Part V Translation (15 marks)

Section A (5 marks)

66. 对我们许多人来说,工作、家庭和家人的综合需求意味着我们总感觉时间不够用。最新研究表明,解决我们时间匮乏问题的良方可能在自然界。例如,对于相同的距离,与在城市中散步相比,人们感觉在乡村散步的时间仿佛更长。自然世界似乎不仅改变了我们当下的时间感,还改变了我们对过去和未来的时间感。先前的研究证实,在大自然中消磨时间有助于将我们的注意力从眼前转移到未来的需求上。

Section B (10 marks)

67. Beijing's central axis is located in the center of the old city of Beijing, stretching from the Bell and Drum Towers in the north to Yongding Gate in the south, with a total length of 7.8 kilometers. Running north to south, it consists of 15 heritage elements, forming an architectural and site complex that dominates the entire old city planning pattern. The Beijing central axis was built in the 13th century and took shape in the 16th century, and has been continuously improved since then. After more than seven centuries of construction, the Beijing central axis has formed an orderly and majestic urban architectural complex.

Part VI IQ Test (10 marks)

68. Wheat.

解析:Wheat, 去掉第一个字母为 heat,去掉前两个字母为 eat; 后三个字母可以组合为 tea。

69. casino.

解析:All the other words form a sequence where each word commences with the middle two letters of the previous word.

70. 220.

解析:Once every 220 days= (5 × 4 × 11).

71. E.

解析: So that the dot appears in two circles and the square.

72. 154

解析: Reverse the previous number and add the two together; for example 52 reversed is 25, so $52 + 25 = 77$; $77 + 77 = 154$

Part VII Error Correction (10 marks)

There have been a number of scientific advancements in the last decade; some have affected individuals, others the whole world. Not until I heard about this one, however, do I really start to think about my lifestyle and the effect it may be having in my health. The advancement in question was developed as a result of extent research, and it involves a wristband which uses people's DNA to help them make the right nutritional choices.

It all started when a professor of biomedical engineering, Professor Chris Toumazou, decides to carry out research when his son became ill as a result of a rare genetic disease which resulted in kidney failure. Giving that the professor's research confirmed the huge impact lifestyle has on many undiagnosed conditions in humans, Professor Toumazou set about assisting people in changing his lifestyles by creating a wristband that uses their DNA.

Basically, by analyzing the part of your genetic code that determine vulnerability to nutrition-related health conditions, the wristband can tell which foods are suited to you and which you should avoid. on condition where you wear it when you go shopping. All you have to do is scan the barcodes on the food packaging. Supposing the food is appropriate for you, the wristband will show a green light. Should the opposite be true, the wristband will show a red light. The truth is, seldom do we consider ~~wish~~ the nutritional value of the food we buy; it is often only the calories we think about.

In a nutshell, it is not a question of telling you what to eat, but of informing you what to eat based on your DNA and lifestyle.

73. did

74. on

75. extensive

76. decided

77. Given

78. their
