenses
 were being combined in one pair of bifocal lenses so individuals who were both 78. _____
 farsighted and nearsighted needed just one pair of eyeglasses. Early glasses were held
 in the hand or clip on the nose, held there by the tension of the stiff wire they 79. _____
 were made from. Modern framed glasses, suspended from the ears by earpieces,
 were uncommon to the 19th century. Nowadays, other options are available but 80. _____
 still not wide used. Only a small proportion of people worldwide who need 81. _____
 vision correction opt for contact lenses, where lie on the surface of the eye. 82. _____
 Fortunately, corneal implants and laser surgery soon eliminate the need for
 corrective devices altogether.

Part VIII Writing (30 marks)

Section A (10 marks)

83. Is college worth it? Look at the diagram below and make a note of the main point of each section. Write a report based on the information shown in the diagram. **Write at least 120 words on the answer sheet.**

Unemployment rates and earnings by educational attainment, 2016

Note: Data are for persons age 25 and over. Earnings are for full-time wage and salary workers.

Source: US Bureau of Labor Statistics, Current Population Survey.

Section B (20 marks)

84. Write about the following topic:

Privacy allows you to live your life without unwanted attention from others. Your privacy is violated when someone—a neighbour, a salesperson, an email spammer—learn too much about you or what are you doing. Opponents of automated face recognition and other security technology say it threatens personal privacy. Supporters of the technology say that some violations of privacy are necessary to make society safe. The controversy is about priorities: Is public security more important than personal privacy?

Give reasons for your answer and include any relevant examples from your own knowledge or experience. Write an essay in at least 160 words on the answer sheet.

2023 年决赛试题

(Total: 150 marks Time: 120 minutes)

Part I Listening Comprehension (30 marks)

Section A (5 marks)

In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

1. A. To live in a foreign country.
C. To use a language-learning app.
- 2.

- B. To learn through context.
D. To immerse yourself in a language.

A.

B.

C.

D.

3. A. The need for more houses in the area.
B. The fact that young people need housing.
C. The right of property developers to make huge profits.
D. The urgency to lower the soared housing price.
4. A. Book them on an airline website.
B. Ask their friends for help.
C. Purchase them at a travel agent's.
D. Phone the local travel agency.
5. A. To improve international communication.
B. To prevent the nation from splintering over internet use.
C. To provide convenience for online shopping.
D. To involve more people in the nation's economic development.

Section B (10 marks)

In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause. During the pause, read the questions and make your answers on the answer sheet with a single line through the center.

Conversation One

Listen to the conversation. Then read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer according to what you hear. Then mark the corresponding letter on the

answer sheet with a single line through the centre.

6. What opinion is expressed about the way the company was set up?
 - A. It is surprising that it worked out so smoothly.
 - B. It was hard to allocate roles among the founders.
 - C. Working with friends certainly saved time and energy.
 - D. Having a single founder would have made the launch simpler.
7. What is the positive culture of the company mainly attributed to?
 - A. Guaranteed salary increases at regular intervals.
 - B. Certain criteria in the recruitment process.
 - C. The nature of the product that is being sold.
 - D. Strict adherence to staff monitoring procedures.
8. How do both founders feel about running their company now?
 - A. They are fed up with dealing with daily problems.
 - B. They enjoy the challenges they face in their work.
 - C. They feel anxious about whether its success will continue.
 - D. They feel pleased that they have acquired a good grasp of business.
9. When describing past mistakes in staffing, Amanda reveals _____.
 - A. her belief that good qualifications are the key factor
 - B. her trust that improvements can be made in the process
 - C. her acceptance that it is vital to admit failures experienced early on
 - D. her fear that senior appointments are impossible to get right
10. What gives the company an advantage over its larger competitors?
 - A. The clarity of product labeling.
 - B. The sophisticated advertising.
 - C. The product research based on scientific models.
 - D. The emphasis on ingredients which fit market trends.

Conversation Two

*Listen to the conversation, and complete the following sentences with **one word** according to what you hear. Write the answers on the **answer sheet**.*

11. Tim and Juliet both agree that we have _____ the human brain's ability for a long time.
12. According to Juliet, everyone's brain consists of a mathematical brain and a (n) _____ brain.
13. An inability to cope with mathematics could be due to a lack of usage of the brain or its being _____ in one's early age.
14. Using something to direct your eyes towards figures can maintain direction and _____.
15. Tim and Juliet suggest that _____ is not advisable in mathematical games.

Section C (5 marks)

*In this section, you will hear **five** short news items. Each item will be read only **once**. After each item, there will be a **fifteen-second** pause. During the pause, read the question and the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

16. What contributes to the UK shortage of fruit and vegetables besides awful weather and crop disease?
 - A. The serious global pandemic.
 - B. The rising costs of energy.
 - C. A growing demand of green food.
 - D. An unwillingness to import food.
17. Under what kind of conditions will exams be taken using AI?
 - A. Fair conditions.
 - B. Strict conditions.
 - C. Limited conditions.
 - D. Favorable conditions.
18. What do we learn from the news?
 - A. A two-month state of emergency has been declared in Turkey.
 - B. A deadly earthquake occurred in Turkey at 9 p. m. on Monday.
 - C. Turkey's president was deeply saddened by the nation's huge loss of life.
 - D. Citizens in southeast Turkey experienced many aftershocks of the earthquake.

19. What have the scientists found about the dinosaur?
- Its fossil is the oldest found so far.
 - It probably could make bird-like sounds.
 - The muscles around its voice box were unusually strong.
 - Its image was distorted in movies like Jurassic Park.
20. What do we learn about Earth's possible second core?
- It consists of a layer of fluid rock.
 - It is the main cause of earthquakes.
 - It is found 2,900 kilometers below Earth's surface.
 - It has a radius of 3,485 kilometers.

Section D (10 marks)

In this section, you will hear one monologue. The monologue will be read **twice**. After listening, complete the notes using **not more than five words**. Write the answers on the answer sheet.

THE LIFE OF H. G. Wells	
The Year of Birth	1866
The Output of His Literary Works	It was vast and (21) _____.
As a Thinker and a Writer	He adopted (22) _____ as the starting point of the story.
<i>The Time Machine</i>	It was followed by more equally successful novels which combine (23) _____ and a desire to foresee a possible future.
<i>The History of Mr Polly</i>	Written in 1910, it describes (24) _____ of an inefficient shopkeeper.
One of His Last Statements	It urges people to face their awful fate with dignity and (25) _____.

Part II Vocabulary & Grammar (15 marks)

There are **15** incomplete sentences in this part. For each blank there are **four** choices marked **A, B, C** and **D**. Choose the one that best completes the sentence. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

26. A visit to the spectacular Thames Barrier is a _____ experience.
- memorial
 - memorable
 - memory
 - memorized
27. Top models are paid millions because, _____ a time when spending is down, they can still make consumers buy.
- in
 - at
 - by
 - for
28. The presence of the president resulted in _____ security, which consisted of security men sealing all gates except for one so that the president could leave.
- tightening
 - bound
 - tightened
 - binding
29. You should _____ your boss and not let him criticize your work so unjustly.
- stand up to
 - stand back
 - stand by
 - stand in for
30. If I _____ to travel tomorrow, I _____ my ticket yesterday.
- was; would buy
 - was going; had bought
 - were; could buy
 - were going; would have bought
31. This is _____ boy, he goes to _____ church every Sunday.
- Adrian and Jane's; /
 - Adrian's and Jane's; /
 - Adrian's and Jane's; the
 - Adrian and Jane's; a
32. I warned my colleague not to spend too much time in the boss' office as he has a tendency to _____.
- put words in your mouth
 - talk your ear off

Football weaves itself into whichever cultures embrace it, appealing to people who have nothing else in (43) _____ but who each have a personal passion for the game and are addicted to its spontaneity. Packaged into 90 minutes are heroes and villains, hope and despair, skill and drama: a miniature war (44) _____ flags and armies.

Football has an astonishing ability to cross borders and barriers, as between German and British troops in no man's land in the First World War. It seems so natural to share the kicking of a ball, and the basic structure of the game is amazingly simple: two opposing sides attempt to push a spherical object into the (45) _____ goal. Played informally, football has great flexibility, with no set number of players, no particular pitch and no equipment except something to kick and something to define the goal mouth.

Section B (5 marks)

Read the following passage and fill in each blank with **one** word in one of the following **three** ways: according to the context, by using the correct form of the given word, or by using the given letter(s) of the word. Remember to write the answers on the **answer sheet**.

Though the reasons for falling birth rates vary from country to country, all countries with declining populations face similar social and economic consequences. The consequences are (46) _____ (weak) economies, labour shortages, deep cuts in social programmes, and much higher taxes for those in the workforce. In Italy and Germany, 20 percent of the population is over 65 and this percentage is expected to double in the next 25 years. In Japan, there are already more people over the age of 65 than (47) _____ the age of 15. By the year 2050, in many developed countries, the proportion of elderly citizens to those in the workforce may be an unimaginable ratio of 1:1.

In the meantime, European and Asian governments promote (48) ambi _____ programmes to encourage couples to have more children, but declining populations have proven very difficult to (49) rev _____. Thus far, no country that has fallen below a birth rate of 1.5 has managed to rise back to the population replacement level of 2.1. Robert Retherford of the East West Center states that the dilemma for governments is finding ways of keeping the economy (50) comp _____ in the global marketplace while making societies more marriage friendly, particularly in regard to married women in the workforce. Says Retherford, "It won't be easy and it won't be cheap."

Part IV Reading Comprehension (30 marks)

Read the following passages. Each passage is followed by several questions. Respond to the questions using information from the passage. Remember to write the answers on the **answer sheet**.

Section A (10 marks)

Questions 51–55 are based on the following passage.

Last summer, after serious thought, Toby Rosenberg announced to his friends and family that he was changing his name. "Toby," he felt, "was a little boy's name". Instead, he would be called Karl, like his father before him. His school accepted the switch. His parents had no argument. Toby—now Karl—was 5 years old. And he had a point: regardless of his age, Karl has never been a little boy. At 14 months, he began to read aloud from the posters he viewed from his stroller. It would be another full year before he talked on his own; but once he did, he

spoke fluent English and Polish (his mother, Anna, is from Krakow) and several other languages. He trained himself to write Japanese after studying the label on a bottle. He taught himself the Hebrew alphabet after seeing the characters on a dreidel, a type of toy. The impression you get when you first meet Karl is that of a bookish teenager, a middle-aged diplomat, and a talkative grandmother trapped together in the body of a first grader.

"You don't know what it's like with Karl," his father says, laughing tiredly. Karl Sr.

was once an artist, and is now a website designer. He spends at least an hour every afternoon in the family's one-bedroom Brooklyn apartment drafting sketches and submitting them to his son's critiques. "He stands behind me and tells me to draw things over and over to his specifications," Karl says. "If he's not on the Internet, he's here, issuing commands over my shoulder. We just want to encourage his interests and support him any way we can. Nobody in this household is trying to tell him what to do." Which is just as it should be.

Experts offer parents of child prodigies this advice about raising their gifted children:

(51) _____ Experts advise parents of hyper-intelligent children that, instead of filling their time with planned activities, they should try not to be too controlling. "Profoundly gifted kids are highly curious and likely to pursue all kinds of interests with great passion," says Sandra Berger, a gifted-education specialist for more than 20 years. "It's best to let the child's interests be a guide."

(52) _____ Parents should strive to introduce their children to a wide variety of subjects. They should take them on field trips and museum tours; moreover, the child's normal environment should be treated as an experiential playground. It was reportedly his early walks in the woods with his father that alerted Richard Feynman, the Nobel-prize-winning physicist, to the complexity of life. For Karl, it was drives past the Williamsburg Bridge that piqued his avid interest in construction.

Such interests can prove a distraction. When he was taking his Educational Records Bureau exam in January, Karl spent much of the allotted time lecturing the test-givers on the unusual architecture of the Chrysler Building, which was visible through the classroom window. When the examiners tried to summarize Karl's irregular score, they mentioned his "most noteworthy...fund of knowledge."

Of course, even without a standardized-test score, Karl's parents know he's a genius. On the other hand, they know that they should never, ever use that term.

(53) _____ "There are three reasons the label could only be unhelpful," says Dr. Jack Shonkoff, an expert on early childhood development. "One, it puts an enormous burden on the kid that he or she will have trouble living up to. Two, it's a setup for other people—relatives, teachers—to be disappointed in the kid's future performance. And three, it serves to set the child apart from other children." Shonkoff says that extremely talented kids are pigeonholed, or stereotyped, enough already. They don't need a label to isolate them even more.

(54) _____ Combating social isolation may be the greatest challenge for those raising exceptionally intelligent kids. Karl has had a typically uphill battle finding a school—let alone a circle of friends—that can contain him. At 3 years old, he was asked to leave his preschool program at the local Y.M.C.A. His teachers thought that his obvious boredom was a bad influence on the other children. After a search, his parents discovered the East Manhattan School for Bright and Gifted Children, but the independent school soon closed. Karl then transferred to a first-grade class at a public school in Brooklyn. He was immediately promoted to its accelerated program, but his social life lagged far behind.

It's no surprise. Adults tend to make friendships on the basis of shared interests and coincidental pursuits. Similarly, highly gifted children seek out friends like themselves, rather than falling into groups according to age or grade. "These kids just aren't likely to be part of a huge gang in the lunchroom," Berger says.

(55) _____ Holding children back from upper-level grades and early college won't help them socially. On the contrary, it will frustrate them and their teachers. "These kids will exhaust the resources of any normal classroom," Berger says. "Six-, seven-, and eight-year-olds who are interested in aerospace technology shouldn't be stuck in homeroom."

Karl's extensive, far-flung pursuits could exhaust just about anyone. He's played the piano since he was 3. Two years later he requested a violin, and his parents managed to borrow one. In addition, the family's apartment was cluttered with Karl's drawings of the Titanic, which he reimagined as a medieval galleon, with his floor sculpture of Moscow's St. Basil's Cathedral reconfigured as an ancient Irish church and with the whirling presence of Karl himself.

Preparing to present his well-illustrated, self-assigned report on the Statue of Liberty,

he announced to his family: "The architect was Frederic—Auguste Bartholdi; Auguste—I mean—did you hear that? A-goose. I said goose!" He bursts into giggles, and for the moment, at least, Karl Jr. is completely happy and 6 years old.

Questions 51–55

Choose from the sentences A–G the one which best fits each gap of 51–55. There are **two extra sentences** which you do not need to use.

- A. Don't expect your child to be popular.
- B. Experts claim that it is impossible for a child prodigy to live a "normal" life.
- C. Provide as many learning opportunities as possible.
- D. Avoid calling your child a genius.
- E. Public money should be spent to help prodigies achieve their goals.
- F. Don't sacrifice educational advancement to give your child a "normal" upbringing.
- G. Don't overstructure your child's life.

Section B (10 marks)

Questions 56–60 are based on the following passage.

"Everyone admits that love is wonderful and necessary, yet no one agrees on just what it is." Diane Ackerman (author)

"All you need is love," the Beatles sang back in the 1960s. A bit overstated, perhaps, but people generally agree that love is one of the most important things in life. However, just exactly what love is may depend on whom you ask, as psychologists have found that love means different things to different people.

Psychologist John Alan Lee identified six love style categories in the early 1970s, each representing a different purpose and attitude about love that most people have. Building on Lee's work, psychology professors Susan and Clyde Hendrick created the *Love Attitudes Scale*: a survey which helps people identify their love style. They claim that understanding which style of love you most closely match can increase the odds of you finding your own Mr or Mrs Right.

The passionate Eros

The Eros-type lover is the passionate lover often written about in romance novels. People with a high degree of the Eros style have an intense focus on their partner that can last for years and years. Eros lovers have a very definite image of what they want for a partner and, once they find this person, they go all out to win his or her love. If you find yourself only attracted to a specific kind of person, then you might have some aspects of Eros in you.

The player Ludus

Ludus are the type of lovers your mother warned you about. They look at love as a game and often cannot limit themselves to just one partner at a time. The Ludus does not have any specific preferences and flirts with almost everyone. Ludus lovers have a problem with commitment and often end relationships when things are going "too well". Though Ludus-style lovers are often looked down on, the Hendricks point out that most just want to have a good time and rarely intend to hurt anyone.

The stable and safe Storge

To the Storge-type lover, friendship, commitment, and security are more important than heated romance and physical attraction. For Storges, love is a safe, comfortable relationship with a person who shares similar goals and outlooks on life. Their relationships usually begin as friends and slowly develop into deeper feeling of love. Physical intimacy and wild passion are often lacking in Storge relationships, yet their relationships are the most likely to endure.

The practical Pragma

Pragma-style lovers are very practical when it comes to love and relationships. Pragas have a clear image of what kind of life they want and look for a partner who will help them

attain it. Pragmas have a “shopping list” approach to relationships and “shop” for mates with specific qualities such as type of occupation, family background, and personality. It may seem cold and calculating, but Pragmas consider this approach simply realistic. They are similar to Storges in that they put less emphasis on passion and romance, but Pragma lovers have pre-conditions for relationships, while Storges often find love comes naturally from friendships.

The self-destructive Manic

As the name suggests, this type of lover is a bit unstable emotionally. “A Manic lover yearns for love, but somehow it always becomes painful,” says Susan. “This lover is jealous and full of doubts about his or her partner’s commitment. They also experience dramatic physical symptoms, like the inability to eat and sleep.” Manic lovers often push away partners by their possessive behaviour, and are unable to relax and allow the relationship to evolve naturally. Thus, often the Manic’s own actions make their worst fear, that their lover will leave them, become reality.

The saintly Agape

The rarest of love styles is the Agapic lover. “The Agapic lover is the closest thing the romantic world has to a saint,” says Susan. Agapic lovers are able to put the needs of their lover before their own. They ask for little from their partner, seeking only to give as much as they can. Agape lovers can sometimes sacrifice too much, however, and may feel unappreciated by their partners.

Couples with similar love styles do tend to form longer-lasting relationships, as they often share the same ideals and goals. “Essentially, the more similar two people are on most relevant variables, the more likely the relationship is to be satisfying and stable. One exception might be Mania, where a Manic partner might be better balanced by a partner higher in Storge or Agape,” Susan explains. “A Manic lover might be fine as long as the partner is willing to give extra attention and reassurance to help him or her feel more secure.”

However, couples with different love styles can still form successful unions. “Knowing that your partner has a different love style or sexual style than you do can enhance communication and understanding.” Susan explains. The Hendricks also note that most people are a mix of love styles, and that love styles are not “fixed in the genes”. “We proposed that love styles are attitudes, not personality. Thus there is always the potential for change.”

Questions 56–60

Answer the following questions with the information given in the passage.

56. What is the benefit of identifying people’s love style?
57. Why does the author call Ludus-style lovers “The player Ludus”?
58. What is the difference between Storge lovers and Pragma lovers?
59. Read the following sentence and identify John’s love style: *Even after three years of being together, John likes to treat his girlfriend to romantic dinners and surprise her with gifts.*
60. What does the author imply by saying “where a Manic partner might be better balanced by a partner higher in Storge or Agape” (Para. 10)?

Section C (10 marks)

Questions 61–65 are based on the following passage.

Coober Pedy, a dusty town in South Australia, sits atop the world’s greatest known deposits of opal—a milky white gem with veins and flecks of color. In hopes of striking it rich, gemstone miners endure the harsh Outback environment. They suffer through dust storms, flies, and midsummer temperatures higher than 120°Fahrenheit (about 50°Celsius). To escape the heat and the flies, the people of Coober Pedy go underground. They carve homes—called

“dug-outs”—into the hills overlooking the town. Subterranean living has become normal in Coober Pedy. There are shops, hotels, churches, and restaurants underground.

The miners arrive

The first opals in Coober Pedy were discovered by a 14-year-old boy, Willie Hutchinson, who was looking for gold with his father in 1915. Many soldiers returning from World War I came to the area and dug the first underground residences. A settlement took shape, which Aborigines (the original inhabitants of the area) called *Kupa Piti*, meaning “White Man’s Burrow”.

Most miners arrived in the 1960s and 1970s, immigrating to Australia and Coober Pedy from around the globe. The current population of 3,500 includes members of more than 40 ethnic or national groups, including Greeks, Poles, Germans, Italians, Serbs, and Croats. They live together in relative harmony, producing 80 percent of the world’s opal. Dealers from Hong Kong buy the opals directly from the miners because large companies cannot mine here. Mining permits are sold only to individuals or small groups.

Rough edges

Like many mining communities, Coober Pedy is a rough and rugged town. Trucks with “Explosives” signs on their sides clatter around the streets. A sign outside the drive-in movie theater politely asks patrons not to bring in any dynamite. Card games turn into three-day activities, and mining disputes are settled with fistfights in the pubs. The community takes a liberal attitude toward this behaviour. After all, miners will be miners.

Its rough edges notwithstanding, Coober Pedy has a warmth and raw charm. Many residents claim that long ago they stopped off only for gasoline and never left. Some fell in love with the unique (though sometimes scary) scenery. Just outside town are colorful rocky outcrops, used as the location for numerous films including *Red Planet* and *Mad Max Beyond Thunderdome*. All around, the dry land forms a moonscape cut through by fencing, which keeps wild dogs out of the sheep-farming country to the south and east.

Tourism is flourishing, and unlucky miners have opened opal shops, cafes, and underground motels. Still, this is a working town, and tourists had better watch their step. Peter Rowe, formerly head of the Mine Rescue Squad, pulled plenty of dead and broken bodies out of mine shafts during his career. The dirt tracks that cross the opal fields have many warning signs. Tourists have died after carelessly walking backwards while taking photographs. If the hotels don’t get you, the monster trucks will.

Home is where the dirt is

To create a typical dug-out, you need a hill and a drill. Most home-diggers tunnel into a hillside, which is a lot easier than digging straight down. If the hill doesn’t have a side of exposed rock, bulldozers push sand and loose soil away until a sandstone face emerges. Dug-outs in the 1980s, before Coober Pedy established a town government, were usually blasted into a hillside, not actually dug. Drilling, with huge rigs meant to bore tunnels through mountains, is now the technique of choice.

The homes are essentially artificial caves, but don’t assume there is anything primitive about them. Three-bedroom plans are common, and having your cave drilled out costs about the same as building a new above-ground home of similar size. Needless to say, the structure is solid, which creates some challenges. Electrical wiring has to be placed in grooves in the rock and then plastered over. Plumbing is set in similar grooves.

The hills inside the town limits were all claimed soon after the comforts of dug-out living became well known. Coober Pedy had to expand, not because it needed more space but because it needed more hills. Some town planners predict that Coober Pedy will sprawl out to great distances as more miners seek a place to burrow. Some paved roads have been laid, most of them running along the faces of the hills and out to mine shafts. A lot more will be needed if homeowners head to the far-flung hills.

One home, a comfortable dug-out near the Serbian Orthodox church, illustrates the advantages of underground living. Outside, it is pushing 104° Fahrenheit (40° Celsius). This is relatively mild for January in Coober Pedy, but hot nonetheless. Inside, it is blessedly cool. The lowing ceiling and honey-colored stone walls give a feeling of safety and refuge. Area rugs and comfortable furniture soften the interior. Appliances are set into custom-carved nooks. Hole sweet hole.

Questions 61–65

Complete the summary below with information from the passage, using **no more than three words for each blank**.

Coober Pedy is known for its uncomfortable heat and dryness. However, people still like living there. (61) _____ homes are considered normal in the town. The people of Coober Pedy come from more than (62) _____. They work together very well. The mining community takes a (63) _____ toward drinking and gambling. It is easier to dig into the hillside than into the ground. The cost of creating an underground home is (64) _____ the cost of building a home on the surface. Underground buildings are flourishing in this area not only because of its comfortable, but also the feeling of (65) _____ it provides.

Part V Translation (15 marks)

Section A (5 marks)

Translate the following paragraph into Chinese. Write the answers on the **answer sheet**.

66. Kaifeng, an ancient city along the mud-clogged Yellow River, was by far the most important place in the world in 1000. In the 11th century, when it was the capital of Song Dynasty, its population was more than one million. An ancient 17-foot painted scroll, now in the Palace Museum in Beijing, shows the bustle and prosperity of ancient Kaifeng.

Section B (10 marks)

Translate the following paragraph into English. Write the answer on the **answer sheet**.

67. 读万卷书，行万里路。比喻要努力读书，尽可能地丰富书本知识，掌握间接经验；同时要尽可能地接触实际，丰富自己的亲身体验，开阔眼界，增长见识。理论与实际相结合，间接经验和直接经验相结合，既有真才实学，又能学以致用。

Part VI IQ Test (10 marks)

There are **five IQ Test questions** in this part. Write the answers on the **answer sheet**.

68. Complete the second sentence so that it has a similar meaning to the first sentence, using the word given.

◆ There's no way that I will agree to you dropping out of school. (circumstances)

◆ _____ agree to you dropping out of school.

69. Which cube can be made by folding the given shape?

A

B

C

D

E

F

70. What starts with e, ends with e and only has one letter?

71. Which is the missing section?

72. There are four floors in the building. The higher the floor, the more people live there. Which floor does the elevator go to most often?

Part VII Error Correction (10 marks)

There are ten errors altogether in the following passage. The errors are; missing words, unnecessary words and wrong words. Please correct them as follows; for a missing word, mark its position with a symbol “^” and write it; for an unnecessary word, cross it out with the symbol “\”; for a wrong word, underline it and write the correct word. An example of how to correct the error is provided below. Write the answers on the **answer sheet**.

For example:

One of my favourite writers are Charlotte Brontë . She was born in the early is nineteenth century when women had far fewer opportunities ^ they have now. than She lived in a small village in Yorkshire and she took great pleasure in walking on the moors where near her home. where

Every winter Venice fears the “acqua alta” , which threatens to overwhelm it; relentless high tides are eating into the wood doors and shutters of ground- 73. _____ floor apartments. No one lives on the ground floor any more and Venetians are leaving their drowning home; the population have dwindled from 100,000 in fifty 74. _____ years to 70,000. The worst thing about the floods is their predictability, and that 75. _____ they cost the city \$5 million annually in lost work hours. Priceless frescoes are subject to damp and are at risk of permanent water damages; tourists find they have 76. _____ wet foot in St Mark’s Square fifty times a year. 77. _____

For half a century there has been constantly debate on how to save the city, 78. _____ but no agreement can be found, not even on whether the situation is getting worse. The number of high tides varies between 80 and 100 in consecutive years, without any more apparent trend. The worst flood of 194 cm was in 1966. What is certain 79. _____ is that the Adriatic has raised by 23 cm over the last fifty years, after decades 80. _____

of stability. This may be due to global factors, and to heavy draining of 81. _____
underground water by local factories; an aggravating factor is that the city also
suffers from subsidence. There is plan to install barriers on the sea bed by the year 82. _____
2030, which could be raised as a temporary dike when high tides are predicted.

Part VIII Writing (30 marks)

Section A (10 marks)

83. Look at the diagram below and make a note of the main point of each section. Write a report based on the information shown in the diagram. **Write at least 120 words on the answer sheet.**

少年儿童选择榜样受谁影响大?

——数据来源: 中国青少年研究中心

Section B (20 marks)

84. Write about the following topic:

Zoos: prisons or sanctuaries(保护区)? Present a case for or against the idea that animals have rights and give your views on the relationship between humans and animals in the past, present and future. **Write an essay of at least 160 words on the answer sheet.**
