说唱是一种口头形式的音乐表达。它包括有押韵的单词和录音或现场押韵部分。许多人用“嘻哈”和“说唱”来表达同样的意思。事实上，嘻哈文化是现代说唱音乐的发源。嘻哈是一种文化，它有自己的语言、服装风格、音乐和思维方式，它在不断地成长和变化。它包括几种不同的艺术形式，包括视觉艺术、舞蹈和音乐。说唱只是嘻哈文化的一部分。

尽管关于说唱音乐的起源存在很多分歧，但大多数人都认为，说唱主要起源于 20 世纪 60 年代纽约市布朗克斯区的非裔美国人社區。当时，被称为街区派对的大型户外街头派对越来越受欢迎。买不起昂贵乐器或设备的年轻人带着简单的唱机转盘和麦克风走上街头。但他们不只是播放音乐，而是用手移动旋转或转动的唱片。与此同时，他们用唱机转盘的针刮擦手指，发出咔嚓声。音乐声音的变化被称为切割或刮擦。演奏音乐的年轻人被称为唱片骑师。这些唱片骑师或 DJ，利用他们的唱盘作为乐器，创造了一种新的音乐形式。

与 DJ 一起工作的其他表演者与人群互动，他们说话通常押韵，声音大过音乐声。这些表演者被

称为主持人，或 MC，他们与人群的互动被称为说唱。后来，MC 被称为说唱歌手，表演者与人群之间的互动是说唱的一个重要特征。

巴黎圣母院，也被称为巴黎圣母院大教堂，是巴黎的一座大教堂。它是中世纪最著名的哥特式大教堂，以其规模、古老和建筑风格而闻名。

巴黎圣母院位于城市岛的东端，是在两座早期教堂的废墟上建造的，在这两座教堂之前，还有一座高卢罗马人供奉朱庇特的神庙。这座大教堂是由巴黎主教莫里斯·德·萨利发起的，他大约在 1160 年构思出了将两座早期长方形教堂的废墟改造成一座更大规模的建筑的想法。1163 年，教皇亚历山大三世为教堂奠基，1189 年，圣坛落成。唱诗班、西立面和中殿于 1250 年完工，门廊、小教堂和其他装饰在随后的 100 年里被陆续装饰。

几个世纪以来，巴黎圣母院遭受了破坏和损毁。法国大革命后，在拿破仑的庇护下，这座教堂被拯救了下来，1804 年，拿破仑在大教堂里加冕自己为法国皇帝。19 世纪中期，法国建筑师尤金·伊曼纽尔·维奥莱特-勒杜克对其进行了大规模的修复。据说，维克多·雨果的历史小说《巴黎圣母院》（1831 年）（以巴黎圣母院为背景）的热销推动了翻修的工作。在 2019 年的一次修复运动中，大教堂的阁楼发生了火灾，大火烧毁了大部分屋顶，维奥莱特-勒杜克 19 世纪的尖顶和部分肋骨拱顶。

Part IV Reading Comprehension

【原文翻译】

自闭症是一种通常在孩子三岁前出现的神经系统疾病。它的特点是语言能力受损、社交能力受损和行为重复。

最近，被诊断为自闭症的儿童数量多得惊人的，其原因无法解释。医学科学家估计，在美国，每 150 名儿童中就有 1 名患有自闭症；其他人对这一比例的估计是 500 比 1。这两个数字都令人担忧，尤其是考虑到科学家们还不知道自闭症的病因和治疗方法。医学研究人员一直在寻找答案。

科学家用“自闭症谱系”一词来指代自闭症患者表现出的能力范围。在谱系的一个极端，个人受到严重影响，而在另一个极端，个人只受到轻微影响。有些人不会说话；其他人则是高度口头表达。有些人对噪音过于敏感；其他人似乎没有注意到这一点。有些人喜欢独处；其他人想要朋友。有些人甚至结婚生子。有些人无法学习学校科目；其他人则继续获得博士学位。事实上，每个自闭症患者可能都有一套独特的特征。

尽管科学家们对自闭症的特征达成一致，但他们还没有找到导致自闭症的原因。在 20 世纪 50 年代，自闭症被认为是一种心理障碍，是由“冰箱妈妈”引起的。他们的性格被认为是如此冷漠和漠不关心，以至于他们的孩子在成长过程中不能说话或与他人互动。随着研究的进展，科学家们意识到自闭症实际上是一种神经系统或大脑紊乱。研究已经确定了自闭症患者大脑的几个区域与正常人不同。这些领域包括情感、批判性思维、学习和注意力。然而，似乎没有一个领域是导致自闭症的原因。一些研究人员推断，大脑各区域之间错误的神经连接可能是导致自闭症的原因。又或许是因为有太多的连接，导致大脑内信息过载。

医学科学家也对大脑化学进行了探索。在最近的一项研究中，研究人员从许多新生儿身上采集了血液样本。当其中一些婴儿后来患上自闭症时，研究人员测试了他们的早期血液样本，发现其中四种化学物质含量很高，这些化学物质影响了大脑发育的早期阶段。然而，他们还不能证明这些化学物质和自闭症之间的直接联系。

基因，遗传特征的载体，在自闭症中扮演着重要的角色，这是一个强有力的共识，研究继续探索遗传作为一个原因。最近，研究人员发现自闭症与孩子父亲的年龄之间存在联系，父亲年龄越大，孩子患自闭症的几率越高。众所周知，在自闭症儿童中，男性以 4 : 1 的比例占主导地位，而且自闭症似乎是家族遗传的。尽管有强有力的遗传证据，但科学家们尚未确定导致自闭症的单一基因。他们现在认为，10 个或更多缺陷基因的组合可能引发自闭症。

科学家们也在调查环境因素。他们调查了水和土壤中的有毒金属，家用产品中的有害化学物质，病毒，空气污染，甚至电视节目，但都没有发现与自闭症有关联。

尽管进行了广泛的研究，但科学家们一直未能找到自闭症的病因或治疗方法。然而，无论是通过药物治疗还是通过训练，都能使许多自闭症儿童受益，帮助他们放松，约束反社会行为，参与社会活动，学习有用的技能。药物治疗对一些儿童有效，但由于它可能有严重的副作用，没有被广泛使用。其他对一些孩子有效的治疗方法包括控制孩子的饮食，为孩子提供陪伴狗，以及通过艺术鼓励自我表达。

最常见的训练是应用行为分析，它将任务分解成小步骤，并以一点饼干或其他奖励来奖励每一个小的成功。例如，如果孩子不说话，治疗师在重复她想让孩子说的单词时，即使是一个很小的声音也会得到奖励。让孩子发出一个声音可能需要几次训练，让他说一个词可能需要更多的训练，但每次成功都会得到表扬和奖励。许多自闭症儿童通过这样的训练有了很大的进步，但也有一些没有。科学家们仍在寻找解决自闭症之谜的答案。

51.C 【解析】C 项的意思是“科学家用‘自闭症谱系’一词来指代自闭症患者表现出的能力范围。”空格后的句子提到，在谱系的一个极端，个人受到严重影响，而在另一个极端，个人只受到轻微影响，接着作者描述严重影响和轻微影响的具体表现。C 项与上下文衔接紧密，故选 C。

52.F 【解析】F 项的意思是“尽管科学家们对自闭症的特征达成一致，但他们还没有找到导致自闭症的原因。”空格后的句子提到自闭症的特征，也描述了对自闭症研究的进展，与此同时，作者也指出，似乎没有一个领域是导致自闭症的原因。因此，科学家都认同自闭症的特征，但至今未确定导致自闭症的原因，F 项与上下文衔接紧密，故选 F。

53.G 【解析】G 项的意思是“医学科学家也对大脑化学进行了探索。”空格后的句子提到，在最近的一项研究中，研究人员测试了后来患上自闭症儿童的早期血液样本，发现其中四种化学物质含量很高，这些化学物质影响了大脑发育的早期阶段。根据该段中出现的 chemical 和 brain development 可知，G 项与上下文衔接紧密，故选 G。

54.D 【解析】D项的意思是“科学家们也在调查环境因素。”空格后面句子提到，他们研究了水和土壤中的有毒金属，家用产品中的有害化学物质，病毒，空气污染，甚至电视节目，但都没有发现与自闭症有关联，这些都属于环境因素。因此，科学家们也调查了环境因素是否与自闭症有关，D项与上下文衔接紧密，故选D。

55.A 【解析】A项的意思是“尽管进行了广泛的研究，但科学家们一直未能找到自闭症的病因或治疗方法。”空格后的句子表示转折，提到通过药物治疗和训练能让自闭症儿童受益，但并未从根本上治疗自闭症患者，并结合前几段内容可知，科学家们并未找到自闭症的发病原因，也没有办法彻底根治，A项与上下文衔接紧密，故选A。

Section B

【原文翻译】

暴风雪的形式多种多样，风暴专家们给它们起了很多名字，比如“狭长钩”或“东北风”。每种类型的风暴都表现出特定的特征，这取决于它的起源和去向。北美已知的一种暴风雪是阿尔伯塔快船。在卫星照片上，一艘快艇看起来很小，但它的危险性至少相当于它的三倍大的风暴。顾名思义，风暴形成于加拿大西部平原，通常在阿尔伯塔省。它们一旦形成，就会迅速移动。快船从加拿大西部航行到大西洋大约需要72小时，这并不罕见。几艘快船一个接一个地排成一排，一次又一次地撞击同一区域，这也并不罕见。

阿尔伯塔快船的原始能量来自太平洋。在冬季，风暴通常每隔两到三天就会在北美西部登陆。一场来自不列颠哥伦比亚省或阿拉斯加东南部的风暴会蒸发掉沿海雨林的大部分水分。但是风暴中心的低气压区在穿过落基山脉时可能会聚集在一起。这场风暴仍然是一个围绕着一个中心的连贯漩涡，进入了北美高平原上空非常寒冷的空气中。

现在很干燥，低压系统将冷空气包裹起来。然后，它顺着从北极降下来的气流向东南方向移动。当它向南移动时，它会遇到稍微温暖和潮湿的空气。这些都助长并强化了风暴的形成。暖空气沿着快船的东部（锋面）边缘向北移动。冷空气从西南部（后半部）向南刮去。这两个气团之间的边界被称为冷锋，界限非常分明。一旦冷锋过去，气温可能在一小时内骤降30华氏度。

阿尔伯塔快船的大部分雪落在风暴的温暖（东部）部分。在一个典型的风暴中，下的并不是很多——也许只有两到三英寸的轻微干雪。但是，一旦人们感受到快船的真实力量，即使是这么小的量也会造成很大的麻烦。随着冷锋之后的气温下降，每小时至少35或40英里的强风形成了地面暴风雪。地面暴雪期间不会有新的降雪，但是之前落下的2到3英寸的雪会迅速形成令人眩目的漩涡。能见度几乎降至零。

地面暴风雪通常会产生一种叫做“黑冰”的现象。极地的气流瞬间冻结了之前温暖道路上的水分。冰光滑而清澈，但之所以叫它“黑”，是因为在它下面可以看到黑暗的路面。在如此光滑的冰面上，汽车轮胎没有任何东西可以抓住，车辆开始失去控制。试图刹车或转向只会让汽车在滑动时无法预测地四处摇摆。对司机来说，最好的策略是什么都不做，希望在不撞到任何东西的情况下自行滑到停止。

许多汽车不停地打滑，直到撞到路边的厚雪。车里的人通常会受到震动，但不会受到严重伤害。尽管如此，他们仍处于严重的危险之中。随着地面暴风雪的持续，积雪堆积在汽车周围，人们可能会开始恐慌。天气寒冷。他们看不到车外三英尺以外的地方。他们想知道援助是否会到来。恐惧和压力可能会导致他们做出错误的决定。有些人错误地走进眩目的雪中寻求帮助。然后他们就会迷失方向，变得无助。最好的情况是，这些人被发现时冻伤了，但仍然活在雪洞里。更常见的是，他们的尸体是在风停后被搜救犬发现的。

在一个晴朗的早晨，一艘阿尔伯塔快船袭击明尼苏达州中西部，州警和救援人员在55号高速公路上把人们从半埋在地下的汽车中拉了出来。大多数人还活着，总体健康状况良好。然而，有12个人没有在暴风雨中幸存下来。其中5人是一个家庭的成员，当时他们正在去买披萨的路上。在风暴最猛烈的时候，救援人员骑着雪地摩托找到了他们家的汽车，并提供了帮助。他们提出先把孩子们带到安全的地方，然后再回来接大人。父亲当时没有想得很清楚，拒绝让任何人走。他说，这场风暴并不严重。他们要等待风暴结束。

56.It is named according to where it gets started and where it goes. 【解析】题目问每种类型的暴风雪是如何命名的。根据题目定位至文章第一段，第一段第二句提到，暴风雪的形式多种多样，风暴专家们给它们起了很多名字，比如“狭长钩”或“东北风”。每种类型的风暴都表现出特定的特征，这取决于它的起源和去向。由此可知本题答案。

57.At two- or three-day intervals. 【解析】题目问冬季暴风雪在北美西部登陆的频率是多少。根据题目定位至文章第二段，第二段第二句提到，在冬季，风暴通常每隔两到三天就会在北美西部登陆。由此可知本题答案。

Section C

在加拿大西北部,有一群人被称为屋库因纽特人(简称“屋库人”)。《永不发怒》一书的作者、人类学家珍·布里格斯表示,屋库人的语言中没有表达愤怒的真正词汇。更值得注意的是,他们似乎从不生气。他们用来形容外国人愤怒行为的词翻译过来不是“愤怒”,而是“孩子气”。

同样,密克罗尼西亚的伊法鲁克人似乎很少生气,在他们的文化中几乎没有谋杀。然而,与屋库人不同的是,他们总是谈论愤怒,并且有很多词语来描述它。他们认为愤怒是邪恶的——实际上是恶魔——并且害怕它。

表达悲痛和感激是巴布亚新几内亚考卢里文化的核心。相比之下,美国人通常很少花时间谈论悲伤或感激。对美国男性的研究表明,他们在表达这两种情绪时都特别不自在。

这是怎么回事?我们不都是人吗?我们不都有同样的基本情感吗?这是一个哲学家、科学家、宗教领袖和人类学家等人争论了几个世纪的话题。如今,许多研究人员认为,很多情感是普遍的。然而,对于人类真正共有的情感,目前还没有完全一致的看法。恐惧和愤怒几乎总是包括在内的;内疚、喜悦、羞耻、厌恶和惊讶也被许多人认为是普遍存在的。那我们怎么解释屋库人和伊法鲁克人呢?

得克萨斯大学奥斯汀分校的哲学教授罗伯特·所罗门博士认为,情绪至少在一定程度上与文化有关。在一篇文章中,他提到,即使是来自同一文化的人,也很难就什么是情感定义上达成一致。例如,大多数人类学家不会认为爱是一种情感,但如果它不是一种情感,那么它是什么呢?

另一个挑战是如何确定两个人确实有同样的情绪。你可以观察人们的行为,并要求他们描述自己的情绪,但直接观察他们的感受是不可能的。当你试图比较不同文化的情绪时,这就变得更加复杂了。

我们倾向于将某些行为与特定的情绪联系起来,但当然,我们的联系是基于这些行为在我们自己的文化中的含义。例如,假设你是一名老师,有一名中国学生不及格。可悲的是,你得知他在拿到成绩时曾试图自残。如果你来自美国,你可能会把他的情绪状态描述为抑郁,因为在美国文化中,人们相信那些试图伤害自己的人通常是抑郁的。然而,如果你对中国文化有所了解,你可能会意识到你的学生的行为是对自己给家人丢脸深感羞耻的表现。

当然,这个例子很简单——这并不意味着中国人从来没有经历过抑郁,也不意味着来自美国的人不会感到羞耻。然而,来自一个不重视家族荣誉的文化的人真的能理解这种深深的耻辱吗?换句话说,中国人的羞耻和美国人的羞耻真的是同一种情绪吗?

并非所有情绪都是普遍的,赞同这一观点的另一个原因是,不同的语言描述情绪的方式各不相同、各有特色。例如,在古印度的梵语和孟加拉语中,情绪被描述为 *sattva* (轻), *rajas* (运动) 或 *tamas* (重)。有趣的是, *satva* 的两个例子——快乐和高贵——在英语中通常不被认为是情感。这仅仅是语言差异吗?或者它是否揭示了不同文化的人并没有共享相似的情感体验?

情感是普遍存在的还是文化特有的,这个谜很可能永远无法解开。这可能是我们对这个主题着迷的原因所在。

61.childish 【解析】根据题目定位至文章第一段第二句“the Utku have no real word in their language for anger”和最后一句“The word that they use to describe the angry behavior of foreigners translates not as anger, but rather as ‘childishness’”,即屋库人的语言中没有表达愤怒的真正词汇。他们用来形容外国人愤怒行为的词翻译过来不是“愤怒”,而是“孩子气”。因此本空填 childish。

62.complete agreement 【解析】根据题目定位至文章第四段“Many researchers today believe that a limited number of emotions are universal. However, there is not complete agreement on which emotions humans indeed share.”即如今,许多研究人员认为,很多情感是普遍的。然而,对于人类真正共有的情感,目前还没有完全一致的看法。因此本空填 complete agreement。

63.culture-specific 【解析】根据题目定位至文章第五段第一句“Dr. Robert C. Solomon, professor of philosophy at the University of Texas at Austin, has agreed that emotions are, at least in part, culture-

specific.”，即得克萨斯大学奥斯汀分校的哲学教授罗伯特·所罗门博士认为，情绪至少在一定程度上与文化有关。该句中的 in part 对应题目中的 partly。因此本空填 culture-specific。

64.shame/deep shame/shame and disgrace 【解析】根据题目定位至文章倒数第四段“If you are from the United States, you will probably describe his emotional state as depressed, for in US culture, there is a belief that people who try to harm themselves are usually depressed. However, if you have some knowledge of Chinese culture, you might recognize your student’s behavior as an expression of deep shame at having disgraced his family.”即作者举例一名中国学生曾因成绩不及格试图自残，这种行为在美国文化里被描述为抑郁患者的表现。但在中国文化里，学生的行为是对自己给家人丢脸而深感羞耻的表现。因此本空填 shame/deep shame/shame and disgrace。

65.characterize emotions 【解析】根据题目定位至文章倒数第二段第一句“Another reason to believe that not all emotions are universal is the fact that different languages characterize emotions in different ways.”即并非所有情绪都是普遍的，赞同这一观点的另一个原因是，不同的语言描述情绪的方式各不相同、各有特色。由此可知，不同文化的人通过行为表达的情绪是不同的，因为文化不同，语言不同。该句中的 in different ways 对应题目中的 differently。因此本空填 characterize emotions。

66.“一带一路”倡议于 2013 年首次宣布。该倡议是中国国内经济再平衡、实现连通世界的一个重要举措。该倡议投资数十亿美元资金兴建铁路、公路和港口，这些硬件设施将中国与位于其西部和南部的数十个国家连接起来，目标是鼓励更多的跨境贸易，同时将过剩产能投入使用。

【解析】第一句为主系表结构，主语 the “Belt and Road” initiative，译为“‘一带一路’倡议”，。主语前是非谓语动词，置于主语前，强调该倡议首次宣布的时间，表语 part 之后接了两个由 and 并列的 of 介词短语，作为定语。第二句为复合句，主语是 The initiative，谓语是 entails，宾语是 ploughing，意为“犁；奋力前进”，这里的 plough...into the hardware 可译为“在硬件设施上下功夫”。破折号里的内容是对 hardware 的举例说明。破折号后的 that 引导定语从句，先行词是 hardware，翻译时可以将定语从句单译，该句中的 to its west and south 是介词短语，作后置定语，可译为“位于其西部和南部的数十个国家”。第三句为主系表结构，表语是动词不定式。介词 while 表示前后两件事同时进行。

67.The number of under-50s worldwide being diagnosed with cancer has risen by nearly 80% in three decades, according to the recent largest study. Researches are still in the early stages of understanding the reasons behind the rise in cases. The researchers say that poor diets, alcohol and tobacco use, physical inactivity and obesity are likely to be among the risk factors. “Encouraging a healthy lifestyle, including a healthy diet, the restriction of tobacco and alcohol consumption and appropriate outdoor activity, could reduce the burden of early onset of cancer,” the report says.

【解析】①该句主干为“人数增加了近 80%”，主语中心词是人数，“全球 50 岁以下的人”译为 under-50s worldwide，“三十年内”为时间状语，该句时态为现在完成时。②该句主语中心词是“研究”，“对癌症病例上升的原因”译为 the reasons behind the rise in cases，翻译时为避免头重脚轻，主语前面的多个定语可放置后面，并添加动词 understand，即 understanding the reasons，“处于早期阶段”译为 in the early stages。③该句可译为主从复合句，“不良饮食、酗酒吸烟、缺乏运动和肥胖可能是风险因素”为宾语从句，“可能……”译为 be likely to...。④“提倡健康的生活方式”可译为 encouraging a healthy lifestyle，“健康饮食、限制烟酒以及适当的户外运动”可译为 a healthy diet, the restriction of tobacco and alcohol consumption and appropriate outdoor activity。

Part VI IQ Test

68.By this time next year, I’ll have met tons of new people. 【解析】题目要求的是：把单词按正确的顺序排列成句子。从带下划线的单词开始。根据 I’ll, have, met 等词判断该句时态为将来完成时，By 后接 this time next year 构成句子的时间状语。固定用法 tons of，意为“大量；许多”，其后接名词。因此答案为 By this time next year, I’ll have met tons of new people.（到明年这个时候，我会认识很多新朋友）。

69.C 【解析】题目问的是：哪个字母应该代替问号？图形中的字母在字母表中按照顺时针依次为：F (6)、K (11)、I (9)、L (12)、V (22)。根据观察可知，该六边形中每个对边里字母值是 2 倍关系，F (6) 对应 L (12)，K (11) 对应 V (22)，故 I (9) 对应 R (18)。因此，答案为 C。

70.A 【解析】题目问的是：哪个国家同时又热又冷。A 项 Chile 的发音同 chilli 以及 chilly, chilli 意为“辣椒”，chilly 意为“寒冷”，此外，hot 除了表示“热”还有“辣”的意思。因此，答案为 A。

71.26th. 【解析】题目问的是：某月有五个星期三，第三个星期六是18号。这个月的最后一个星期天是几号？根据题目可推出第4个星期六是25日（18+7=25），第4个星期日是26日，如果有第5个星期日是26+7=33，但一个月最多有31天，所以第4个星期日是这个月的最后一个星期日。因此，答案为26th。

72.sorrow, sleep 【解析】题目要求的是：找到一个与大写字母的单词意思相似并且与第二个单词押韵的单词。大写字母的单词 GRIEF 意为“悲痛”，SLUMBER 意为“睡眠”，与 tomorrow 和 cheap 押韵是指该词汇的后半部发音分别是 /ɒrəʊ/ 和 /i:p/，符合条件的是 sorrow/ˈsɒrəʊ/, sleep/sli:p/。因此，答案为 sorrow 和 sleep。

Part VI Error Correction

73.dig → digging

【解析】分析句子结构可知，该句主句为主系表结构，主语为 the ones，are 是系动词，表语是 St Bernards, earthquake dogs 和 the guide dogs。dig people out of... 作 St Bernards 的定语，动词 dig 与表语之间构成主谓结构，所以用现在分词 digging，故将 dig 改为 digging。

74.for ∧ blind → the

【解析】该句中的 blind 是形容词词性，for 是介词，因此需在 blind 前加 the，the blind 意为“盲人”，作介词的宾语，故在 for 和 blind 之间加 the。

75.underexploit → underexploited

【解析】该句含有被动语态，其结构是 be+ 过去分词，句中的 underexploit 是及物动词原形，意为“尚未开发”。因此将 underexploit 改为 underexploited。

76.good → better

【解析】固定用法 put sth. to good use，意为“充分利用某物”，该句中为被动结构 sth. be put to good use，该句中含有比较级 than，good 的比较级是 better。因此将 good 改为 better。

77.where → when

【解析】该句中 where 引导非限制性定语从句，先行词是 1989，表时间，故将 where 改为 when。

78.interests → interest

【解析】固定短语 show no interests in，意为“对……不感兴趣”，interest 作为“兴趣”时，是不可数名词，故将 interests 改为 interest。

79.high → highly

【解析】该句中 developed 为形容词，意为“发达的；先进的”，修饰 sensory abilities，而前面的 high 也是形容词，若修饰形容词 developed 的话，需要使用其副词词性，故将 high 改为 highly。

80. one

【解析】该句中的 another one 意为“另一个”，而此处要表达的是“另一种病人”，即 another type of patient，故将 one 去掉。

81.after → before

【解析】该句中 after 前的意思是“一只受过训练的狗有直觉，能感觉到潜在的攻击，并能在40分钟内发出警告”，after 后的意思是“癫痫发作或昏厥”，结合前后语境可知，狗发出警告是癫痫发作或昏厥之前，故将 after 改为 before。

82.improve → improves

【解析】该句中的主语是 having a dog，非谓语动词作主语时，谓语动词用第三人称单数形式，故将 improve 改为 improves。

Today's campus is well equipped and beautifully laid out. Gardens dot the northern part of the site, while student accommodation and the library occupy the northwest and northeast corners respectively. The centre of the campus is the Student Union building, the student cafe to the west and the lecture hall to the south.

In stark contrast, the 2035 campus showcases a much more diverse set of facilities. A dedicated bike path runs through the campus from south to north, encouraging a healthy and environmentally friendly lifestyle. The state-of-the-art sports center is located in the southwest corner and caters to the athletic needs of students. In addition, a traditional lecture hall has been transformed into an IT suite to foster technical literacy. Next to the library, a new restaurant and a contemporary lecture hall have been built, enhancing the learning and dining experience.

To sum up, the 2035 campus not only focuses on physical education, but also pays more attention to efficient and integrated design, reflecting the forward-looking education concept.

Is It Hard to Maintain a Healthy Lifestyle?

In today's fast-paced world, many people find it challenging to maintain a healthy lifestyle. The reasons are manifold. First, the lack of awareness of the importance of a healthy lifestyle is a key factor. Many people lack a clear understanding of what constitutes a healthy lifestyle. Secondly, the popularization of computer technology and its widespread use have brought about a sedentary lifestyle, which ultimately leads to negative effects on health.

However, it is also argued that the modern world offers many practical solutions and convenient access to information that can help individuals achieve a healthy and healthy lifestyle. For example, with the help of advanced social media tools, people can share, communicate, interact and even motivate each other to maintain good health and fitness. In addition, while lifestyle decisions are not entirely determined by willpower, establishing healthy routines at consistent intervals can help individuals automatically adopt healthier habits.

In my opinion, while adopting a healthy lifestyle will certainly have its challenges, people can still stay healthy if they stay active and make smart dietary choices. Persistence and perseverance are key. While the journey may be arduous, the rewards will undoubtedly be worth it in the long run.

Part I Listening Comprehension

Section A

In this section, you will hear **five** short conversations. Each conversation will be read only **once**. At the end of each conversation, one question will be asked, and you have **fifteen seconds** to read the **four** choices marked **A, B, C** and **D**, and decide which is the best answer. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.

1.W: Can I help you, sir?

M: Yes. I bought this about a month ago, and I have to say that I'm very disappointed. You see, I've only worn it once and already the zip's broken. I never want to carry much when I travel so it was ideal; lightweight, great colour, and with a hood—just perfect. I guess they don't make them like they used to, do they? It's just bad quality, I suppose, or bad luck. Whatever it is, I want a refund.

Question: What's the man describing?

2.W: So, why did you decide to visit Nepal?

M: At that time, I was gathering information about the development of England for a book I wanted to write. I'd read historical accounts of what life was like in English villages before the industrial revolution, but they didn't give me a deep enough insight into what life must have been like in an agricultural society. Modern life in the villages of Nepal was able to provide that insight.

Question: What was the man's research about?

3.M: What's the weather forecast for the rest of the week?

W: Tomorrow will be much the same as today; heavy cloud in the morning, clearing as the day progresses. Wednesday will be overcast with a possibility of heavy showers in the afternoon. The temperature will remain steady at 17 degrees Celsius, but it will be a few degrees lower in coastal areas. On Thursday, there will be lingering cloud, but this area of low pressure will be moving away and things should brighten up in time for the weekend. Friday's outlook is good, moderately

warm with outbreaks of sun.

Question: When is it expected to rain?

4.M: I just don't know what the referee was going on about. There was never an off-side just before the end of the first half!

W: Well, you couldn't exactly see from where we were standing.

M: But we were the better team, we should have won. I mean the Liverpool team are rubbish. Manchester United are far better than that, but last night, we couldn't even get near the goal.

W: Look, I've been supporting this team longer than you have. I've seen this before. They were just having an 'off day'.

Question: What do we learn from the conversation?

5.W: How's your diet going? You look as if you've lost a few pounds.

M: Thanks. I've been on it for a couple of weeks, but I'm not sure how much longer I can keep it up.

W: Already! What's the problem? Do you feel like sneaking a biscuit or two while nobody's looking?

M: No, it's not that. You get to eat enough on this particular diet, but you're limited to what you're allowed, so it's boring. Well, to be honest, I'm limited because there is actually plenty to choose from. It's just that I've always been difficult when it comes to food.

Question: What does the man say about the diet he is on?

Section B

*In this section, you will hear **two** long conversations. Each conversation will be read only **once**. At the end of each conversation, there will be a **one-minute** pause. During the pause, read the questions and make your answers on the **answer sheet** with a single line through the centre.*

Conversation One

*Listen to the conversation. Then read the **four** choices marked **A**, **B**, **C** and **D**, and decide which is the best answer according to what you hear. Then mark the corresponding letter on the **answer sheet** with a single line through the centre.*

M = Faris W = Sarah

W: So, Faris, how did you get on with your essay? Were you happy with the feedback?

M: Hmm, not really. I mean, I normally get at least B in my essays, and in fact the last one I wrote I got an A for, but I haven't done so well this time—it's only a C. I'm not very happy about that.

W: Do you know why? What did the tutor tell you?

M: Well, I've had written feedback, and he seems to think the organization of my essay was a bit disjointed, but I haven't been able to talk with him face to face to find out more. I'd really like to know exactly what I did wrong so I can improve for the next essay. I've got an appointment to see him on Monday, so I guess I'll find out more then. Anyway, what about you? How did you get on?

W: Well, to tell you the truth, I was pretty nervous when I went to get my feedback, because I wasn't very happy with my essay, and I didn't think it was very good, but actually my tutor loved it and I got an A. He even says he's going to put me forward for the Green Essay prize.

M: What's the Green Essay prize? I mean, it sounds obvious, but what exactly is it?

W: Well, apparently, every year the university has an award ceremony where they give prizes to the best essays in different categories, in science, in literature, in philosophy and so on, and there's an award for the best essay on environmental issues. If I win, I get a trophy and the university will donate £500 to an environmental cause of my choosing. It would be awesome to win, don't you think?

M: Sounds amazing, well done! So who will you give the money to if you win?

W: Well, initially I thought about giving the money to Greenpeace, as I'm a member, and I know that last year's winner gave the money to a local recycling charity, but I realized that if I do win, I'd like to support the beach clean, as they really need the money to advertise for more volunteers.

M: Great, that's a really good cause. Finger crossed! So, tell me a bit more about your essay. What was it about exactly?

W: Well, I wrote about women in green politics. It was absolutely fascinating, I discovered so many interesting female green activists and politicians that I didn't know before. I found out a lot more about Caroline Lucas, of course. She's the only British Green member of parliament at the moment—she's amazing—and I really enjoyed reading about green politicians in Sweden, as they

have a long tradition of environmentalism over there. But the person I found most interesting was a woman called Petra Kelly.

M: Who's she?

W: She was one of the founders of the Green Party in Germany. I'd really recommend her autobiography, it's fascinating.

M: OK, I'll check it out. We can talk about it when I've read it!

W: Cool! So, anyway, Faris, what about your essay? What did you write about?

M: Well, for my essay, I read up on green energy. It seems that here in the UK, we still lag quite a way behind some other countries in this area. For instance, in Denmark, around 30% of their electricity is generated from wind turbines, which compares to only about 2% in the UK. It's a shame, because we definitely have enough wind in this country to generate a lot of electricity.

W: So, what's the reason for that, then?

M: Well, from what I read, many politicians in the UK are put off by the high start-up costs of wind power. It's expensive in the beginning to buy and install wind farms, but what they are missing is that once you have everything in place, it's virtually free.

W: Yes, that's really true.

M: However, one area where we have invested money is in tidal power. Obviously the UK is an island, so we have a great opportunity to use the sea to generate some of our energy. And my reading suggests that we're ahead of other countries in this area. There are plans to open several tidal energy projects in the next few years, which is great.

W: What about solar? I'm guessing it's not that relevant in the UK, with our weather?

M: You know, it's a common misconception that solar power is only effective in hot countries. It's not true. If we wanted to, research suggests that at least 10% of our energy could come from the sun.

W: Well, that's all very interesting.

Conversation Two

*Listen to the conversation, and complete the following sentences according to what you hear with **one word** for each blank. Write the answers on the **answer sheet**.*

M = Presenter W = Sally

M: Hi, everyone, and welcome to the programme. Today's guest is Sally Jones, manager of the London Museum of Film and Television. As many people know, the museum was badly damaged in a fire three years ago, but after a lot of hard work, it's about to re-open next month. Welcome, Sally. Tell us about what's been happening with the museum.

W: Thanks for inviting me. It's a pleasure to be here. Well, the first thing to say is that we're really happy to be finally opening. We had originally planned to be closed for just 18 months, but it's taken us twice as long, so that's three years. However, we're really happy with the new museum, and we think people will like what's inside. So, our main collection of exhibits is now a room which is considerably larger and brighter than the old space, which means we can include a lot more things for people to enjoy. There are beautiful views now of the river from the north side of the museum, so I think people will enjoy that, too. Something which is completely new is our interactive room for children. Once we got the go-ahead from the government to rebuild the museum after the fire, we had a six-month period of consultation with the public, where we asked people what they thought of the old museum, and how we could make it better. Something which came up a lot was making the museum more fun for kids, so we've built a whole new section of the museum for children. It's got all sorts of exhibits that they can touch, sit on and get involved with. The highlight is a mock TV studio where children can pretend to be TV presenters. They can read a script from an autocue, and then have their news bulletin filmed and watch it back. We've tried it with some of the children of the staff, and the kids absolutely love it. Another new feature is the buffet restaurant. We felt our old restaurant was a bit too formal and stuffy, and it was never very popular, so now we've got a more informal and relaxed area, where people can have finger food, snacks, cheaper meals and sandwiches, as well as a wide range of drinks. The old museum bar has kept its original design. We've just changed the colour of the decor and lowered the prices a bit, since public feedback indicated that our old bar was a bit pricey.

M: That all sounds wonderful. So, when are you re-opening?

W: Well, we had planned to open next Monday, the 7th of July, but we've got a few last -minute things to finish, so the new opening date is going to be Thursday of the 17th. The grand opening will be attended by over 150 film and television stars—originally we planned for just 50 to 60 guests, but we kept getting more and more people writing to us and asking to be invited, so we've increased the number by about 100. We're open to the public from Friday the 18th, and we'll be open 363 days a year—that's every day except Christmas Day and New Year's Day.

M: And what about the entrance fee? Have you decided how much to charge?

W: Well, this was a difficult decision. We wanted to keep the costs as low as possible, but of course we've got to pay the bills and salaries. Under-fives can enter for free, and then there's a child rate of £2 and then £3 for students, but only if you can produce a valid student card, The adult rate is £5, and it's also free for the over-70s.

M: Great! Well, very best of luck with it, Sally, and do come back in a few months and let us know how it's all going.

W: Yes, of course, I will. Thanks very much.

16. Scientists say they have had a “conversation” with a whale. The scientists are from the University of California, the Alaska Whale Foundation, and Search for Extra-terrestrial Intelligence. The three organizations teamed up and spoke to a humpback whale named Twain. The scientists say their conversation with Twain was not a deep one. Professor Brenda McCowan said it was more like a series of greetings. Whales use contact calls to let other whales know where they are. The scientists made the same call 36 times over a 20-minute period. Each time, Twain responded by calling back. She even matched the intervals between calls the researchers made. Professor McCowan told the Business Insider website that “There are diverse pieces of intelligence on this planet. By studying them, we can better understand what alien pieces of intelligence might be like because they are not going to be exactly like ours.”
17. New Zealand's new conservative government has abandoned a groundbreaking plan to ban smoking in the country. Last year, New Zealand became the first country in the world to introduce legislation to phase out the sale of cigarettes. Then leader Jacinda Ardern introduced measures to phase out smoking by preventing new generations of young adults from purchasing cigarettes. The policy was hailed around the world as a bold move to improve the health of the nation. However, the new Prime Minister, Christopher Luxon, has controversially done a U-turn and junked Ms Ardern's plans. He said the ban was unaffordable and that the country needed the tax revenues from tobacco sales.
18. The merging of human and machine has taken another step forward as researchers have built a “biocomputer”. Bioengineers at the University of Indiana in the USA have combined laboratory-grown human brain tissue with microelectrodes. The scientists have dubbed their creation Brainware. It is in its embryonic stage of development, but it can already perform complex tasks such as voice recognition. Lead researcher Dr Feng Guo hopes his softer-than-usual software will help to advance AI technologies. It could also mean AI hardware uses far less energy than solely using silicon chips. Dr Guo said, “This is just proof-of-concept to show that we can do the job. We still have a long way to go.”
19. Japan's Mt. Fuji's UNESCO World Heritage status is under threat due to over-tourism. The iconic peak was listed as a world heritage site in 2013. However, a spike in the number of tourists scaling the majestic mountain is threatening that listing. Japan is experiencing a post-covid tourist boom, and many visitors are making a beeline for Fuji's climbing trails. Mt. Fuji is so sacred in Japan that many Japanese hope to climb it at least once in their lives. The burgeoning number of climbers is causing environmental damage on the slopes. Litter is strewn across the volcanic ash, and large parking lots have been constructed to accommodate tourists. These are an eyesore on the mountain's once-pristine habitat.

20. France is coming under attack from the bedbug. Many videos have been posted on social media with footage of the bugs crawling around in trains on the Paris metro. Sightings have also been reported in cinemas, museums, and even at Paris' airport. Emmanuel Gregoire, the deputy mayor of Paris, admitted there was a proliferation of the minute creatures. He reassured people by saying his government was taking action to deal with the "widespread" rise in bedbugs. A new initiative is being introduced to cut bug populations, ahead of the Paris Olympics in 2024. This includes hiring fumigation companies to help exterminate the bugs. Mr Gregoire said, "There is no threat to the Olympic Games. Bedbugs existed before and they will exist afterwards. A sanitation expert agreed. She said the problem was, "an emerging phenomenon...almost everywhere in the world".

I would like to start by briefly tracing the history of the remarkable textile we call silk. Silk was first discovered in China about 5,000 years ago and the first garments made from it were robes. After its discovery, these robes were for the exclusive use of the Emperor, his immediate family and the highest of his dignitaries. As time passed, silk became available to those who could afford it and it was used to make other articles of clothing, decorative pieces and luxury paper. Because of its high tensile strength, it was also deemed suitable for making bowstrings, fishing lines, and the strings for musical instruments. Apart from these uses, silk had intrinsic value, so during the Han Dynasty, farmers could pay their taxes in silk, effectively making the textile a form of currency. Civil servants were often paid in silk and values calculated in quantities of it. For millennia, the process by which silk was made remained highly secretive. Indeed, knowledge of how to make the material was confined to China until about 2,000 years ago. Then the secrets of silk making spread to India and eventually to Europe, where silk production began in Italy in the thirteenth century.

As for production, silk farming demands the utmost care if high quality silk is to be harvested. The silkworm from which silk is obtained is a blind, flightless moth. When the moth lays its eggs, each of which is about the size of a pinhead, they have to be kept at a constant 20°C. The temperature is then gradually raised to 25°C, at which point the eggs hatch. The silkworms immediately exhibit a huge appetite, feeding day and night on chopped, hand-picked mulberry leaves. After a month, the silkworms weigh 10,000 times as much as they did when they hatched. This period of growth also sees the creatures change colour and shed their skin on several occasions. However, conditions must be ideal for the silkworms to achieve rapid growth as they are particularly sensitive to loud noises, strong smells and draughts. Therefore, their environment must be kept quiet, odour-free and still. When they have gained enough energy from the leaves they have consumed, they are ready to enter the cocoon phase. At this point, the silkworms produce a jelly-like substance which hardens when it comes into contact with air. They spend three to four days spinning their cocoons, which look like puff, white balls. After eight or nine days in a warm environment the cocoons are unwound. Each cocoon provides an astonishing six to nine hundred metres of filament. Silk thread comprises five to eight of these filaments twisted together and, when these threads are woven, they give us the smooth lightweight silk.

Despite competition from other materials, silk production has doubled in the past two decades and China is the world's largest producer. It is as if the story of silk has come full circle since it is once again regarded as special in terms of quality and status.
